We hereby state the following matters regarding the appraisal report numbered 2011REV366 prepared on 30.09.2011 by TSKB Gayrimenkul Değerleme A.Ş. for Akfen Gayrimenkul Yatırım Ortaklığı A.Ş.

- The findings provided in the following report are true to the knowledge of the Appraisal Expert;
- The analyses and the results are only limited to the specified assumptions and conditions;
- The appraiser has no interest whatsoever related to the property which is subject to the valuation;
- The appraiser's remuneration does not depend on any section of the report;
- The appraiser was realized in accordance with the ethic rules and the performance standards;
- The appraiser possesses the professional education requirements;
- The appraiser has previous experience in the subject of the location and type of the property which is being valuated;
- The Appraiser has personally inspected the property;
- The exclusion of the persons mentioned in the report no other person has contributed professionally to the preparation of this report;
- This report has been prepared further to the related provisions of the Capital Markets Regulation.

EXECUTIVE SUMMARY

OPEN ADRESS OF PROPERTY

Novotel ve İbis Otel, Kazlıçeşme mahallesi, Kennedy caddesi, No: 56. Zeytinburnu – İstanbul.

USE OF PROPERTY

4 star Novotel and 3 star ibis Otel.

TITLE DEED INFORMATION

The information on the title deed has been explained in details in the section "4.2.Title Deed Examination of the Real Estate.

ZONING STATUS

The information on the zoning status has been explained in details in the section "4.3 The Zoning Information of the Immovable Property".

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

SECTION 1

REPORT, COMPANY AND CUSTOMER INFORMATION

1.1 Report Date and Number

This report was issued by our company on 30.09.2011 and number 2011REV366 with reference to the request dated 06.09.2011 and made by the firm, titled as Akfen Gayrimenkul Yatırım Ortaklığı A.Ş.

1.2 Report Type

This report, is a valuation report prepared with the purpose of determining as of 30.09.2011 the fair market value in Turkish Liras of Novotel and ibis Otel located on the real estate property located on 1^{st} Area, Sahil Yolu location, in the Zeytinburnu district, Zeytinburnu neighborhood, of the province of Istanbul where the right of superficies has been established for 49 years.

1.3 People Issuing the Report

This appraisal report has been prepared at the end of necessary examinations carried out at the location of the real property and upon the information procured from the relevant individuals – institutions – establishments Mehmet ASLAN, real estate appraiser, and Fatih TOSUN, appraiser in charge of our Company, issued this report.

1.4 Appraisal Date

This appraisal report is prepared with reference to the studies started on 20 September 2011 and finished on 30 September 2011. Not only examinations conducted at real estate location, municipality and land registry but also office work is done during appraisal study.

1.5 Base Contract

This appraisal report was issued in accordance with the provisions of the base contract that was executed by and between Akfen Gayrimenkul Yatırım Ortaklığı A.Ş. and our Company on 07 September 2011 and has determined the rights and obligations of the contractual parties.

1.6 Factors Affecting the Appraisal Process Negatively

There is not any negative factor that affects and limits the appraisal process in general aspect.

1.7 Scope of Client Demands and Limitations

This real estate appraisal report has been prepared further to Akfen Gayrimenkul Yatırım Ortaklığı A.Ş request dated 06 September 2011, and in accordance with the provisions of the capital markets legislation in effect on the subject property.

1.8 The Information on the Last Three Appraisal Studies Performed by Our Company on the Subject Property of the Study on Previous Dates

1.9 Company's Information

Our Company was established with a capital amount of TRL 300.000.000.000 in order to engage in providing works and services described as Expertise and Appraisal according to the Articles of Association of the Company published in the Trade Registration Journal dated September 13, 2002 and issue no. 5676.

Our Company is taken on the lists of companies, which will offer appraisal services, within the framework of the Capital Market Board (SPK) legislation by the letter of SPK dated February 03, 2003 and no. KYD-66/001347, of Capital Market Board of the Prime Ministry.

1.10 Client Information

This appraisal report has been prepared for Akfen Gayrimenkul Yatirim Ortakliği A.Ş. located at the address of Büyükdere caddesi, No: 201, C Blok, Kat: 8, Levent/ İSTANBUL.

SECTION 2

DEFINITION AND SCOPE OF THE APPRAISAL

SECTION 2

DEFINITION AND SCOPE OF THE APPRAISAL

2.1 The Methods Used in the Appraisal

There are four different valuation methods, which can be utilized in our country. These are respectively, 'Sales Comparison Method', 'Income Capitalization Method', 'Cost Analysis Method' and the "Development Approach Method" methods. The expected prices and offers made can be considered.

2.1.1 Sales Comparison Approach

This sales comparison approach takes into account the sales of similar or substitute properties and the related market datas and realizes the appraisal based on a comparative transaction. In general the property, which is being evaluated, is compared with the sales of similar properties in the open market.

2.1.2 Income Capitalization Approach

This comparative approach takes into account the income and expense datas related to the property being evaluated and makes the appraisal with the reduction method. The reduction is related to the income converting the income amount to value appraisal and to the type of value. This transaction, takes into account product or discount rates or both. In general the principle of substitution with the income flow providing the highest investment income with a defined risk level is proportionate with the most probable value figure.

2.1.3 Cost Analysis Approach

In this method, the reconstruction cost of an existing building in the framework of the current economic conditions is considered as basis for a property valuation. In this respect, the main principle of the cost approach can be explained with the use value. The use value is described as 'Even if no one wants it and no one knows its price an asset has a real value'.

In this method, it is accepted that the real property has an important remaining economical life expectancy. For this reason, it is assumed that the property's value will decrease in time due to physical wear, as it becomes outmoded economically and functionally. In other words, it is accepted that the value of the building of an existing property will never be more than its reconstruction cost.

The building cost values of the property have been appraised by taking into account the Ministry of Public Works Construction unit costs, the technical specifications of the buildings, the materials used in the buildings, the construction costs of the buildings with same specifications constructed in the market, interviews with the contracting companies and costs calculated by us based on previous experiences.

The rate of depreciation in the buildings has been calculated by taking into account the table published in the Official Gazette indicating the depreciation in the buildings according to years and the visible state of the building.

It is accepted that the value of the property is consisting of two separate physical facts being the land and the buildings.

2.1.4 Development Approach Method

The purpose of an investment is to produce goods or services, to put them into the market and make profit consequently. The commercial profitability of the investment depends on

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

sufficient demand for the goods or services to be produced and their sales with the prices that would provide possibility to obtain the expected profitability. The examination of the project for the entrepreneur covers the examination and evaluation of the industry where the subject product of the project is positioned and the anticipations regarding the future. The evaluation of the market where the subject goods or services of the project are positioned can be examined as the current situation and the expectations for the future.

The expenses to be made in the case the project is constructed have been estimated, and another estimations has been held considering the marketing policies of the company and the generally feasibility principles. The income estimation of the project in the case of its development has been made, and assumptions have been held during this estimation. In these assumptions, the condition of the industry and the statistical figures of the similar projects near to the location of the project have been benefited from.

Later, the performance estimation of the project was made and its net value under today's conditions in the case it was constructed have been calculated from this performance estimation. The assumptions made in the study were partially explained while the details were kept reserved by the expert.

2.2 Analysis of the Methods Used for Appraisal

2.2.1 Definitions and Model of the Calculation Methodology

Risk Free Rate

The foreign exchange bonds secured by the state treasury and sold on offshore markets, also covering the risk of country are named as "Eurobond". They are issued with various maturities, while they can be purchased or sold on a daily basis on the market. These bonds are used as an indicator of the risk free rate, which is used as the basis for financial calculations in Turkey. The most liquid Eurobond on the markets is the Eurobond with maturity in 2030, and it has the attributes required to be an indicator bond.

Variant on the risk-free rate1

There have been 3 different approaches for calculating risk-free rate.

<u>Variant 1:</u> A short term government security rate is used as the risk free rate, and the historical premium earned by a broad equity market index over and above this security rate is used to estimate the expected return on the market. The cost of equity, thus obtained, is then used as the discount rate for each year's cash flows.

<u>Variant 2:</u> The current short term government security rate and the market's historical premium are used to calculate the cost of the equity for the first period (year). The forward rates built in to future time periods, which are used to calculate the cost of equity for future years.

<u>Variant 3:</u> The current long term government-bond rate (with the duration of the bond matched up to the duration of the asset) is used as the risk-free rate, and the historical premium earned by a broad market index above this long term government security rate is used to estimate the expected return on the market. The cost of equity, calculated using these inputs, is used as the discount rates each year's cash flows. Eurobond does not include the market risk for the performed work, although it includes the country and political risk.

