Responsible Appraiser	:	Neşecan ÇEKİCİ

Declaration of Conformity

- The findings hereby presented in this report are correct, within the scope of the information that the Appraisers had at their disposal.
- The analysis and their respective results are limited only according to the specified assumptions and conditions.
- The appraisers have no connection whatsoever to the property subject to the appraisal nor will they ever have.
- The appraisers are not biased in relation to the real estate and the related parties.
- The appraisal cost does not depend on any single part, analysis opinion or the results of the report.
- The appraisers have carried out the appraisal pursuant to the moral principles and performance standards.
- The appraisers meet the necessary professional education terms and possess the sufficient experience.
- The analysis, opinions and resulting values have been prepared in accordance with the International Valuation Standards (IVS - UDES).

Assumptions

- The value stated within this report is the value specified on the date of its preparation. The appraisers cannot be held responsible for the economic and/or physical changes that might affect the value herein stated, occurring after the date of this report.
- No comments in this report (even though the matters in question are discussed in the
 continuation of the report) have been made with the purpose of clarifying legal affairs,
 matters that might require special research and specialty or other issues that are beyond the
 scope of the area of expertise of the appraisers.
- No changes have been made to the information pertaining to the property. The authorities
 that provide the information related to the property and legal descriptions are generally
 accepted to be trustworthy; however, no guarantees are given with regard to their
 truthfulness.
- Documents and corresponding related information are found in the report as they have been procured from public institutions.
- The photographs, maps, images and diagrams have been used for illustrative purposes only, in the interest of further comprehending the matters mentioned in the report; thus, they cannot be used as a reliable reference for any other purpose.

- The projections subject to this appraisal have been performed in order to help the appraisal process by taking into account a stable economic process, in the case of a demand during the current market conditions. The projections depend on the variable market conditions, which the appraisers cannot accurately discern; moreover, it is possible that the value might be affected from these variable conditions.
- The appraisers do not possess the necessary qualifications to determine the dangerous or health threatening materials found within or in the proximity of the property. Throughout the value appraisal, it is assumed that such materials that might decrease the value are considered to be inexistent. No responsibility is accepted concerning this matter.
- Predictions and projections or business estimates included in this appraisal report depend on
 the current market conditions and short term supply, together with demand factors and a
 stable economy; consequently, these may present changes to plausible future conditions. No
 responsibility is accepted in the event that the opinions and results presented in the report
 are affected due to economic changes that might occur after its herein date.
- Unless stated otherwise, underground resources have not been taken into consideration.
- It is not possible for the appraisers to carry out a soil contamination investigation, in the matter of the property in question. For this reason, to the extent that it can be seen, it has been determined that there is no cause for concern in regard to soil contamination.
- On account of the area in question being an established earthquake zone, the subject of ground stability cannot be clarified without the performance of detailed geological surveys.
 For this reason, in behalf of the appraisal studies, it has been assumed that there are no negative issues presently concerning the ground.
- Soil investigation and soil contamination studies in real estate fall within the scope of the "Environmental Geophysics" field. Our company does not employ such a specialization, thus did not perform a detailed investigation regarding the aforementioned matter. However, in accordance with the observations carried at the locale, it has been established that the real estate poses no threat to the environment. For this reason, this appraisal has been carried out taking into consideration that there have not been any negative effects against the environment.

1 REPORT INFORMATION

1.1 1.1 The Date, Number and Type of the Appraisal Report

Date of Report : 06.01.2017

Report Number : 2016-020-GYO-004

Type of Report: Appraisal report relative to the "Reinforced Concrete Hotel and Its Land" quality real estate with a surface area of 11.035,40 m², situated in the city of Kayseri, district of Kocasinan, Block no. 2420, Plot no. 9, for the purpose of determining the current market value of the remaining construction right and the current lease of the real estate value in Turkish Lira currency.

1.2 Information Regarding the Responsible Appraiser that Prepared the Appraisal Report

Report Issued by :Certified Appraiser, Serkan TANRIÖVER

Report Controlled by :Certified Appraiser, Önder ÖZCAN

Responsible Appraiser :Responsible Appraiser Neşecan ÇEKİCİ

Capital Market Board Coverage :Yes

1.3 Date of Appraisal

On the date of 01.10.2016, the necessary procedures have been initiated for this appraisal report. Subsequently, this report has been concluded on the date of 06.01.2017.

1.4 Reference Agreement

This Appraisal Report has been prepared pursuant to the provisions of the Reference Agreement executed between our company and Akfen Real Estate Investment Trust Inc. on the date of 06.09.2016.

1.5 Statement Whether the Report Has Been Prepared Within the Scope of the Board Arrangements for the Purpose of the Appraisal

The current Report has been prepared within the scope of the Capital Market Board arrangements.

^{*} The hereby appraisal has been prepared in accordance with the scope of the Capital Market Legislations.

2 INTRODUCTORY INFORMATION CONCERNING THE COMPANY AND THE CLIENT

2.1 Introductory Information Concerning the Appraisal Company

Company Title : Epos Real Estate Consultancy and Appraisal Inc.

Company Address : Kore Şehitleri Cad. Yüzbaşı Kaya Aldoğan Sok. Engin İş Merkezi No: 20

Kat:2 Zincirlikuyu / ISTANBUL

2.2 Introductory Information Concerning the Client

Client Title : Akfen Real Estate Investment Trust Inc.

Client Address : Büyükdere Caddesi, No: 201, C Blok, Kat: 8 Levent / ISTANBUL

2.3 The Scope of the Client's Demand and the Applied Limitations, If Any

The Appraisal report relative to the "Reinforced Concrete Hotel and Its Land" quality real estate, with a surface area of 11.035,40 m², situated in the city of Kayseri, district of Kocasinan, Block no. 2420, Plot no. 9, has been prepared for the purpose of determining its sale and lease value.

With reference to the 06.09.2016 dated request by Akfen Real Estate Investment Trust Inc., the property subject to this appraisal report belongs to the Chamber of Industry of Kayseri and has been allocated with a lease agreement, with the starting date of 20.08.2008, for the duration of 49 years, on behalf of Akfen Real Estate Investment Trust Inc.. The potential revenue, in regards to its use or leasing, has been evaluated; moreover, there are no restrictive constraints in force exercised by the client. During the appraisal studies, the market research, the onsite surveys and the existing lease agreements, which have been signed by Akfen Real Estate Investment Trust Inc. with the Chamber of Industry of Kayseri and the Accor Group, have all been taken into account.

3 VALUE DEFINITIONS, DESCRIPTION OF APPRAISAL METHODS

There are three different appraisal methods available in our country: "Exemplary Comparison Approach (Market Approach)", "Cost Approach" and "Revenue Discount Approach".

3.1 Exemplary Comparison Approach

With regard to the real estate that will be appraised; this method follows particular procedures, such as the comparison of the real estate with other real estates that have similar characteristics in the market and those that have been recently sold, the application of appropriate comparison processes and making various modifications in the comparable sale values.

The appraisal analysis is carried out by means of comparing the examples found within specific criteria such as location, visibility, functional use, size, zoning status and its comparable. The market value approach is the most preferred method when there are widespread and comparable examples present.

The most trustworthy and realistic approach in real estate appraisal is the market value approach. In this appraisal method, comparable examples that share common characteristics with the real estate that has been submitted for the appraisal in the area are evaluated.