REPORT DATE: 30.09.2011 *CONFIDENTIAL

10

REPORT NO: 2011REV366

¹ Damodaran on Valuation, Security Analysis for Investment and Corporate Finance, Section 3: Estimation of Discount Rates p.25

Variant 3 has been selected as the method in the assumptions our company has made by using all these data. However, especially when assessing the value of the real estates with long-term commercial lifetime, an asset appropriate for the commercial lifetime of the real estate does not exist. For this reason, our company estimates that the project-based evaluation and usage of the long-term Eurobond types within the scope of the risk-free yield rate allowances would be coherent with the allowances in the world. This rate also covers the country risk. In addition to hat, the rates suggested by Damodaran for use in accordance with its Financial Market Characteristics are as follows:

Financial Market Characteristics ²	Premium Cover Govt.Bond Rate
Emerging markets with political risk (South America, Eastern Europe)	8.5 % over govt. bond Rate
Developed Markets with limited listings (Western Europe, minus Germany and Switzerland)	4.5 - 5.5% over govt. bond rate
Developed Markets with limited listings and stable economies (Germany and Switzerland)	3.5 - 4% over govt. bond rate

Market Risk Premium- Market Index

The market index shall be constituted from data and risks such as the conditions of the market and competition in which the real estate, the place, commercial status of the real estate, and its comparison with similar other ones in the industry. Consequently, the market risk of a real estate with a lower performance will be higher.

The figures used in our studies consist of the data, which has been obtained as a result of criticizing our experiences arising from the shopping centre appraisal studies we have performed so far in various cities of Turkey.

Discount Rate (Risk Free Rate+ Market Risk Premium = Discount Rate)

A rate of return used to convert a monetary sum, payable or receivable in the future, into present value. Theoretically it should reflect the opportunity cost of capital, i.e., the rate of return the capital can earn if put to other uses having similar risk. Also called yield value.³

Discount rates contain all risk premiums. (Country risk, market risk...)

Discount rate is the sum of risk free rate and the market risk premium.

IAS 36 para. 48, states that "the discount rate (or rates) should be a pre-tax rate (or rates) that reflect (s) current market assessments of the time value of money and the risks specific to the asset. The discount rate (s) should not reflect risks for which future cash flow estimates have been adjusted." It is also true that other measures of income or cash flow may be used so long as the discount rate(s) are appropriately matched with the income flow(s).

REPORT DATE: 30.09.2011

*CONFIDENTIAL

² Damodaran on Valuation ,Security Analysis for Investment and Corporate Finance, Section 3 : Estimation of Discount Rates p.23

³ International Valuation Standarts, Sixth Edition, 2003, p.323 REPORT NO: 2011REV366

Overall Capitalization Rate

Income rate for a total real property interest that reflects the relationship between single year's net operating income and the total property price or value; used to convert net operating income into an indication of overall property value.4

Other point of view: The Capital Asset Pricing Model (CAPM) 5

CAPM model measures risk in terms of on diversifiable variance and relates expected returns to this risk measure. It is based upon several assumptions, that investors have homogeneous expectations about asset returns and variances, that they can borrow and lend at a risk-free rate, that all assets are marketable and perfectly divisible, that there are no transactions costs, and there are no restrictions on short sales. With these assumptions the non-diversifiable risk for any asset can be measured by the covariance of its returns with returns on a market index, which is defined to be asset's beta. If the beta for the equity in the company can be estimated, the cost of the equity will be the required return,

Cost of equity = R_f + Equity beta ($E(R_m)$ - R_f)

Where R f = Risk Free rate

E(R_m) Expected Return on the market index

Analysis Of The Methods Used In The Appraisal

CAPM Model has not been used within the scope of the appraisal study.

Discount rate: Calculated according to the total of Risk-Free Rate of Return and Risk Premium. The descriptions of the rates used in this total are as follows.

Risk-free rate of return has been identified according to the variable model 3 of the above article 8.2.2.1.1, and it has been identified with the average of last 6 months (the average is used for minimizing short-term market fluctuations) of the Eurobond with the longest maturity currently in effect. This rate includes the country risk.

Risk premium has been estimated according to the professional opinion of the appraiser in parallel to his/her experiences by taking into account the risks associated with the specifications of the project such as the region, sector, project, zoning, etc. as explained in article 8.2.2.

2.2.2 Project Development Approach

Project development approach is similar to income capitalization method; however, it is different in certain essential aspects. Income capitalization method appraises an existing project with available architectural design and license. Development method capitalizes revenues that maybe obtained from the most convenient project which may be developed according to the existing zoning status on a land without any actually available designs or licenses. In the development approach, which is used as the 2nd method in land appraisal, the land value is identified by calculating the revenues in the landlord's share from the project to be developed on the land.

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

⁴ The Appraisal of Real Estate, 12th Edition, Chapter 20, The Income Capitalization Approach, p. 489

⁵ Damodaran on Valuation, Security Analysis for Investment and Corporate Finance, Section 3: Estimation of Discount Rates p.21

When appraising an empty land with a definite project or with a project being constructed, the cash flow statement is created with income capitalization method according to the details of the already approved architectural design and building license. When appraising the empty lands, the appraiser determines the marketability/leasability of the land according to his own predictions in parallel to the valid zoning plan conditions, and creates the cash flow statement accordingly.

2.3 The Value Definitions

2.3.1 Fair Market Value (Market Value)

In the case of an real property changing hands between the buyer and the seller, at a specific date; it is the most plausible, cash exchange value of the property on the condition that the market conditions required for the sale are provided , the parties being willing and both parties are knowledgeable about the conditions related to the property. In this valuation study the validity of the following points are assumed:

- The buyer and seller are acting in a reasonable and sensible manner.
- The parties are knowledgeable concerning every matter related to the real estate and are acting in a manner to obtain the utmost benefit for themselves.
- A reasonable timeframe has been allowed for the sale of the real estate.
- The payment is being effected in cash or by similar instruments.
- The financing which may be required for the purchasing transaction of the real estate is being realized with the prevailing interest rates in the market.

2.3.2 Orderly Liquidation Value

It is the most likely sales value in cash for an interval of approximately 3 -6 months which is determined regarding the assets as a result of interviews and negotiations between the parties. In the orderly liquidation, the best value is tried to be obtained for each of the assets. If, within the determined timeframe, following the negotiations between the parties an agreement can not be reached regarding the price, it is advised to sell the assets by public auction.

2.3.3 Forced Liquidation Value

In an auction open to the public, it is the most probable cash value when the economic trends and the obligatory sales conditions are taken into consideration. In the obligatory liquidation, assets are sold as fast as possible. The acceptable time interval is in general less than 3 months

SECTION 3

GENERAL AND SPECIAL DATA

SECTION 3

GENERAL AND SPECIAL DATA

Data investigation starts with study of the prevailing trends in the international, national, regional or neighbourhood at the market level concerning the asset, which is subject to the evaluation. This research assists the appraiser to perceive the principles, powers and factors influencing the real estate values in that specific market environment. The research, at the same time provides the information related to the figures, the market trends and the clues. Whereas the general datas are datas related to the characteristics of the property to be evaluated and to the equivalent properties.

3.1 General Data-Social and Economic Data

3.1.1 Demographic Data

According to the 2008 Census through Address-Based Population Registry System, the population of Turkey was 71.517.100 and the population increased to 72.561.312 on 31 December 2009. In 2000-2007 period, the annual population increase was 0.59%; while the annual population increase of Turkey in 2008 appeared as 1.31%. The population of Turkey is 73.722.988 beginning from December 31, 2010. The population increase of Turkey in 2010 is 15,88‰.

In 2010 among the 81 provinces, the population of 53 populations increased and that of 28 populations decreased. The three provinces with lowest population increase rate are Tunceli (-79.69‰), Çankırı (-32.70‰) and Ardahan (-25.42‰). Among the 81 provinces, the first three with the highest population increase are Bilecik (109.22‰), Isparta (63.31‰) and Erzincan (53.23‰).

In Turkey, the urban population increases at a much higher speed than the rural population. The proportion of urban population of Turkey increased sharply in the last 17 years from 59% in 1990 to 64.9% in 2000 and 75,5% in 2009. This rate increased 76,3% in 2010. Urban population (the population in the centers of provinces and districts) is 56.222.356 while the rural population (population at subdistricts and villages) is 17.500.632. The province with highest urban population proportion is Istanbul with 99%, while that with the lowest is Ardahan with 32%.

18% of the country's population lives in Istanbul. 6.5% of the total population lives in Ankara, 5.4% in Izmir, 3.5% in Bursa and 2.8% in Adana. The five provinces with the lowest population are Bayburt, Tunceli, Ardahan, Kilis and Gümüşhane, respectively. The population of Bayburt, which has the lowest population, is 74.412.