The Market Value Approach depends on the following assumptions:

- The existence of an available market, in relation to the type of the real estate in analysis, is acknowledged beforehand.
- It has been verified that the buyers and sellers in this market possess excellent knowledge on the subject of real estate and that, for this reason, time is not a critical factor.
- It has been established that the real estate has stayed on the market for an appropriate amount of time and for a reasonable price.
- It has been determined that the chosen comparable examples possess common characteristics with the real estate in question.
- It has been noted that the changes made in the prices given for the chosen comparable examples are subject to today's socioeconomic conditions.

3.2 Cost Approach

In this method, the appraisal of the real estate is based on the cost of the reconstruction of the real estate, in accordance with today's socio-economic conditions.

Pursuant to this approach, it has been established that the value of the real estate consists of two different facts, namely land and buildings; in addition, it is acknowledged that the real estate has a significant remaining economic life span. Therefore, for this reason, it is taken into account that the value of the real estate will decrease in time due to physical wear and become out of date in terms of

functionality and economic status. In other words, this method concedes that the current value of a real estate can never be more than the cost of its reconstruction.

The appraisal process is calculated by the addition of the interest or gain that the current building possesses, if any, to the present reconstruction or reinstallation cost of the real estate in question, followed by the subtraction of the wear and tear ratio from the total cost and, finally, the addition of the land value. In this sense, the basic principle of the Cost Approach can be explained through the usage value, whereas the usage value is described as "Even though nobody desires or knows about its value, the goods have their real value".

3.3 Revenue Discount Approach

In the revenue discount approach, the net revenue that the real estate will bring, the idle time, collection losses and business expenses are analyzed for the business period.

The appraisers will calculate the present value of the real estate by capitalizing the prospective future benefits and the revenue that it brings.

There are two different methods in revenue capitalization; Direct Capitalization is calculated through the division of the annual revenue by the revenue ratio or through the multiplication of the annual revenue with the revenue coefficient. On the other hand, in the Reduced Cash Flow, the value of the real estate is calculated by applying the lump sum value and reflecting it on the revenue model; afterwards, the revenues are brought to the present day value by an acceptable discount rate.

Some real estates, due to their characteristics, may need to be appraised by taking into account that they will be improved. In this case, the net revenues that the real estate will generate for its development will be set off from the expenses that will be made for its development; the net result will be taken into consideration to determine the present value of the real estate by taking into account the entrepreneur profit and an acceptable discount rate.

The studies and analysis that constitute the basis of the appraisal remain with the appraiser.

4 ECONOMIC STATUS, REAL ESTATE SECTOR DATA AND ANALYSIS OF THE REGION WHERE THE REAL ESTATE IS LOCATED

4.1 General and Socio- economic Data

According to the 2015 results of the Address-Based Population Registration System (ADNKS), Turkey has a population of 78.741.053 people. In this population, 50,2% (39,511,191 people) are male, and 49,8% (39,229,862 people) are female.

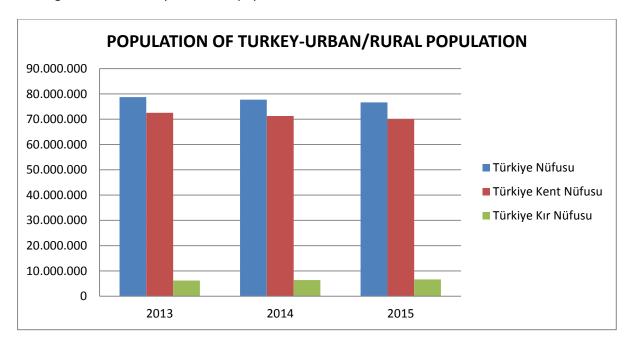

One of the most important aspects of the population of Turkey is its youth. The population aged between 0 and 14 comprises 24,3% of the total population. However, this ratio has been constantly decreasing since 1965, and the Turkish society is gradually getting older. While the age group 0-14 comprised 41,9% of the population in 1965, it has fallen to 24,3% in 2015. The annual population growth in Turkey is 13,4 per thousand. 92,10% of the population live in the central parts of cities and provinces. The median age in Turkey is 31. The table demonstrates the population data for all of Turkey. It gives a comparison of the data from 2013, 2014 and 2015.

TURKEY								
Rows	2013	2014	2015					
Rural Population in Turkey	6,633,451.00	6,409,722.00	6,217,919.00					
Urban Population in Turkey	70,034,413.00	71,286,182.00	72,523,134.00					
Population in Turkey	76,667,864.00	77,695,904.00	78,741,053.00					
Population at the age of 15 and older	55,169,000.00	56,084,000.00	59,584,833.00					
Labour Force	27,323,000.00	28,036,000.00	29,678,000.00					
Employment	24,433,000.00	25,194,000.00	26,621,000.00					
Unemployed	2,890,000.00	2,841,000.00	3,057,000.00					
Not Included in the Labour Force	27,846,000.00	28,048,000.00	28,176,000.00					
Labour Force Activity	49.50	50.00	51.30					
Employment Rate (%)	44.30	44.90	46.00					
Unemployment Rate (%)	10.60	10.10	10.30					
Non-agricultural Unemployment Rate (%)	12.90	12.30	12.60					
Unemployment in young population (ages 15-24) (%)	20.70	19.00	19.30					

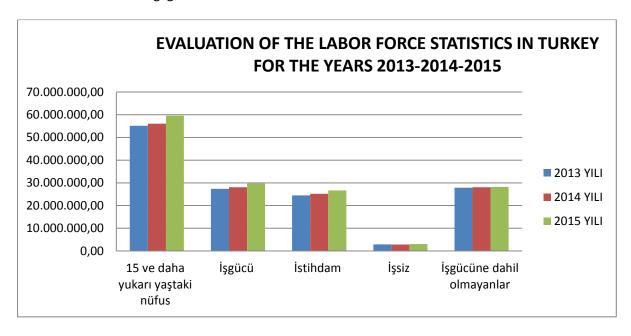

Population Data of 2013, 2014 and 2015 (Source: Turkish Statistical Institute)

According to the data of 2013, 2014 and 2015, there has been an increase in population, labour force and employment in overall Turkey. Hence, the unemployed population as well as the population not included in the labour force increase as well. The unemployment rate among young population is striking for overall Turkey and urban population.

A second comparison has been made for the overall population data for Turkey for the years 2013-2014-2015. In 2016, the population at the age of 15 and older, the labour force and the employed population increased while the unemployed population and population not included in the labour force increased at a negligible level.

In the light of this data, information on economic overview and the real estate industry will be provided.

4.2 Global Economic Overview

Following all developments became necessary as a result of globalism and increasing economic links of countries.

Primary problem in global economic crisis is deflationist (decrease of general price level) process and correspondingly recession (stability-negative growth). For developing countries, on the other hand, there are inflationist (general increase in prices) problems and low growth. Related situations have different characteristics and reasons for every country; therefore, there is no standard prescription for solution.

After global crisis, most important implementers of economy politics were central banks. Decisions taken by big and efficient central banks in the world were crucial for not only their own country but also became a guide for international fund mobility. Developing countries were influenced most by its both positive and negative effects.