The median age in Turkey is 29.2. The median age for males is 28.7 and that for females is 29.8. The median age of the urban population is 29.1 and that of rural population is 29.8. The population in 15-64 age group accounts for 67,2% of the total population. 25,6% of the country's population is in 0-14 age group and 7,2% is in the 65 and higher group.

The number of people per square kilometer, which is indicated as the density of population is 96 in overall Turkey, while it varies between 10 and 2.551 people among provinces. Istanbul has the highest population density with 2.551 people. It is respectively followed by Kocaeli with 432 people, Izmir with 329 people, Hatay with 254 people and Bursa with 250 people. The province with lowest population density is Tunceli with 10 people. In Konya -the province with the largest area- the population density is 52 people per sq km and the population density in Yalova –the province with the smallest area- is 241 people per sq km.

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

City	Population	Population (City Center)
Kocaeli	13.255.685	13.120.596
Ankara	4.771.716	4.641.256
İzmir	3.948.848	3.606.326
Bursa	2.605.495	2.308.574
Adana	2.085.225	1.836.432

3.1.2 Economic Data⁶

In Turkey, especially due to the economic growth and progresses in the real estate industry. beginning to obtain political stability, reduction of inflation to single-digit figures, and the developments related with the Mortgage law since 2005 have caused to the upward movement of real estate prices and to an investment boom.

In this period, when the real estate sector reached the peak level, the penetration of foreign investments was allowed and not only hot money but also fixed investments were received from foreign resources. The upwards acceleration has continued by the final quarter of 2006. Because 2007 was an election year, domestic and foreign investors waited for the results of the elections before giving their investment decisions, and after the elections they continued their investments upon foreseeing that political stability would continue.

Although it was thought that stability would continue as a result of increasing confidence in the country, foreign economic developments rather than domestic politics became more influential in early 2008, the experienced developments directly influenced the economy and a slow down was experienced in investments beginning from April 2008, and foreign investment rate of the previous years began to fall. On looking at the investments in 2008, it is observed that although certain regions reached saturation in residence and SHC sector, the investments in office and logistics sector continued.

The economic crisis, as the most important event of 2008, began as the subprime mortgage crisis in the US, and then it was thought as arising from liquidity shortage but understood in time that the actual problem arises from lack of confidence. The crisis showed itself with the bankruptcy of leading investment banks and insurance companies of the US in March and jumped to Europe in a short time. Although countries announced successive crisis-prevention packages, they could not stop the occurrences and global growth forecasts pointed minus

In this process, on looking at Turkey, although the low share allocated by the Turkish banking industry to housing loans abated the effects of the crisis, Turkey also began to be influenced from the global developments after the 3rd quarter of 2008. The increase in foreign exchange rates and the decrease in sales have also begun to be noticed in the real estate market. The stability of residence prices and demand has been replaced by a decrease tendency in parallel to the overall perspective. Real estate market has entered a stable period due to the increasing loan interests, postponement of investments and future forecasts.

In the end of 2008 and in the beginning of 2009, the economical crisis also began to be felt in the real sector of Turkey. In 2009, together with the economic shrinkage, decreases in industrial production and employment have been experienced. It is known that the real estate industry has spent 2009 with shrinkage and the prices continued to decrease while the demand remained lackluster.

REPORT DATE: 30.09.2011

⁶ TSKB Gayrimenkul Değerleme A.Ş. REPORT NO: 2011REV366

However, during early 2010, with the positive outlook in national economy and foreign markets, it has been observed that a sustainable development restarted and the impacts of the crisis abated with such positivity. With the stability of foreign currency prices throughout most of 2010, the continuity of the trend of rise in Kocaeli Stock Exchange starting from early 2010, and with the perception of referendum in September 2010 as a political stability, the positive atmosphere in the markets has been continuing. Within this process, in the real estate market, especially with the housing investments in Kocaeli's housing market that went one after the other, these investments in the market have received positive reactions and it has been observed that an intensive demand was directed at these projects.

National economic data is positive and there are many other potential investment areas across the country; general elections will be held in 2011 and in case the political and economic stability continues, parallel to the projections for 2011 and the following years, it is considered that with the developing economic demand and price stability in the real estate sector, the interest of domestic and foreign investors in Turkey will continue.

In addition to these, the fact that Turkey will economically be one of the fastest growing OECD countries from 2011 to 2017, with expected annual growth of 6.7% and that Turkey is the only OECD country with increasing growth rate after the economic crisis and the fact that it is one of the few countries with increased credit rating and a candidate for the best rating increase will also enable continuance of the positive outlook of Turkey in international markets.

3.1.3 Sector Analysis

3.1.3.1 Tourism Industry

The tourism sector is one of the fastest developing and growing sectors worldwide. As boundaries disappear, the world got smaller, and people now have a tendency to travel to destinations that are farther away. The main reasons for this can be listed as the increase of the share of disposal personal income reserved for tourism and holidays, the fast development of transportation and communication technologies, and the desire of the people to visit new areas they have not seen until now, and they wonder about.

Due to the diverse structure of tourism, it covers, on one hand, activities such as accommodation, planning, travel organizations, and sales, called typical tourist activities, and also other activities such as transportation and car rentals, which do not only depend on tourist consumption, but used by them as well. Tourism is an important sector that constitutes a significant portion of the present day gross natural product worldwide. This dynamic sector continues to grow despite the economic stagnation worldwide, and has a function of driving the other industries as well.

In addition to its contributions to the national income, through the foreign exchange revenues provided, it plays an important role in closing the payments balance deficit. As a result of offering employment for masses, the tourism sector is one of the sectors with the highest concentration on employment, and also it is an effective marketing and advertising means for the country.

3.1.3.1.1 World Tourism

The center of gravity for the world tourism is Europe, where our country is also located. After Europe, the most important share belongs to the East and the Asian/Pacific region. Other than these two regions, the third region with the highest share is South and North America. From this, it can be said that the tourism of world economy is concentrated in the three regions which are developed economically, and with high levels.

While the World Tourism Organization (UNWTO) has indicated that the world tourism realized a growth of 7% in 2010, it has stated that 935 million individuals had travelled to different countries. In the report indicating that 913 million persons had travelled internationally in 2008 which was the before crisis period it was also stated that this figure was surpassed by 22 million in 2010.

While the Asia took the lead in the recovery of international tourism activities, Asian tourism displayed a growth of 13 percent in 2010. As a consequence the number of travelers to Asia rose to 204 million in 2010 from 181 million people in 2009. The African continent experienced a growth of 6 percent with the effect of the World Cup which was held in South Africa. The Middle East was amongst the areas displaying a major increase with a 10 percent growth rate.

According to the UNWTO report, although disruptions were experienced in the tourism activities because of the volcanic eruption of the Eyjafjallajokull Volcano in Iceland, Europe has succeeded to finish 2010 with a 3 percent growth (471 million people). The tourism activity in North and South America also achieved an increase of 8 percent. As a consequence, 181 million people in total have travelled in the American continent.

The World Tourism Organization has declared that there was also a serious increase in tourism expenditures in 2010 with tourism activities. Accordingly, tourism expenditures rose by 17 percent in China, by 26 in the Russian Federation, by 28 percent in Saudi Arabia and by 52 percent in Brazil. In the World Tourism Organization report, the growth foreseen for the year of 2011 was in the range of 4-5 percent.

Experts estimate that in the coming years China shall surpass USA and become the third largest tourism country of the world and that it will become the most important tourism destination of the world by 2020. Indicating that China is the fourth largest tourism destination country in the world after France, Spain and the USA, it is stated that last year 49 million 600 thousand tourists have visited China. With its rapidly developing economy it is expected that in addition to attracting foreign visitors China is expected to send 1 million tourists abroad in the year 2020.

3.1.3.1.2 Tourism Industry in Turkey

The highest competitive edge of Turkey is in the tourism industry. Tourism is a key industry not just for solving the current account deficit issue, but also for increasing the employment, making Turkey a more livable place, and even promoting the country. Tourism has become the second highest foreign exchange providing sector to Turkey after exports; and it directly influences nearly 40 sectors in the industry.

T.C. Culture and Tourism Ministry had prepared the action plan by 2023, thought to be the development of tourism investments are seen as a graphical map below.

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

Market Players

In Turkey, there are certain local hotels which perform their own management such as Dedeman, Divan, The Marmara, Princess Hotels, and Swiss Hotel. The hotels are generally managed by their own hotel groups and any outside hotel management company is not assigned for the management of the hotel. The management of the hotels is generally based on 10-20 years contracts between the landlords and the management companies, and these agreements may be extended upon the parties' requests. The agreements are generally based on the gross income or net operating profit. However, some landlords may request a fixed annual fee regardless of the turnover. Apart from them, the foreign hotel management groups in Turkey are as follows.

Marriott (USA): Serves for hotel management in Turkey. Following Renaissance and Ritz Carlton hotels serving in Turkey, Marriott International Inc, opened its Marriott Asia Hotel. With more than 2,800 establishments, a prestigious and leading company in the accommodation sector of the USA and 67 countries, Marriott International Inc. has 151,000 global employees, and manages 15 hotel brands with 550,000 rooms capacity.

The number of hotels of the firm in Istanbul reached to 4 with Marriott Asyo Hotel. 3 of these hotels are located in the European Side and 1 in Anatolian Side.

Hochtief (Germany): Serves for hotel management in Turkey. They established a Facility Management Services (FMS) in 50% partnership with Silkar Holding.

Hyatt (America): Provides services in Hotel Management in Turkey. It carries out management of Hyatt Regency in Istanbul. Some of the hotels of this firm in Istanbul are Park Hyatt Istanbul Maçka Palas, Hotel Hyatt Regency.

Hilton (America): Provides services in Hotel Management in Turkey. They carry out management of hotels that belong to Hilton family group. This firm has 8 hotels throughout Turkey and 2 of the hotels are located in the European Side.

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

Kempinski (Germany): They provide services in Hotel Management in Turkey. They carry out management of hotels that belong to Kempinski group. Çırağan Palace Kempinsky Istanbul managed by the firm in Istanbul European Side is the only investment in Istanbul.

Mövenpick (Switzerland): They provide services in Hotel Management in Turkey. They carry out management of hotels that belong to Mövenpick group. One of the three investments of the firm in Turkey is located in Istanbul European Side.

Four Seasons (America): Provides services in Hotel Management in Turkey. They carry out management of hotels that belong to Four Seasons Hotels group. The firm has two hotel investments in Turkey that are Four Seasons Bosphorus and Four Seasons Sultanahmet.

Barcelo (Spain): Serves for hotel management in Turkey. Manages the hotels of Barcelo group. They have Ora Hiladay, Barcelo Rexene (Bodrum) and Barcelo Eresin Topkapı hotels in Turkey.

Carlson (USA): Serves for hotel management in Turkey. Manages the hotels of Carlson group. Radisson, Country Inss, Park Plaza, Park Inn and Regent hotels are included under the body of Carlson group.

Inter Continental Hotel Groups (USA): Serves for hotel management in Turkey. The company manages hotels of Inter Continental Hotel Groups in Turkey. Inter Continental, Crowne Plaza, Hotel Indigo, Holiday Inn, Holiday Inn Express, Staybridge Suites and Candlewood Suites hotels are included under the body of Inter Continental Hotel Groups.

Accor (France): They provide services in Hotel Management in Turkey. They carry out management of hotels that belong to Accor group. They cooperate with Akfen GYO in Turkey and produce hotel projects. The firm is leading in Europe and 3rd largest hotel management firm in the world.

The leading hotel investment groups in the sector are stated here below.

Divan: Divan Hotels Chain owned by Koç Group is among the domestic hotel investors serving in Turkey. The chain has totally 7 hotels in Turkey: Istanbul, Istanbul City, Istanbul Asia, Ankara, Antalya, Bodrum and Çorlu.

Dedeman: Dedeman Hotels, forthcoming with hotel investments in Turkey and abroad, have 17 domestic hotels, two of which are currently in the construction stage. Their hotels in Turkey can be listed as Dedeman Istanbul, Dedeman Bostancı, Dedeman Şile, Dedeman Zonguldak, Dedeman Bodrum, Dedeman Antalya, Dedeman Kapadokya, Dedeman Ankara, Dedeman Konya, Dedeman Şanlı Urfa, Dedeman Gaziantep, Dedeman Diyarbakır, Dedeman Erzurum, and Dedeman Rize.

Titanic: Titanic Hotels Chain owned by AYG Group can be considered among the leading hotel chains in Turkey. With totally 5 hotels in Turkey, the members of Titanic Hotels chain can be listed as; De Luxe Antalya, Istanbul Bussines, City İstanbul Taksim, Port İstanbul Bakırköy, and Comfort İstanbul Şişli.

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

3.2 Special Data - Analysis of the Area Where the Property is Located

3.2.1 İstanbul Province

Istanbul is located on the 280 01' and 290 55' eastern longitudes, and 410 33' and 400 28' northern latitudes. Istanbul Strait merges the Black Sea with the Marmara Sea; while it also separates Asia from Europe and divides Istanbul into two.

Istanbul acts as a bridge between the continents of Europe and Asia, and it is built on the two tips that the continents most approach each other, on 5.512 square kilometre area. These tips are surrounded by Catalca on the European side, Kocaeli on the Anatolian side; Marmara and Bursa on the south, Tekirdağ on the southwest and Kırklareli on the northwest. The Princes' Islands in the Marmara Sea are also included in Istanbul province.

The districts of Istanbul province are; Adalar, Avcılar, Bahçelievler, Bakırköy, Bağcılar, Bayrampaşa, Beşiktaş, Beykoz, Beyoğlu, Eminönü, Eyüp, Fatih, Gaziosmanpaşa, Güngören, Kadıköy, Kağıthane, Kartal, Kocasinan, Küçükçekmece, Maltepe, Pendik, Sarıyer, Sultanbeyli, Şişli, Tuzla, Ümraniye, Üsküdar, Zeytinburnu, Büyükçekmece, Çatalca, Silivri and Şile. Istanbul International Ataturk Airport is 20 km away from the city centre. Besides, it is also possible to rent an airplane or helicopter in Istanbul.

Istanbul accounts for 9.7% of the total area of Turkey, and it is the most important province of the country in terms of its population. According to Year 2010 General Census, total population of Istanbul is 13,255,685. The annual population increase rate is 0.331%.

Istanbul is located on Kocaeli and Çatalca Peninsulas. Both of these peninsulas are two worn tablelands. The landscape of Istanbul resembles to the landscape under the Mediterranean climate. Lemur is the most observed plant type in the region. These plants acclimatized to a long and dry summer season. However, due to the characteristics of the climate, the hills are not bare. The most important one of the forest areas in patches is the Belgrade Forest 20 km on the north of the city centre.

The biggest stream in Istanbul is Riva Stream, which is also the biggest stream of Kocaeli Peninsula. The most important streams that flow into Istanbul Strait are Küçüksu and Göksu streams. Apart from them, there are also Kağıthane and Alibey Streams flowing into the Golden Gate, Sazlıdere flowing into Küçükçekmece Lake, Karasu Stream flowing into Büyükçekmece Lake, Trança Stream flowing into Terkos Lake as the major streams of Istanbul province. In the province, there are three small but important lakes. All three of them are on the European side. The water of Terkos Lake, which is away from the sea, is fresh. The city

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

water is provided from that lake. The water of Küçükçekmece (11 ksqm) and Büyükçekmece (16 ksqm) lakes are salty because they contact with the sea.

Summer months are generally hot and the winters are not very cold in Istanbul due the weather systems influential in the province. Although Istanbul seems like showing the properties of the Mediterranean climate, it has a different climate due to the effect of the Marmara Sea and the Istanbul Strait. In winter months, it is under the influence of the colddry air mass from the Black Sea and the cold and rainy air mass from the Balkans, and especially the warm and rainy air mass from the Mediterranean. In the entire province, the cold and rainy (with northeast wind) weather of the Black Sea and the warm (with southwest wind) Mediterranean weather follow each other. In the province, major heat differences are not observed between summer and winter or day and night.

From the economic terms, Istanbul is one of the most developed cities in Turkey. It is one of the most important sources if tourism, industry and commerce economy. Although most of the industrial organizations have been moved outside of the province, the province still maintains its importance in terms of the manufacturing industry. The actual development with regard to the manufacturing industry of Istanbul began after the foundation of the Republic in 1923. The accelerating capital accumulation and the support provided to the private industry after 1950s enabled Istanbul to become a leading city in terms of industry and commerce.

Istanbul has become one of the most appealing tourism centres of Turkey with its natural beauty, rich cultural assets, and its developments with regard to transportation and accommodation. Most of the foreign tourists first land in Istanbul for their visits to Turkey.

3.2.2 Zeytinburnu District

Fatih is in the East of the administrative district of Zeytinburnu which is surrounded by the Marmara Sea from the south, Eyüp at its North East, Bayrampaşa at its North, Esenler at its Northwest, while the districts of Bakırköy and Güngören are in its West. The district's territory boundaries are determined by Çırpıcı River at the west, and by land ramparts separating Zeytinburnu from the historical peninsula in the East. Whereas the coastline of Zeytinburnu starts around Yedikule gate and extends to the lands of Bakırköy district. The length of this section is about 2600 m in average.