Right after the crisis, USA central bank Fed immediately started to use tools of 'expansionary I monetary policy'. For this purpose, many methods were implemented like interest discount, bond intake, property intake and funding of financial system, and activating credit mechanisms. Through this kind of monetary policy, financial stabilization, and by stimulating consumption and investment, growth was aimed as a final goal to get rid of crisis.

Policies followed by Fed to get rid of crisis were extraordinary and with its differences in implementation it revealed necessary pathway for other world banks. Fed, who immediately responded to crisis and performed decision-making mechanisms, was followed by ECB (European Central Bank) even if it was late. In the Far East, Japan central bank followed similar policies to get rid of deflation and recession, which are primary problems of its economy. In parallel with relative recovering of USA economy, Fed decreased bond retrieval amount on the date of December 2013 in order to withdraw monetary expansion policy. Process initiated ahead of time expected in developing countries (like Turkey, Brazil, Argentina, Indonesia, India) and this caused decrease in local currencies and then partly outgoing of funds, which are short-term investment oriented. On October 2014, USA central bank finished 'cash flow by taking bonds'. However, transition to increasing 'interest' phase, which will end actual monetary expansion, expected by the end of 2015.

In Fed meeting on September 2015, it was stated that (except for one member) concerns regarding China and other developing countries increased value of dollar and decreased value commodities, and by taking into consideration economic outlook, labor force market, inflation and risks about them, there is no need to interest rate hike, although USA economy is strengthening and unutilized capacity in labor force is decreasing.

Following inferences were deduced according to "World Economic Outlook" issue of October 2015 report, which is prepared by IMF twice a year:

- Global growth rate in 2015 was expected as 3,10 %. This rate fell 0,30 % of year 2014. It is also 0,20 % under of rate 3,30 %, which was stated in World Economic Outlook (WEO) report January 2015. Expectancy of decrease was revised compare to previous report.
- Expectancies of main countries and regions stayed indeterminate and unbalanced.
 Recovering of developed countries compare to recent years, and for developing economics and markets recession is foreseen again like previous 5 years. Some increasing market economies and growth of countries exported petrol represent weak hopes.
- Decreasing commodity price, reduced share capital increase negative risks of developing economies, pressure on market and financial market instability, and therefore Fed tightens financial conditions regarding developing countries considering expected increasing interest and worsening global economic outlook.
- Developed and developing countries have an important role as middle or long term alliances one of which has decrease in growth rate and one of which has modest recovering.
- Crisis leaved high rate of private and public deficit, financial sector weakness, low rate of
 investments for some developed countries having low growth rate. For developing countries,
 on the other hand, demographic transitions, investment explosions, revised growth in China,
 decrease in commodity price and reregulation of the market is required.
- Volatility was related with Greece dept meetings of Chinese authorities on June-July, sharp drop of Chinese stock market and policy incentives.
- Increasing policy interests of USA and worsening global outlook tightened more financial situation of developing countries since last spring. Dollar, bond and long-term local currency bond interests increased nearly 50-60 basis point and stock prices decreased, exchange rate devalorized or pressured.
- As a result of nuclear agreement with Iran and low global demand, petrol prices decreased.
 Falling production activity in China, investment explosion in mining sector decreased metal prices.
- Countries implemented flexible exchange regime and exported commodities lost large amount of money.
- Developing economies experienced more sharp loss. Major developed economy currencies experienced modest mobility.
- This global factors and country specific developments indicate relatively weaker revival compare to predicted amounts for 2015 and 2016 modest increase in growth expected for developed economies increase chance of loss for the next year. Developments of this year

reflect a modest recovering of euro and returning of Japan to a positive growth, and additionally falling in petrol prices and devaluation of money for some conditions.

- Developments in developed economies, exporters –especially Norway and Canada- and in Asia excluding Japan (especially Korea and Taiwan region of China) unemployment decreases related to degrowth. However, growth in productivity is still weak even in USA where recovering is stronger.
- In 2016, some level of growth is expected in especially North America, however; expectations are still low considering falling investments, negative demography and weak productivity growth. Recently, decrease in petrol and other commodity prices must support demand of developed economies, which are exporters of net commodities. On the other hand, slowness in rising markets will indicate weaker importations.
- Revised fall in commodity prices will pressure inflation in developed economies in next months, and while revival is happening, expected development in core inflation will delay.
- Although core inflation stayed more stable, it is still under targeted amount of central bank.
 It is seen that inflation will be low towards falling unemployment and medium term weak growth.
- Growth expectancies are very different depending on regions and countries but outlook became weak generally considering consecutive 5 years that decrease was foreseen. This reflects a combination of factors.
- For the most developing market economies external conditions became harder. While money
 devaluation helps net exportation, depending on weak recoverings and medium level
 expectancies for medium level growth, it is expected that future drawl of developed
 economies will be more modest than prospected.
- Capital flows slowed down in rising markets in last quarters and rising USA currency politics from zero lower limit related with tightness of external financial conditions.
- Decelaration of growth in China is parallel to expectancies until now, however reflections in cross border are bigger than prospected. This reflected as lower imports to China and lower prices of commodities (especially metal). Devaluation of Greece by China, volatilities related to weakness in currencies of developing economies and increasing global risks caused sharp decreases in property prices throughout world.
- Rebound is expected for growth of rising markets and developing economies 2016.
- This reflects lower recession and relative normalization in 2015 for countries having economic trouble (Brazil, Russia, some countries in Latin America and in Middle East), and spill-over effect depending on stronger recovering in economic activities of developed economies and facilitating of sanctions for Islamic Republic of Iran.

- Decreasing growth is expected for China even if it is gradually. Weakness in commodity
 prices, slower global growth than expected and possibility of tighter global financial
 conditions become a burden to low-income countries. While Chinese authorities implement
 reforms towards decreasing financial infirmity strengthening role of market powers in
 economy, they confront tradeoffs in their projection of transition to growth depending on
 consumption without deceleration of activity.
- Some countries, especially the ones with rich sources, have wide current account deficit due
 to foreign direct investment. Correspondingly they are more vulnerable towards foreign
 financial shock.
- Risk balance is still downward. Low level of petrol and other commodities can constitute an
 upward demand for commodity importers in some level. However, this complicates the
 demand for commodity importers so some of them already confront with nervous initiation
 conditions.
- Vulnerability of rising markets in terms of continuing fall in commodity prices and sharp rise
 in American Dollar is still proceeding and this may force balance sheet of companies in some
 countries further.

The Fed meeting in September 2015 stated that the concerns for China and other developing countries has led to valuation of US dollars as well as a devaluation of commodities, and all members, excluding one member, stated that an interest rate hike is not necessary considering the economic overview, labour market, inflation and related risks, although the US economy was strengthened and the idle capacity in the labour market decreased.

December 2015 saw a quarter point hike in the interest rate after a decade, and the interest rate went up to 0,25-0,50 percent.

However, the transition to an 'interest rate hike' that would essentially mark the end of monetary easing happened in late 2015.

In 2016, Fed kept the interest rate intact at its meetings in January, March and April. In the meetings of June 2016 and September 2016, the US Federal Reserve Banks (Fed) announced that the interest rates would not be changed.