The district of Zeytinburnu is at a distance of 15-20 minutes to the airport. The lands of the district are located at the longitude of 29 degrees East and the latitude of 41 degrees North. At these latitude and longitude degrees, it stretches approximately on an area of 11.16 km² with its almost rectangular shape. According to the Address Based Population Registration System of 2010 the total population of Zeytinburnu has been indicated as 292.430.

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

*CONFIDENTIAL

The average elevation from sea level of the district's lands is 30-35 m. Any obstacle does not exist from the seaside inwards. The eastern section of the districts slants slightly upwards from the Marmara Sea to the North. This elevation reaches 51 m in the Neighborhood of Maltepe. Its southern section appears as flat lowland from Yedikule to the Sümerbank factory in Yenimahalle. The lands of the district which were formerly covered with brushwood as vegetation have now become a settlement and industry area.

The coastal road of Sirkeci-Florya passes from the south of the district, the international E-5 Motorway connecting the continents of Asia and Europe also passes through the district's boundaries. The length of the State Highway is 5 km., The length of the Provincial Road is 3 km. While the length of the international highway 3 km. The railway connecting Istanbul to Europe passes from the South of the district. The total length of the railroad is 2770 m.

Zeytinburnu is one of the places with the most colorful lifestyle of Istanbul. It is possible to go to Zeytinburnu by traditional mass transport vehicles such as either autobus or minibus, as well as by light metro and railway transport system.

The district has very advantageous conditions regarding shopping. Regarded as the leather center of Turkey, Zeytinburnu is a spot which is marketing at the cheapest price leather which has also played an important role in its development. Furthermore, Zeytinburnu, is in a very important position with its many textile suppliers where you can buy their products at first hand as well as with Olivium shopping center where factory stores of major trademarks are available.

Zeytinburnu is one of the most productive districts of Turkey with almost 25.000 business places, about 10.000 manufacturing plants and 170 factories. Textile, leather and iron and steel are leading business lines in Zeytinburnu which contributes largely to the country's revenues with values it has created with its many sectors. Located in the North of the district, Maltepe Neighborhood is a full-fledged production centre with its 170 large industrial establishments, almost 10 thousand manufacturing places and workplaces as well as with almost 70 thousand employees. Its contributions to the country's economy cannot be denied; many large enterprises such as Ülker, Şişe Cam, İbrahim Ethem Pharmaceutical Plant, Hoechst, Mercedes Benz, Derimod, Yeşil Kundura, Karaca, Mavi Jeans are located there. The automotive sector is one of the vital points of the Cevizlibağ area.

In addition to Demirciler Sitesi (Blacksmiths' Site) which has the largest market share of the country as well as the nearby geography in the Iron-Steel sector and Nakliyeciler Sitesi (Forwarding Agents' Site) are conglomerations which are increasing the importance of the district in the business world.

TITLE DEED AND ZONING INFORMATION OF THE REAL ESTATE

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

*CONFIDENTIAL

SECTION 4

TITLE DEED AND ZONING INFORMATION OF THE REAL ESTATE

4.1 Title Deed Information of the Real Estate

Province	:	İstanbul
District	:	Zeytinburnu
Quarter	:	1. Bölge
Subdistrict	:	Zeytinburnu
Village	:	-
Street	:	-
Locality	:	Sahilyolu
Plot No	:	85/1
Section	:	774
Parcel	:	55
Quality	:	Right of superficies for forty-nine years on the parcel fifty-five, block seven hundred seventy four, on page six hundred four.
Area	:	11.720,00 sqm
Owner	:	Akfen Gayrimenkul Yatırım Ortaklığı Anonim Şirketi

4.2 Title Deed Examination of the Real Estate

The investigation of the appraisal commission on the title deed records of the property under appraisal, is conducted for purposes of the determination of the rights that constitute the ownership of the property under appraisal, and the limitations imposed on such rights.

The following rights and limitations have been identified on the appraised property according to the letter of encumbrances obtained from the Land Registry Directorate of Zeytinburnu District, İstanbul Province on 27 September 2011.

In the Easement Rights Section

• The individual and continuous easement right on the property was registered for Akfen Gayrimenkul Yatırım Ortaklığı A.Ş. for 49 years on page no. 610. (dated 04 December 2003 and journal no. 6650)

In Declarations Section

 As noted in the contract table dated 03 September 2008 and journal no. 11096, the official title deed change regarding the easement right was realized. (dated 03 September 2008 and journal no. 11096)

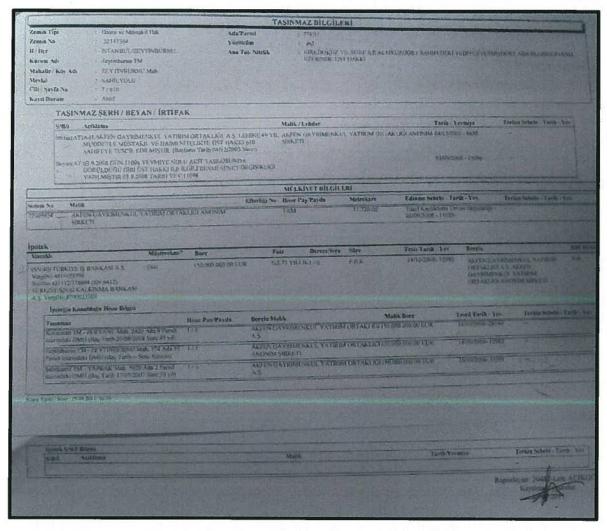

Collaterals

 There is a hypothecation registration dated 14 October 2008 and journal entry no. 12982 in favor of Türkiye İş Bankası A.Ş. and Türkiye Sınai Kalkınma Bankası A.Ş. for the amount of 150.000.000 Euros.

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011 *CONFIDENTIAL

4.2.1 The Buying and Selling Transactions for the Property in the Last Three-Year Period, If Any

A purchase or sale transaction concerning the real estate property subject to valuation has not occurred in the last three years' period. The written encumbrance document related to the real estate property is presented in the enclosure of the report. Furthermore the encumbrance document belonging to the same real estate property is available in the report's enclosure. In addition, the certificates of encumbrances dated 03 January 2011, 22 February 2011 and 27 September 2011 on the same property are appended.

4.3 The Zoning Information for the Real Estate

The zoning regulations regulate the utilization of the land and the density of its development. The appraisal export should also consider all possible changes expected in the up-to-date regulation and specifications during his inspection on the zoning and construction regulations. Zoning plans define the general purposes of use such as housing, commerce and industry, and identify the density of construction that is to be performed further to the relevant purposes of use.

According to the information obtained as a result of the inspection at Istanbul Province, Zeytinburnu Municipality Engineering Department on 20 September 2011, the data of the subject parcel are listed as follows:

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

*CONFIDENTIAL

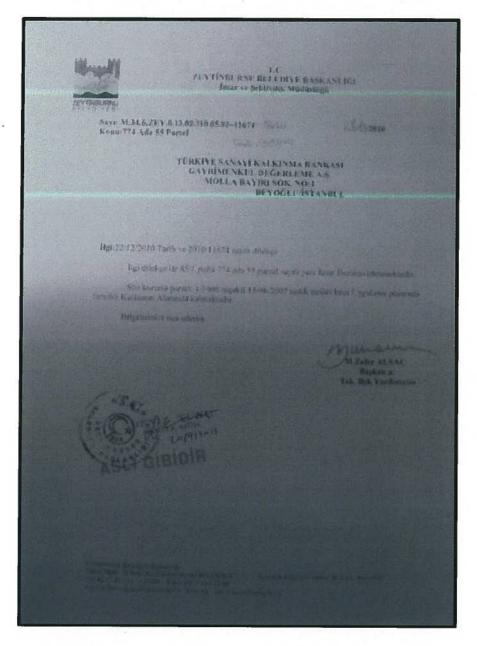

39

✓ Zoning Situation:

The parcel subject to valuation remains in the "Preferred Utilization Area" in the plan approved at the date of 15 June 2007 by the Provincial Directorate of Culture and Tourism. In the plan, construction conditions are stated as;

- Construction equivalent 2,50 (for Tourism Facilities),
- Hmax= 117 m.,
- Application shall be made according to the preliminary project and approval shall be given by the Metropolitan Municipality.

✓ Licenses and Permits:

There is a "Building License" dated 06 Jnuary 2005 and no 2004/6254 for totally 26.372 sqm area.