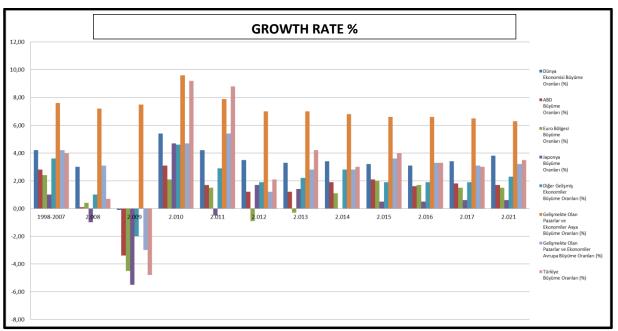

Maintaining its regular behaviour in the recent period, Fed wants to see an economic improvement that would allow gradual hikes in interest rates. It is observed that the Fed intends to increase the interest rates before the end of 2016.

The global growth rate for 2016 is estimated to be 3,10%. This rate is 0,10% less than the rate in 2015. It is also 0,10% less than the estimates in the April 2017 World Economic Overview (WEO) report. It is estimated the global economy will grow by 3,40% in 2017, and by 3,80% in 2021.

Years	Word Growth Rate (%)			Growth	Other Advanced Economies Growth Rate (%)	Markets and Economies Asia	Markets and	Turkey Growth Rate (%)

Source: The data has been extracted from the "World Economic Overview Report" in October 2016.

Source: The data has been extracted from the "World Economic Overview Report" in October 2016.

The US economy, with the 3,40% recession after the crisis of 2009, has grown by approximately 3,10% in 2010. Growth rates were between 1 and 2% across the years.

The Euro zone, after -4,50% recession with the crisis in 2009, grew by 2,10% in 2010, and by 1,50% in 2011. The regional economy, shrinking for two consecutive years in 2012 and 2013, reached the growth rates between 1,00 and 2,00% after this year.

Japan, after -5,50% recession with the crisis in 2009, grew by 4,70% in 2010. The regional economy, which had a falling trend again in 20011, constantly achieved small growth rates except for the standstill in 2014.

The other developed economies grew by 1 and 3% percent for other years than the 2,00% recession in 2009.

In developing economies of Asia, the economic growth was approximately 6,30 to 9,60% every year.

The growth rates (%) in Developing Markets and Economies of Europe were 1,20 to 5,40% on the average for all years except for the -3,00% recession in 2009. (Turkey has also been classified in the area of developing markets and economies.)

The "World Economic Overview Report" of October 2016, which is issued by the IMF twice a year, has made the following deductions:

- ✓ The main unexpected development in the recent months has been the vote in the Great Britain in favour of leaving the EU. The markets have reacted in an ensuring way to the surprise rejection of Brexit Vote in the referendum. However, the future of the institutional and commercial agreements between the UK and the EU is ambiguous, and its ultimate impact is unclear.
- ✓ With the expectations of low interest rates, lessening concerns for expectations following progrowth policies and stabilization of some commodity prices in developed economies, the accurate financial market sensitivity has been improved in developing economies.
- Expectations sharply vary among countries. While robust growth rates were achieved in developing Asia and India, a sharp slowdown is observed in Saharan Africa.
- ✓ The uncertainty in developed economies and a curbed overview that is subject to downside risks may further ignite political dissatisfaction.
- ✓ Many developing markets face the challenge of policies that force them to comply with weaker commodity prices.
- ✓ These concerning expectations make it necessary to produce a political response that will improve growth and shall stand on a wide basis in managing weaknesses.
- ✓ The complexity of current expectations, long-term trends, new shocks and ongoing revisions continues.
- ✓ These factors entail too much uncertainty for future economic expectation as well as a suppressed basis for overall growth.
- ✓ Major ongoing rearrangements/alignments (which is particularly important for developing countries) include a rebalance of China, long-term fall of commodity exporter, macro-economic programs and structural compliance.
- ✓ The basic economic scenario estimates a global growth at the rate of 3,10%. It is estimated that the rate might go up to 3,40% next year.
- ✓ This estimate reflects a weaker US economic activity than expected and a significant negative risk arising from the Brexit vote.

12

- ✓ It is estimated that the growth in developing markets and economies will slightly improve in 2016 to reach 4,20%, following a recession for 5 consecutive years. The overview of these markets is irregular and weaker than the past.
- ✓ As financing conditions are facilitated by expectations of low interest rates in developing countries, the other factors suppress the activity. This includes the recession in China, and a new negative economic scattering is taking place.
- ✓ There is less confidence in resource-intense investments and imports, and a constant alignment of commodity exporters with lower incomes leads to negative scattering of persisting weak demand in developed economies, internal conflicts, political disputes and geopolitical tensions.
- ✓ An improvement is expected in 2017 with better expectations in developing markets and economies and a slight revitalization in their economies. An improvement in investments is expected, as well as a decrease in stocks.
- ✓ Facilitating monetary policy rates has helped to bridle inflation. Malaysia and Indonesia, as well as Russia and Turkey implemented this policy simultaneously.

4.3 Turkey Economic Outlook

Discipline constructed after 2001 crisis in Turkey economy succeed in issues like public dept, banking rates, budget balance and until 2008 growth rate continuously increased. Economies developed in between 2008-2012 influenced by global crisis at least. In this process, increase in yearly growth rate relieved world economy. Countries like Turkey had brilliant performance after crisis. Recovering abilities of developing countries are more rapid than developed economies. However, the main problem of these economies is that they cannot keep gaining and stability. Turkey has problems like lack of savings, unemployment, problems regarding general level of prices, added values of import and export items, balance of exchange, middle-income trick, current deficit, demand failure, technology deficiency, political and geographical risks. Average growth rate of Turkey is 4,8% for 92 years period. Briefly, potential growth rate in full employment level is 6-7%.

IMF argued that political uncertainty will decrease domestic demand and revised growth expectancies downwardly in its evaluation regarding Turkey economy in World Economic Outlook Report.

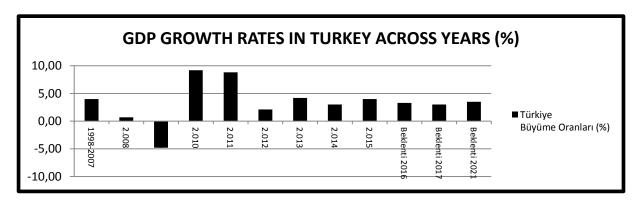

According to this, growth expectancy is 3% for this year and 2,9% for the next year for Turkey. These rates were stated as 3.1% and 3.6% in previous report.

Inflation expectation of IMF for Turkey increased from 6,6% to 7.40% for 2015 and 6,50% to 7.00% for 2016.

YEARS	1998-2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2021
TURKEY GROWTH RATE %	4,00	0,70	-4,80	9,20	8,80	2,10	4,20	3,00	4,00	3,30	3,00	3,50

Source: Word Economic 2016 October World Overview Report

The "World Economic Overview Report" of October 2016, which is issued by the IMF twice a year, has made the following deductions for Turkey:

- ✓ The feelings towards developing economies have improved. The reason is pressure of the expansions in economic recovery, and the improvement in long-term real interest rates and net asset values.
- ✓ However, in supporting economic activity with the loosening in macro-economies, the uncertainties following the recent terrorist attacks and the failed attempt of coup may affect the growth rates in 2016-2017.
- ✓ It will sustain its current expenses and monetary expenses in parallel to "Medium-term program of 2016-2018 on the basis of financial projections, current trends and policies."
- ✓ The estimates for broad money and broad long money are based on IMF projections. It is estimated to develop with a fixed spreading rate against US instruments interest rate that is similar to the short-term deposit rate.
- ✓ In its assessment of the Turkish economy, IMG claims that political uncertainty will lead to a decrease in domestic demand, and has revised its growth expectations to downward.
- ✓ According to the World Economic Outlook Report, the GDP growth rate, which was 4,00% in 2015, will be 3,30% in 2016, 3,00% in 2017, and 3,50% in 2021.
- ✓ Wholesale price index (WPI) was 8,80% in 2015. It is estimated that the index will be 9,10% in 2016, and will continue to rise in 2017 to 9,10%, and to 6,20% in 2021.
- ✓ The current account balance will be -4,50% in 2015. It is estimated that the balance will be -4,40% in 2016, -5,60% in 2016, and increase to -5,60% in 2021.
- ✓ Moody's, an international credit rating institution, has revised Turkey's credit score from "Baa3" to "Ba1", and defined its rating overview as "static."