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

*CONFIDENTIAL 40

- There is a "Building Use Permit" for 26.372 sqm area dated 23 February 2007 and no. 2007/1544.*
- There is an "Approved Architectural Design" dated 06 Januarry 2005 for the property.

License – Occupancy Permit Date/No	Reason of Issue	Area(sqm)
06.01.2005 - 2004/6254 (Building Licence)	Otel	26.372,00
23.02.2007 – 2007/1544 (Building Use Permit)	Otel	26.372,00
06.01.2005 (Approved Architectural Design)	Otel	-

^{*}Any differences have not been observed between the actual status and legal status during the onsite inspections of the mentioned property. The existing structure is compliant to the "Building Use Permit" dated 23 February 2007.

✓ Building Supervision:

Building supervision of the property is performed by Birikim Yapı Denetim Ltd. Şti. located İncirli Caddesi Toprak Apt. No:37 Kat-2 Bakırköy/İSTANBUL.

4.3.1 Information Regarding the Changes in the Legal Status of the Property in the Last Three Years (Changes in the Zoning Plan, Expropriation Procedures, etc.)

According to research made in Zeytinburnu Municipality Contruction Manager and document provided by the customer – given as attachment – there is not a change in the zoning status of the property in last three years. Zoning status certificates of the property dated 28 December 2010 and 02 March 2011 are appended.

4.4 Opinions About the Property, the Property Project or the Rights and Benefits Associated with the Property in line with the Capital Market Regulations

Because the existing mortgage on the title log of the property was established for financing the project, it is believed that there are not any obstacles for the inclusion of the property in REIT portfolio with respect to the mortgage, and as the type allocation of the hotel with easement right on the appraised land was completed, its inclusion in the REIT portfolio is possible according to the provisions of the Capital Market Regulations, in our opinion.

4.5 Civil Liability

On the appraised property, there is a mortgage as, "Mortgage: Türkiye İş Bank Türkiye Sınai Kalkınma (Industrial Development) Bank, € 150,000,000.00 amount, 1st rank, 3.75% interest. It has been identified that the encumbrance (dated 14 October 2008 and journal no. 12982= was issued for project financing. The official letter regarding the mentioned mortgage is annexed herein.

4.6 Environmental and Ground Contamination

Ground research and ground contamination work at the real estate are in the professional limits of the field of "Environmental Geophysics".

A detailed research in this field was not done as our company does not have expertise in this field. However, the real estate was observed to have no negative impacts on the environment during the on-site observations. Thus, the appraisal was done assuming that there was no negative impact on the environment.

SECTION 5

PHYSICAL INFORMATION OF THE REAL ESTATE

SECTION 5

PHYSICAL INFORMATION OF THE REAL ESTATE

5.1 Situation, Position and Environmental Features of the Real Estate

Open address of the property: Novotel ve İbis Otel, Kazlıçeşme mahallesi, Kennedy caddesi, No: 56, Zeytinburnu - İstanbul

The real estate property related to the valuation study is located in the province of Istanbul within the boundaries of Zeytinburnu district. On the parcel with 11.720 square meters surface area, the 4-stars Novotel and 3-stars ibis Otel are located. The real estate property subject to valuation is positioned with their façade to the Kennedy Avenue which is also known as "Costal road-Sahil Yolu".

To reach the subject real estate property from Eminönü, the Coastal Road is taken. Advance straight without turning to any direction towards Yenikapı Hydrofoil landing place. After advancing for 7,5 km. from Sirkeci, the subject real estate property is positioned with its façade to the right hand side of the avenue before arriving to Bakırköy. Ibis Hotel is located at the East side of the parcel and Novotel is at the West side and both hotels have panoramic sea view. In the vicinity of the real estate property; Toyota Derindere authorized technical service building, Yenikapı İDO landing place, World Trade Center, Istanbul Ataturk Airport, Galleria Shopping Center, Bakırköy Hydrofoil landing place as well as buildings of commercial and residential nature.

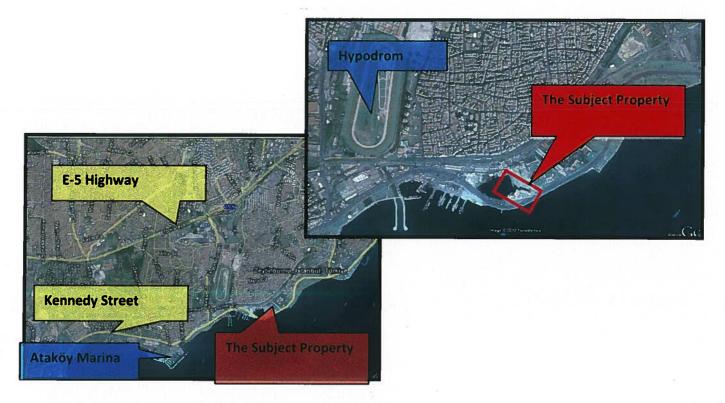

The real estate property is at an air distance of approximately 6,5 km. to Istanbul Yeşilköy Ataturk Airport. The subject hotels' being so near to the airport, their having a panoramic sea view and having their façades directly to the coastal road are positive advantageous factors. On the real estate property owned by the Treasury of the Ministry of Finance, rights of superficies for 49 years in favor of Akfen GYO A.Ş. have been established. Subsequently, Akfen GYO A.Ş. with a lease contract which has been signed has transferred the administration of the hotels to the French Accor Tamaris Turizm A.Ş.

The real estate property is approximately at 2,7 km. air distance to D100 (E5), at 7,5 km. to Eminönü, approximately at 29 km. air distance to Büyükçekmece. Transportation to the real estate property is possible by public and private vehicles.

The distance of the appraised property to certain points is as follows:

LOCATION	DISTANCE
D100 (E5) Highway	2,7 km.
Atatürk Airport	6,5 km.
Eminönü	7,5 km.
Büyükçekmece	29 km.

5.2 Current Status Of The Real Estate

The real estate properties subject to valuation are Novotel and Ibis Hotel positioned with their façade to Kennedy Avenue (coastal road), in the neighborhood of Kazlıçeşme, district of Zeytinburnu in the province of Istanbul. Ibis Hotel is located at the East façade of the parcel, while Novotel is at the western façade; both hotels have panoramic sea view.

The parcel where the hotels subject to valuation are positioned is under the ownership of the Treasury. According to the agreement on the right of superficies signed between the Treasury and Akfen GYO A.Ş. the right of superficies has been given in favor of Akfen GYO A.Ş until the date of 18 November 2051. Whereas Akfen GYO A.Ş. having bare ownership has leased the subject parcel together with the hotels it has built on it to the French Accor Tamaris Turizm A.Ş. for a duration of 25 years with five years' option.

Novotel which is located on the parcel subject to valuation consists of 2 basement floors+ ground floor + 12 floors. The part of 10.901 square meters of the hotel having a total covered area of 16.649 square meters is the area included in the equivalent. At Novotel, there is a parking garage at the 2nd basement, a parking garage, management offices, laundry, dining hall, technical and installation spaces at the 1st basement, the lobby, restaurant, meeting halls, lounge area, kitchen, business center at the ground floor, fitness center, sauna, steam bath, rest room, 4 massage halls at the 1st normal floor while at the remaining floors bedrooms are available. Ibis Hotel which is located on the parcel subject to valuation consists of 2 basement floors+ ground floor+ 7 floors. From the total covered area of 9.723 square meters of the hotel a section of 6.461 square meters is included to the equivalent. At Ibis Hotel at the 2nd basement floor a parking garage, at the 1st basement floor a parking garage, technical and installation spaces, at the ground floor, the lobby, restaurant, kitchen and rooms, while at other floors bedrooms are available. At Novotel, there are 160 standard rooms, 38 communicating rooms, 4 rooms for the disabled, 6 suites, in total 208 rooms. While at Ibis Hotel 18 sofa bed, 42 desk bed, 45 twins, 6 VIP's, 4 rooms for the disabled, 113 standard rooms in total 228 rooms are available. In addition an outdoor swimming pool is available at Novotel.

In the rooms, air conditioning, mini bar, internet computer connection, satellite television channels, direct telephone, mini refrigerator, cattle, tea-coffee set-up, hair dryer, fire alarm system, sound-announcement system, electronic door lock system, private safe box, 24 hours room service and dry cleaning service are available. Furthermore at Novotel, a fitness center, sauna, massage parlors and 1 outdoor swimming pool are at the service of the customers.

SECTION 6

THE HIGHEST AND THE BEST USE ANALYSIS

SECTION 6

THE HIGHEST AND THE BEST USE ANALYSIS

It is the use, which is physically the most appropriate to the building, permitted by the laws, financially executable and providing the highest revenue is the most efficient use. The factors defining the highest and best use contain the answer to the following questions.