14

4.4 Overview of Real Estate Industry

Real estate sector became a growing sector contrary to service, industry and rural sector recently. Although insufficient capital source makes hard to invest to rural and industry sector, small scale capital stock may be sufficient to invest in real estate sector. For this reason, real estate sector of Turkey depends relatively on national capital. It is defined as leading sector since it mobilize other sectors and as sponge sector since it may absorb unqualified workers. Almost all production of real estate sector counts as investment good. Real estate sector in Turkey develops through these investments.

Construction sector, which was initiated with public investments, large scaled infrastructure projects in early republic period, has influences of private sector through liberal economy effects in 1950s especially in public expenditures. After the year of 1950, construction sector developed through barrage, hydroelectric power stations, highways and housing investments. After 1980 in neo-liberal period, on the other hand, housing investments became prominent as a result of increasing migration. In liberal period after 2002, shopping mall, residence and housing investments gained importance through influence of TOKi.

In sectoral distribution of long-term external debt in period of 2002-2014, construction-real estate sector has impressive intensity.

Recently, it is seen that legal regulations concentrated in real estate sector. Moreover, sales of the lands legally actualized in 2012 within the scope of the law "sale of the agricultural estate belonging to Treasury, support for development of forest villagers and assessment of outside of the forest borders on behalf of Treasury", which is known in public opinion as "2B law". However, these sales became less than expected and did not influence building sector sufficiently. Advantages of urban renewal law increased growth of real estate sector in 2013.

Decision directed to removal of restrictions over possessing real estate of foreigners through the law "Law Organizing Property Sale to Foreigners" provided rising attractions of investors in especially Russia, Middle East, and Asia. Purchasing real estate of foreigners started to increase gradually.

Additionally, following reasons have influence on development of real estate sector:

- Attraction of investors from different countries for Istanbul as a brand city, and laying the foundations of Istanbul to be a financial center,
- Infrastructure projects that attract attentions (3rd bosphorus bridge, all tunnel projects in bosphorus, 3rd airport, metro projects in metropolitans etc.)
- Increasing transportation opportunities, widening metropolitan borders and growing living spaces,

- Urban renewal and related regulations,
- Continuing rural to urban migration,
- Effect of natural demand as a result of having young population,
- Changing nuclear family concept,
- Precautions for housing purchase and saving incentives to keep sector alive,

Tendency of procrastination of demand for housing and automotive, which is generally seen before elections, was not influenced this year, on the contrary, these two sectors was quite alive. This may be thought as a kind of protection method of customers related to expectation of increasing demand.

It is evaluated that stabile development of real estate sector in Turkey in 2016 depends on political and economic stability, interest of foreign investor and growth rate of economy. It is expected that residence sale to foreigners will be stable because of stagnancy in other developing countries.

It is estimated that in 2016 a stable rise in the real estate industry in Turkey will rely on political and economic stability, the interest of foreign investors in Turkey and high growth rates of Turkish economy. Housing sales to foreigners is expected to be static due to the stagnation in other developing countries. The reasons for the increase in asset prices include expanding monetary policy, positive course of economic growth, abundance of liquidity, new inventions, financial liberalization, financial innovations, facilitation of borrowing capabilities and a significant rise in loans, changes in portfolio structure and government policies.

As a result of economic decisions of the central government, the sales in construction industry, which is the main pillar of economy, as well as real estate sales are expected to increase.

The introduction of new directions of Banking Regulation and Supervision Agency (BDDK) which brings changes to loaning transactions and to debit and credit cards aims to regulate the number of installments on credit cards, increase the maturity limit in consumer loans from 36 months to 48 months, bring new regulations on personal loans across the industry and to vitalize economy.

Moving the limit of the ratio of the mortgage loan to the value of the housing which is taken as a collateral from 75% to 80%, the campaigns launched by Emlak Konut GYO and GYODER after the coup attempt of July 15th, decreasing the VAT to 8% for houses larger than 150 square meters aim at accelerating the construction industry, which is the main pillar of economy, and pushing the sales of real estate.

Although here have been economic contractions in a global scale, these decisions along with the young population structure of Turkey, continued migration to urban areas, and large-scale project with ongoing investment lead to an expectation that real estate sales will maintain its trend in 2017 as it happened in 2016, and will continue to increase.

4.5 Information Regarding the Tourism Industry

While Turkey closed the year of 2013 with 34.910.098 persons, it has closed the year of 2014 with an increase 5,5% in terms of foreign visitors corresponding 36.837.900 tourists.

Antalya became the first city in regards to foreign tourists visiting touristic centers, with a number of 11.9 million tourists. On the other hand, Istanbul has achieved a growth rate of 13% roughly. In Muğla the increase recorded approximately 2,5%; in Izmir there is a decrease corresponding almost 5%.

	Number of Visitors in Touristic Centers									
	2012	2013	2014	Change						
Antalya	10.299.366	11.535.762	11 941 954	3,5						
İstanbul	9.381.670	10.474.867	11.842.983	13,1						
Muğla	3.009.342	3.222.315	3.302.688	2,5						
İzmir	1.368.929	1.943.253	1.847.567	- 4,9						
4 Cities Total	24.061.319	25.232.944	28.935.192	10,9						
Turkey	31.782.832	34.910.098	36.837.900	5,5						

Source: Turkish Hoteliers Federation (TUROFED) Tourism Report 2014-9.

The revenue obtained in the Tourism industry, from the domestic and foreign tourists in the year of 2014, has increased 6,2%, thus reaching 34,3 billion dollars. 81,5% of the revenue has been obtained from foreign, 18,5% of it has been obtained from Turkish citizens living abroad and visiting the country. Moreover, those revenues' 26 billion 2 million 950 thousand US Dollars is consisted of personal expenses and 8 billion 302 million 954 thousand US Dollars is packaged tour spendings. (Source: Turofed Tourism Report 2014-9. Report)

While Turkey has managed to be one of the 20 biggest economies in the world (G20), it is ranked at number 6 among the leading 10 touristic destinations of the world in terms of number of the visitors according to the data of World Tourism Organization (UNWTO).

According to the real estate report for the year of 2014, which Deloitte has prepared for Turkey, one interesting topic is the Tourism Strategy of the Ministry of Culture and Tourism for the year of 2023. The target visitor number is set for 63 million and the total planned revenue (from foreign visitors) is 86 billion dollars. The aim is to enter the top 5.