- Is the use reasonable and probable?
- Is the use legal and is there a possibility to obtain a legal right for the use?
- Is the property physically fit for use or can it be made fit?
- Is the proposed use financially executable?
- The efficient, highest and best use chosen from the use forms passing the initial four questions is indeed the most productive use of the land.

The zoning plans, which are the most defining factors of the real estate sector legally and technically have not, in our country, shown a development parallel to the economic development and due to this lack of revision have a static appearance. As a natural result of the negative structure unwanted cases such as failure to bring into execution phase the optimum alternative—which could provide financially and technically the highest efficiency and in addition to that which had obtained financing can occur quit often in our sector. In other words, in the conditions prevailing in our country the best project is not only the option providing the highest return and the most perfect technical results, but also the project which can meet the requirements of the laws and regulations.

The zoning plans in our country cannot keep up with the speed of urbanization and remain somewhat static. This situation is causing the legal prohibition of the use of a property in the best possible implementable levels and generation of the highest proceeds by an immovable property that has been appraised. As a consequence, any use that is not allowed by the laws and not possible physically may not be accepted as the optimal use.

Because the property is located on a very important transportation axis, and a hotel requirement is expected in Istanbul in the future, and considering that the property is currently operated as an active hotel, the actual use is considered as the highest and best use.

SECTION 7 FACTORS THAT AFFECT THE VALUE OF THE REAL PROPERTY

SECTION 7

FACTORS THAT AFFECT THE VALUE OF THE REAL PROPERTY

7.1 Factors That Affect The Value Of The Real Property

	STRENGTH	WEAKNESS
1	The real estate property is located so close to the Atatürk Airport	
/	The real estate property having a panoramic sea view,	
V	The transportation facilities being easily available as the property is located with its façade to the coastal road,	y.
*	The hotels subject to valuation being operated under a brand name providing same standards everywhere throughout the world,	x The negative effect on transportation of the coastal road's traffic becoming dense from time to time.
\	Their being business hotels located on the route to the airport,	
 	The car park capacity being sufficient to meet the needs of large hotels,	
*	The property being in a close position to the E-5 Motorway and TEM motorway in addition to the coastal road,	
✓	Buildings well recognized being located in the vicinity of the property	
	OPPORTUNITIES	THREATS
*	Istanbul's need for hotels expected to increase in the coming years.	The economic developments in the world and in our country are influencing the real estate sector adversely, as is also the case in the other sectors.

7.2. The Analysis of methods Used in the Appraisal

In this section of the study, development approach and sales comparison method are used for the value of the real estate.

7.2.1. Equivalent Comparison Approach Analysis

Upon the investigations made in the close vicinity of the immovable property, the following equivalent information that may present equivalence to the aforementioned immovable property has been received.

- During the inspections at Zeytinburnu Municipality Real Estate Service for the appraised property, the real estate market rate of the property in question was identified as TL 5,192.50/sqm for 2010. (TL 5,192.50/sqm).
- In Zeytinburnu, on the coast road, 73,000 sqm land with 2.50 FAR and "Tourism-Area" zoning was tendered, and the mentioned land was purchased by T.O.B.B (Union of Chambers and Commodity Exchanges of Turkey) as a result of the auction at TL 392,000,000 (TL 5.370/sqm, €2,134/sqm).

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

*CONFIDENTIAL

53

- In the same zone, 15,500 sqm land at section 774 and no. 52 was tendered, and it was bought by the Ottoman Fund company through auction at TL 87,000,000. (TL 5,594/ sqm, €2,223/sqm).
- In Zeytinburnu Kazlıçeşme, near to the coast, 4,000 sqm commercially-zoned land is for sale at TL 20,000,000. (TL 5,000/sqm, € 1,987/sqm).
- On Kennedy Street, at Ataköy locality, 11,950.72 sqm parcel was sold at TL 65,750,000 through a tender in December 2009. (TL 5,502/sqm, € 2,187/sqm).
- At Ataköy coast road, 124,980 sqm land owned by TOKİ, was offered for sale in 2008 at TL 650,000,000 appraisal value, and it was sold at TL 850,000,000. 68,000 sqm of the property's 124,980 sqm land area is green space, and it will be in the public use, while the remaining approximately 56,980 sqm land can be used for hotel, marina, yacht club, shopping facilities, restaurant, convention, health and entertainment facility constructions. The construction area at the land has been identified as 249,960 sqm.

(Estimated sales figure: €2,574/sqm, TL 5,200/sqm, Tender sales figure €3,366/sqm, TL 6,801/m)

(At the time the land was sold, the exchange rate was nearly TL 1.25 and the Euro rate was TL 2.02).

✓ Professional Opinion of the Appraisal Expert:

Taking into consideration the position of the ground plot subject to valuation, transportation availabilities, the presence of a well-known prestigious facility on it, right of superficies established on the real estate property and assuming that it has not any legal problem, taking into account the imputed values of property obtained from the vicinity, the land value has been assessed as 2.550 €/sqm.

VALUE OF THE RIGHT	OF CONSTRU	ICTION		
1 sqm Land Value (*)	1.484	Euro/sqm		
Size of the land	11.720,00	sqm		
Total Value of the Land	17.392.480	Euro/ sqm	17.392.480	Euro
			43.754.262	TRY

^(*)For the land, unit value is calculated as 70% as the value of 49-year construction right considering **2.550** Euro unit value for lands zoned as tourism area.

Land Value Calculation Detail = (Value of the zoned land x 49 year construction right factor x term rate)

- = 2.550 (Euro/sqm) x 0.70 x 42/49
- = 1.484 (Euro/sqm)

7.2.2 Construction Cost Analyse

In this analysis the building cost values have been evaluated with cost formation approach; the technical features of the buildings, materials used in the buildings, by taking into consideration the construction costs of buildings constructed with same features in the market as well as based on our past experiences. The depreciation of the buildings has been assessed on the basis of the experience of the valuation expert by taking into consideration the visible physical situation of the building.

7.2.3 Revenue Reduction Method

The second method used is the "Revenue Reduction Method" within the appraisal process.

Hotel Assumptions

The income projection has been prepared with the assumption that the property is run in its current situation. The average room rate, average occupancy rate and other revenue items of the income projection have been estimated according to the actual situation data provided by the company.

- The right of superficies of the hotel which is being evaluated is under the property of Akfen Gayrimenkul Yatırım Ortaklığı A.Ş. and is being operated Accor group which is an international hotel operation group. It's being operated by an international trade name provides a positive effect on the items which affect its potential such as the occupancy rates, the potential of the bed/room price of the hotel. In the study, the capacity of the hotel in the coming years has been foreseen with the assumption that the current operation potential shall continue.
- Cash flows obtained from the operation of the property over the years of operation used in the income reduction method is formed by the total of the cash flows obtained by Akfen Gayrimenkul Yatırım Ortaklığı A.Ş. and Accor group.
- The valuation study has been made according to the current capacity of the hotels. For the following years, it was foreseen that the hotels shall be;
 - > Operated as Four Stars Novotel and Three Stars ibis Hotel,
 - ➤ It was foreseen that Novotel shall have a capacity of 208 rooms, 416 beds, ibis Otel of 228 rooms, 456 beds.
 - > It was assumed that they will operate 365 days per year.
 - > The data realized in 2010 have been taken to account.
- Hotel prices have been foreseen to be in the room-breakfast system. Taking into
 consideration the performance of the facility in the past years, the examinations
 REPORT NO: 2011REV366

REPORT DATE: 30.09.2011 *CONFIDENTIAL

56

0242 322 20 90

conducted in the tourism sector and the area, for Novotel; all inclusive price per person for 2011 has been assumed as 85 Euros; for İbis Hotel all inclusive price per person for 2011 has been assumed as 72 Euros. The room price has been increased by 2,5% year by year.