4.6 Analysis of the Region Where the Real Estate is Situated

4.6.1 The City of Kayseri

The city of Kayseri is located at the south of Central Anatolia, where the Toros Mountain Ranges come together, and the Central Kızılırmak Region. The area was designated Cappadocia (Kapadokya) during the classical ages, where the Silk Route passed through. The city is located between the 37° 45′N and 38° 18′N latitudes and between the 34° 56′E and 36° 58′ longitudes. The city of Sivas is situated to the north and northeast, the city of Yozgat to the north, the city of Nevşehir to the west, the city of Niğde to the southwest and the cities of Adana and Kahramanmaraş to the south.

During the time period before the Law Regarding the Formation of Metropolitan Municipalities and Twenty Six Districts in Three Cities, Together with The Legislation to Apply Changes in Some Laws and Decrees (dated 06.12.2012, number 28489), with the number 6360, entered into effect, the number of districts, neighborhoods and villages, as well as their surface areas, have been addressed; therefore, accordingly, there are 49 municipalities, 426 neighborhoods and 394 villages. The ranking of districts with the most neighborhoods is; the District of Kocasinan with 96 neighborhoods and the district of Melikgazi with 83 neighborhoods, whereas the districts with the villages are Pınarbaşı with 111 and the district of Develi with 45 villages. With the Law number 6360 entering into effect and following the local elections on the date of 30.03.2014, the number of municipalities has increased to 17 – 1 Metropolitan and 16 district municipalities – Akkışla, Bünyan, Develi, Felahiye, Hacılar, İncesu, Kocasinan, Melikgazi, Özvatan, Pınarbaşı, Sarıoplan, Sarız, Talas, Tomarza, Yahyalı and Yeşilhisar, as well as 820 neighborhoods.

The Location of the city of Kayseri and Its Districts

The total surface area of the province is of 16.917 km² and it has been observed that the physical population density, in the year of 2013, consists of 77. It must be made clear that, due to a population of 1.295.355 in the year of 2013, in comparison to the large surface area of the province, the physical density of the city has been considered low. The largest district of the city is the district of Pinarbaşi, with a surface area of 3.300km², occupying 19,52% of the total area of the province,

whereas the smallest district of the city is the district of Özvatan with a surface area of 200 km², constituting 1,18% of the province. The total ratio of the major districts (Kocasinan, Melikgazi, Hacılar, Talas and İncesu) of the city are 21,00%, even though the surface area ratio of each of these districts is low on the total area of the province. It has been clearly observed that, due to the land conditions, the physical, agricultural and urban density is low.

The total surface area of the city is of 1.691.700 hectare; 671.000 consist of cultivated areas, 668.700 of pasture areas, 108.000 of forested areas and 244.000 of miscellaneous areas. 39,66% of the total area consists of cultivated areas, 39,54% of pasture areas, 6,38% of forested areas and 14,41% of miscellaneous areas. The fact that the cities and districts occupy 14,42% of the total area of the province can be interpreted as an important element for potential development. The surface area of the province makes up 2,2% of the total surface area of the country and the elevation of the city from the sea is 1.054 m.

The important factors that affect the demand, with regard to residential and other real estate types, are demography and population development, together with income level and the tendency to save. For this reason, the demography and population developments, along with the tendencies with regard to the city, are primarily evaluated; afterwards, population calculations are made based on these tendencies and the assumptions used. When the population data is examined, it has been observed that the population in the city has increased during the years of 2008, 2009 and 2010, and then started to decline during the years of 2011 and 2012, finally ending up increasing once more in the year of 2013. In the year of 2007, the population of the city of Kayseri constituted 1,65% of the nation, which has reached to 1,69% during the year of 2013. (Chart Number 5) The growth rate in the city is above the average.

Years	Popula	tion Size		Population Growth Rate (% ₀)			
	Kayseri	Turkey	Kayseri Ratio (%)	Kayseri	Turkey		
2007	1.165.088	70.586.256	1,65	-	-		
2008	1.184.386	71.517.100	1,66	16,4	13,1		
2009	1.205.872	72.561.312	1,66	18,0	14,5		
2010	1.234.651	73.722.988	1,67	23,6	15,9		
2011	1.255.349	74.724.269	1,68	16,6	13,5		
2012	1.274.968	75.627.384	1,69	15,5	12,0		
2013	1.295.355	76.667.864	1,69	15,9	13,7		

The share of the city of Kayseri with regard to the Population Size and Population Growth Rate

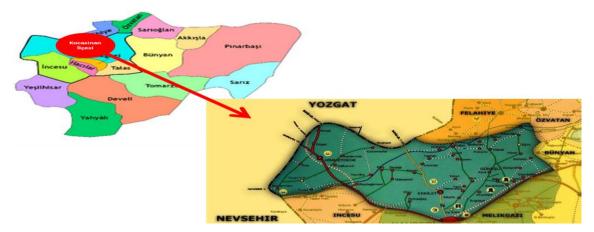

(Source: TUIK 2013)

The number of persons per km² in Turkey, throughout the years of 2007-2013, has been 92-100 and it has been noted that this number has been on the rise in recent years. When the population density of Kayseri was verified, it has been determined that, with 68-78 persons per km² during the year of 2007-2013, the city has been classified below the country average. The main reasons for this low density in the city are land related factors and, in comparison to Istanbul and other coastal cities, the distribution is more balanced.

4.6.2 The District of Kocasinan

The district of Kocasinan is located in the midst of the districts of Melikgazi, Hacılar, Talas and Incesu, as well as the Kayseri center.

The Location of the Kocasinan District

The district of Kocasinan has been founded from the division of the city of Kayseri in the year of 1989, within the rich historical past of the city. The State Highway coming from the direction of Sivas follows the Sivas Avenue and then the Düvenönü and Osman Kavuncu Avenues, connecting to the Ankara Freeway and the Boğazköprü, which roughly draws the borders of the district of Kocasinan to the north.

In accordance with the data obtained from the Address Based Population Registration System for the year of 2015, the total population of the district is 388.364. Moreover, this district has the highest number of neighborhoods in the city of Kayseri.

DISTRICTS	Surface Area (Km²)	Ratio (%)	Municipality	Neighborhood	Village
			(number)	(number)	(number)
Kocasinan	721	4,26	5	96	25
Melikgazi	700	4,15	2	83	1
Akkışla	440	2,60	3	13	5
Bünyan	1.310	7,74	8	32	24
Develi	1.843	10,90	5	37	45
Felahiye	410	2,42	3	9	9
Hacılar	621	3,67	1	10	2
İncesu	860	5,08	1	27	7
Özvatan	200	1,18	2	11	4
Pınarbaşı	3.300	19,52	3	17	111
Sarıoğlan	710	4,20	6	16	18
Sarız	1.410	5,33	2	13	35
Talas	650	3,84	1	21	12
Tomarza	1.452	8,58	3	11	47
Yahyalı	1.310	7,74	2	16	28
Yeşilhisar	980	5,79	1	14	21
TOTAL	16.917	100,00	49	426	394

The surface area of the city of Kayseri in terms of its districts and the distribution of the number of neighborhoods (Source: TUIK 2013)

The demand for residential and other facilities in the district of Kocasinan is on the rise and it is estimated that this demand will continue to persist in the near future. Furthermore, positioning of office blocks, work centers and residences in the area is being discussed. The district of Kocasinan is among the districts of Kayseri where urban development is gaining speed.

4.6.3 Information Regarding the Tourism Industry in Kayseri and the Hotel Market

It has been observed that the city of Kayseri is situated in a potentially important region for tourism, in terms of area and its characteristics, and that this potential is not fully benefitted from. The number of visitors recorded in the accommodation facilities for the year of 2015 is 264.144 local, 38.067 foreign, which makes a total of 302.211 visitors.

Kayseri Year of 2014 Visitors Profile and Accommodation Information

The total number of overnight stays in the city of Kayseri, together with the number of visitors that check into the country and stay overnight has increased in the year of 2014 in regards to foreign visitors; nevertheless, the number of visitors with Turkish citizenship has declined. However small, the number of visitors to the city during the year of 2013, both local and foreign, has had an increase. It has been observed that the number of visitors that stay overnight in the city have made up 7,48% of the total number of overnight stays during the year of 2012 and 9,19% during the year of 2013. Furthermore, it has been noted that the overnight stays in the city are not low and, together with increasing the number of facilities and improving winter tourism conditions, it is possible that the city can double its number of visitors in the short term, thus distributing the total number of visitors within the year.

Increasing the internal and external tourism revenues is closely related to the number of facilities and quality of the service provided in these facilities. There are 20 hotels in the city with tourism operating documents, 12 hotels with tourism investment documents, 22 hotels with municipality documents and 4 public facilities closely located to Mount Erciyes; making a total of 58 operating hotels within the city limits. These 58 hotels, presently providing services in the city, have a capacity of 3475 rooms and 6968 bedding.

From 12 of the hotels with investment documents, one of them is a 3 Star Hotels, four of them are 4 Star Hotels, one of them is a 5 Star Hotel and six of them are boutique hotels. It has been determined

that the hotels with investment documents are providing services with a capacity of 1101 rooms and 2290 bedding. From 20 of the hotels with investment documents, two of them are 2 Star Hotels, nine of them are 3 Star Hotels, five of them are 4 Star Hotels, two of them are 5 Star Hotels and 2 of them are boutique hotels. It has been determined that the hotels with investment documents are providing services with a capacity of 1568 rooms and 3187 bedding. Moreover, it has been established that the 4 public facilities situated around Mount Erciyes are providing services with a capacity of 119 rooms and 340 bedding.

Information with Regard to the Accommodation Facilities in the City of Kayseri

It has been observed that the city has a touristic potential due to its historical and natural characteristics; moreover, the fact that it is located in the Cappadocia Region is acknowledged as a major advantage. Mount Erciyes and its surrounding areas provide countless opportunities, especially for winter tourism, while the city itself as a whole provides opportunities in the areas of congress, cultural and religious tourism. The Tourism Plan of the Erciyes Region, with a scale of 1/25.000, will make it possible for the development of facilities for the accommodation of 4750 visitors and picnic spaces for 110.500 people, as well as a ski track and respective auxiliary facilities.

Source: Appraisal and Predictions Report for the Real Estate Industry in the City of Kayseri, GYODER, 2014

The 4 and 3 Star hotels in the district have been examined and special company prices have been obtained. The company prices in relation to the hotels in the city of Kayseri have been provided in the table below.

NAME OF THE HOTEL	STARS	TOTAL NUMBER OF ROOMS	TOTAL BEDDING CAPACITY
City One Hotel	4 STARS	100	200
Mirada Del Lago	4 STARS	105	264
Nüzhet Hotel	3 STARS	54	
Almer Hotel	3 STARS	75	
Ayata Hotel	3 STARS	49	86
Bent Hotel	3 STARS	40	90
Grand Ülger	3 STARS	33	
Lifos Hotel	3 STARS	42	

It has been noted that the special prices given for companies vary between 30 - 108 Euros, breakfast included.

5 INFORMATION IN REGARD TO THE REAL ESTATE SUBJECT TO THE APPRAISAL

5.1 Information in Regard to the Location, Site and Environment of the Real Estate

The real estate subject to the appraisal is situated at the address of Pervane Neighborhood, Kocasinan Boulevard No:161, Kayseri. According to the land registry information, it is registered in the city of Kayseri, district of Kocasinan, Neighborhood of Pervane, Section No: 349, Block No: 2420, Plot No:9. The plot contains two operating hotels, the 4 Star Novotel and the 3 Star Ibis Hotel.

To reach the real estate, one enters the Kayseri center coming from the Ankara direction and follows the Osman Kavuncu Boulevard and then the Park Boulevard, reaching the city center where the Governor Building and the Palace of Justice, as well as the Hilton Hotel are located. From the center, on the right, one follows the direction towards the Istasyon Avenue and continues for approximately 1 km, then taking the right to the Kocasinan Boulevard. The real estate subject to the appraisal is on the left of the avenue, after about 1,25 km. The real estate is situated at the Kocasinan Boulevard and the Mustafa Kemal Paşa Boulevard intersection, right next to the Chamber of Industry of Kayseri. The boulevard in question is a significant main road of the city center. The real estate is at a distance of approximately 3,5 – 4 km to the Kayseri Airport. Access to the region is easy by public transportation. The airport can be reached from the Mustafa Kemal Paşa Boulevard.

On the western side of the real estate is the Chamber of Industry of Kayseri and on the eastern side is an empty land belonging to the Chamber of Commerce of Kayseri, with a façade to the Kocasinan Boulevard. At the northern façade of the real estate (back façade) passes the state railway that connects the Ankara – Kayseri – Sivas line. In the plots that are towards the north of the railroad, there is an ongoing construction comprised of residential blocks for the last 1-2 years. There is the Provincial Bank, the District Governorship of Kocasinan, the Mevlana Mosque, the Nuh Mehmet Küçükçalık Anatolian High School, as well as the KASKI Building in the vicinity of the real estate.

The real estate subject to the appraisal is at a distance of 1,5 km to the Radison Blu Hotel, which has started to operate recently (1,5-2 months), the Forum Kayseri Shopping Mall and the Kayseri Metropolitan Municipality. In addition, it is at a distance of about 2,5 km to the Courthouse, the Governorship, the Hilton Hotel and the city center.

Page No	:	5913	5919

The real estate subject to the appraisal is registered at the Land Registry of Kocasinan, **Neighborhood of Pervane, volume no 56, page no 5913**. It consists of a "Reinforced Concrete Hotel and Its Land" and belongs to the "Chamber of Industry of Kayseri".

The real estate has been allocated an independent and permanent construction for the duration of 49 years, on behalf of Akfen Gayrimenkul Yatırım Ortaklığı A.Ş., and has been annotated so in the same land registry book (**Neighborhood of Pervane, volume no: 56**) page no: **5919**. The land registry information on both pages has been provided at the table below.

5.2.1 Investigation of the Land Registry of the Real Estate

According to the inspections performed, concerning the related pages of the land title book at the Land Registry Office for the district of Kocasinan, on the date of 26.12.2016 10:31 local time, in relation to the real estate subject to the appraisal, have been provided below. The document has been enclosed herewith.

Appurtenance Rights Section (Neighborhood of Pervane, volume no: 56, page no: 5913)

• The "right of construction" has been allocated independently and permanently. Surface area of 11.035,40 m², Starting Date: 20.08.2008, Duration: 49 Years, Owner/Lessor: Akfen Gayrimenkul Yatırım Ortaklığı A.Ş. dated 17.08.2007 and Roll No: 17645.