- The occupancy rates are foreseen to remain unchanged at 84% for Novotel, and unchanged at 85% for ibis Hotel.
- It was assumed that other revenues such as rental of shops located in the hotels, wellness center, extra expenditures etc. shall be included in the item other revenues. Taking into consideration the performance of the facility, the other revenues shall be 36% of the accommodation revenues for Novotel, 17% of the accommodation revenues for Ibis Hotel.
- It was assumed that the profit margin for Novotel will remain fixed at 52% whereas at 61% for Ibis Hotel.
- It was assumed that the renewal expenses of the construction cost of the facility shall be increased by 1,5 % for the first year, by 2,5 % in the subsequent years.
- Further to Article 7/B of the contract dated 23 December 2004, "After the commissioning
 of the facility constructed on the property for which the easement right is possessed; a
 share equal to 1% of the total annual revenue shall be obtained", 1% of Novotel and
 Ibisotel annual revenues is considered as the "Share obtained from the Income".
- EURO has been used in the studies and was taken as 1 EURO=2,5157 TL.
- Tax and VAT have not been included in the studies in the scope of IVSC (International Valuation Standards Council).
- In the valuation study, 5,20% being six months return rate of Euro denominated Eurobonds due 2020 has been taken as risk-free return rate. (In this valuation study the return rate of the Euro based Eurobonds with the longest due date of 2020, has been selected as risk-free return rate)
- Reduction rate has been foreseen as 9,13 %.
- In the studies, 2,5% which is the inflation rate for the Euro zone was used as inflation rate.
- It is exempt from the real estate tax for one year beginning from 2011. The payment of real estate tax has been added in the calculations beginning from 2013; and 2.5% annual inflation rate increase has been added after 2013.
- The building insurance has been added in the realized figures according to the customer's declarations, and the 2.5% increase has been assumed for each year due to the inflation rate.

7.2.4 Calculation of Cost Capitalization Approach from the Issued Rent Revenues

Assumptions made according to the 4th amendment of the Agreement dated 18 April 2005,

- The price of the annual rent to be paid by the Accor group, which is an international hotel management company, to Akfen Gayrimenkul Yatırım Ortaklığı A.Ş, which holds the construction right of the hotel in question, will be twenty two (22%) percent of the gross revenue (VAT excluded) for Novotel and twenty five percent (25%) of the gross operation revenue for Ibis Hotel, or sixty five percent (65%) of the adjusted gross operation revenue, which ever is greater
- The construction right of the subject hotel is owned by Akfen Gayrimenkul Yatırım Ortaklığı A.Ş. while it is being operated by the international hotel operation company Accor Group.
- During this study, it was assumed that the hotel will be operated in the existing concept throughout the term of the construction right.
- The valuation study has been conducted according to the existing capacity of the hotels. It
 was foreseen that the hotels shall, in the following years;
 - o Be operated as Four stars Novotel and Three stars Ibis Hotel,
 - Shall have a capacity of 208 rooms 416 beds in Novotel, 228 rooms, 456 beds in Ibis Hotel.
 - o It was assumed that they will operate 365 days per year.
 - The data realized in 2010 have been taken to account.
- Hotel prices have been foreseen to be in the room-breakfast system. Taking into
 consideration the performance of the facility in the past years, the examinations conducted
 in the tourism sector and the area, for Novotel; all inclusive price per person for 2011 has
 been assumed as 85 Euros; for ibis Hotel all inclusive price per person for 2011 has been
 assumed as 72 Euros. The room price has been increased by 2,5% year by year.
- The occupancy rates are foreseen to remain unchanged at 84% for Novotel, and unchanged at 85% for İbis Hotel.
- It was assumed that other revenues such as rental of shops located in the hotels, wellness center, extra expenditures etc. shall be included in the item other revenues. Taking into consideration the performance of the facility, the other revenues shall be 36% of the accommodation revenues for Novotel, 17% of the accommodation revenues for Ibis Hotel.
- It was assumed that the profit margin for Novotel will remain fixed at 52% whereas at 61% for Ibis Hotel.
- Renewal expense for the rental model of the hotel has been taken as 0,05 % of the renewal
 expense calculated in the operation alternative. In the lease model, it was assumed that
 renewal expenses of the hotel shall be made by the tenant.
- Further to Article 7/B of the contract dated 23 December 2004, "After the commissioning of the facility constructed on the property for which the easement right is possessed; a share equal to 1% of the total annual revenue shall be obtained", 1% of Novotel and Ibisotel annual revenues is considered as the "Share obtained from the Income".
- EURO has been used In the studies and was taken as 1 EURO=2,5157 TL.
- Tax and VAT have not been included in the studies in the scope of IVSC (International Valuation Standards Council).
- In the valuation study, 5,20% being six months return rate of Euro denominated Eurobonds due 2020 has been taken as risk-free return rate. (In this valuation study the return rate of

REPORT NO: 2011REV366

REPORT DATE: 30.09.2011

63

the Euro based Eurobonds with the longest due date of 2020, has been selected as risk-free return rate)

- Low reduction rate and risk premium have been given with the thought that rental revenues guaranteed by brand power and the international recognition of Accor shall be determined over the years.
- In this study, rental revenues of the hotel leased to Accor group have been taken under guarantee by a lease agreement for 25 years plus extension option for 10 years. It was calculated by assuming that the risk premium in obtaining rental revenues of Akfen Gayrimenkul Yatırım Ortaklığı A.Ş. would be quite low. Reduction rate has been foreseen as 6,50 % by adding 1,70 % "Risk Premium" to the 5,20% "Risk-free Return Rate".

7.2.5 Evaluation of The Analysis Results

The net today's value of the property subject to valuation is determined as 44.450.000 €, according to the cost method, as 92.650.000 € according to the income reduction method and as 72.426.000 € according to the rental revenue calculated with the yearly rental amount to be paid by Accor group which is an international hotel management company for the hotel owned by Akfen Gayrimenkul Yatırım Ortaklığı A.Ş which has the right of superficies.

The rental value of the immovable property was calculated with the consideration of the average of the net cash flow values of the first year according to the revenue reduction method and the rental revenue. The annual average cash flow for the first year were reduced to the date of reduction and thus, the annual rental value of the immovable property was calculated. According to this calculation, the annual rental value has been appraised as 4.990.000 Euro (12.540.000.-TRY) Euro.

However, due to the fact that there is an operating as well as income generating facility on the immovable property, the average of 92.650.000 € as the value found with the income reduction method of the fair market value and 72.426.000 € which is the net today's value of the rental revenue being 82.540.000.-€ (Eightytwomillionfivehundredfourtythousand.-Euros) - 207.640.000.-TRY (Twohundredsevenmillionsixhundredfourtythousand.- Turkish Liras) has been assessed as the final result.

Building insurance rate is calculated as 11.338.654 Euro according to the 2011 costs of Public Works and Settlement Directorate, and 35% of this cost is also added as equipment / furnishing cost and the final insurance rate is accordingly obtained as 15.307.183 Euro. Building insurance rate is given for information purposes only.

During the appraisal study, cost approach method has been used for identifying the actual status value of the property. The value of the hotel according to income capitalization approach has been calculated with 2 methods: rent income and operating income. The hotel is currently let to Accor group to be operated with a lease contract. The rent income has been guaranteed with the contract, and therefore the capitalization of rent income has been realized with a low risk premium. In addition, the value to be calculated according to the total revenues provided by the property has been found according to the operating income. In this method, the total potential of the hotel which

REPORT NO: 2011REV366

*CONFIDENTIAL

provides profit for both the landlord and the operator has been considered, and this value has been considered important for any potential sales. Therefore, the value of the property according to income capitalization method is concluded as the average of the capitalization of two values: the guaranteed rent income with the rental contract, and the revenues that may be obtained with the total operation potential. For income generating properties, the value of the property depends on its performance, and the income capitalization value calculated with 2 methods is considered more rational.

SECTION 8 CONCLUSION

AKFEN GAYRIMENKUL YATIRIM ORT

CONCLUSION

All characteristics which might have an influence on the value of the property such as its location in Istanbul Thrace Free Zone, infrastructure and means of access, its facade to the street, land area, its zoning status, the construction system of the building, its age, the workmanship and the quality of the products, the construction completion rate of interior design have been taken into account and detailed market research has been undertaken on location. Taking into consideration the economic conditions experienced in the recent period the value of the immovable has been estimated as follows by TSKB Gayrimenkul Değerleme A.Ş.

FAIR MARKET VALUE OF THE SUPERFICIES OF NOVOTEL AND IBIS HOTEL (EXCLUDING VAT) **DATED 30 SEPTEMBER 2011**

- 1- These identified values are the fair market values respectively for cash sales
- 2- Exchange rate has been taken as EURO 1 = TL 2,5157. The value in EURO is given only for information.
- 3- This report has not been prepared further to the related provisions of the Capital Markets Regulation
- 4- This page is an unseperatable part of the appraisal report. The report is a whole with all the detailed information in it an cannot be used independently.

Because the existing mortgage on the title log of the property was established for financing the project, it is believed that there are not any obstacles for the inclusion of the property in REIT portfolio with respect to the mortgage, and as the type allocation of the hotel with easement right on the appraised land was completed, its inclusion in the REIT portfolio is possible according to the provisions of the Capital Market Regulations, in our opinion.

We hereby submit our report expressing our point of view and opinion with respects.