Annotations Section (Neighborhood of Pervane, volume no: 56, page no: 5919)

- There is a 26.09.2008 dated lease agreement with the Roll no: 25040 for the amount of 20.000.740,60 TL on behalf of Tamaris Turizm A.Ş. With regard to the 24.09.2008 dated letter with the number 11039 from the 6th Notary of Istanbul, there is a lease annotation for 12 years. (Starting Date: 25.09.2008, Duration: 12 Years).
- The duration of the lease agreement has been extended for another 13 years, by making an addition to the 26.09.2008 dated annotation with the Roll number 25040, for the lease annotation of 12 years, with the 10.10.2008 dated new annotation with the Roll no: 25726; thus making a total of 25 years of lease. The lease annotation has been renewed. (Duration: 13 years, Amount: 23.111.332,6 TL, Starting Date: 10.10.2008, Ending Date: 07.10.2021).

Pledges Section (Neighborhood of Pervane, volume no: 56, page no: 5919)

- First degree mortgage In favor of Credit Europe Bank, for the amount of 173.052.185,00 EURO, at an annual interest rate of 7,20, until its release is announced.
- Considerations: This mortgage is joint with the plots found at Block No: 774, Plot No: 55 in the Zeytinburnu Neighborhood / Istanbul, Block No: 3198, Plot No: 67 in the Osmangazi Altınova Neighborhood / Bursa, Block No: 5020, Plot No: 2 in the Şehitkamil Yaprak Neighborhood / Gaziantep, Block No: 404, Plot No: 39 in the Esenyurt Yakuplu / Istanbul, Block No: 1843, Plot No: 5 in the Akyurt Balıkhisar Neighborhood / Ankara and Block No. 585, Plot No: 2 with Independent Sections 1 and 2 in the Seyhan Çınarlı Neighborhood / Adana.

5.2.2 Changes that Have Occurred in the Land Registry of the Real Estate within the Last Three Years

There are no buying or selling activities with regard to the real estate, within the last three years.

5.2.3 Opinion Whether There Is an Obstacle In Including the Investment Trust Portfolio in Terms of Land Title Records to the Real Estate Within the Scope of the Capital Market Legislation

The real estate subject to the appraisal has an independent and permanent "Right of Construction" for the duration of 49 years, on behalf of Akfen Real Estate Investment Trust Inc.; there is a 25 years lease annotation and a 1st degree mortgage on the "Right of Construction" of Akfen Real Estate Investment Trust Inc. for the amount of 173.052.185,00 Euro, on behalf of Credit Europe Bank.

Regarding the mortgage recorded under real estate liens section obtained as the guarantee of project Financial Syndication Credits provided in the year of 2015, based on the letter received from the mortgagee Credit Bank Europe dated 27.12.2016, mortgage established on the real estate is related to investment credit to be used in the financing of the 8 hotels operating under the brand names of "IBIS" and "NOVOTEL" by ACCOR Group and one another still under construction which will be operating under the name of "IBIS" after its complement pursuant to the agreement made between Akfen Real Estate Investment Trust INC. and the ACCOR SA. Letter in question is provided in the attachment of the report. Credit Bank's letter on this is also enclosed herewith.

Pursuant to the 1st clause of the Article number 30 of the Communiqué Regarding the Real Estate Investment Trusts Principles, published in the 28.05.2013 dated official gazette of the Capital Market Board, Real Estate Investment Trusts can only institute mortgage, hypothecate or other limited rights on the assets in the portfolio during the purchase of real estates, real estate projects and rights with regard to a real estate for the purpose of referring to the financing of these actions or to provide credit for investments.

Pursuant to the related article of the communiqué in question, the mortgages on the real estate do not constitute an obstacle for the real estate to be included in the real estate investment trust portfolio within the scope of the capital market regulations.

Pursuant to the subparagraph "a" of the Article number 22 of the communiqué, with regard to the real estate investment trusts principles of the Capital Market Board regulations, the Real Estate Investment Trusts "can purchase, sell, lease, <u>lease out</u> and pledge to purchase or sell all sorts of real estate, such as land, plot, building, office building, shopping mall, hotel, logistic centers, warehouse, park and hospitals, for the purpose of achieving gross profit or lease revenue."

Pursuant to the Capital Market Board Regulations and the Article 22 of the Communiqué Regarding the Real Estate Investment Trusts Principles, there are no obstacles to prevent the "Construction Right" on the plot subject to the appraisal to be included in the Real Estate Investment Trusts portfolio.

5.3 Inspection of the Zoning Information of the Real Estate

According to the inspections carried out at the Kayseri Kocasinan Municipality Zoning and Urbanism Directorate, on the date of 16.11.2016 dated zoning status, the zoning status of the real estate has been described below:

The real estate subject to the appraisal, within the scope of the "Implementary Development Plan", with the registry date of 28.11.2008 and the scale of 1/1000, is included under the "Tourism Facility Area" legend. Construction conditions are;

<u>Example</u>: 0,90 – <u>Setback Distances</u>: Front Garden 30,00 m, Side Gardens 5,00 m each, Back Garden 10,00 m.

Zoning Status and Map has been enclosed herewith.

5.3.1 Plan, License, Diagram and Similar Documents with Regard to the Real Estate

<u>Approved Architectural Project</u>: There is a 11.02.2008 dated approved architectural project. Pursuant to the project, the total enclosed area corresponds to 10.998,53 m².

<u>Construction Permit</u>: "Construction Permit" covering an area of 11.064,00 m² that consists of; one "Hotel and Similar Accommodation Facility", dated 06.03.2008, number 1/28, with an enclosed area of 9.628,00 m²; one "Common Area (For the Purpose of Shelter in the Building)" with an enclosed area of 1.238,00 m² and an additional area of 198,00 m² to be used as "Water Storage Tank".

Occupancy Permit. "Occupancy Permit" covering an area of 11.064,00 m² that consists of; one "Hotel and Similar Accommodation Facility", dated 27.03.2008, number 1/37, with an enclosed area of 9.628,00 m²; one "Common Area (For the Purpose of Shelter in the Building)" with an enclosed area of 1.238,00 m² and an additional area of 198,00 m² to be used as "Water Storage Tank".

Conforming to the inspections carried out onsite, there are no differences to be found between the ongoing situation and the legal situation. The current building is effectively in accordance with the 27.03.2009 dated "Occupancy Permit" with the number 1/37.

5.3.2 Building Inspection Institution and Maintenance

Hotel license is dated 06.03.2008 and the city of Kayseri has been included in building inspection legislation since 01.01.2011.

5.3.3 Changes that Have Occurred in the Legal Status (Changes in the Zoning Plan, Nationalization, etc.) of the Real Estate within the Last Three Years

Pursuant to verbal information obtained from the Municipality of the District of Kocasinan, the Zoning and Urbanism Directorate it has been established that a change in the legal status of the real estate in the last three years is out of the question.

5.3.4 Opinion Whether the Necessary Permit and Documents Pursuant to the Legislation are Accurate and Complete

All of the necessary permits and licenses, such as the Zoning Status Document, the Approved Architectural Project, the Construction Permit and Occupancy Permit required by the Turkish Law, have been obtained in full, with regard to the hotel real estate subject to the appraisal.

5.3.5 Opinion Whether There Is an Obstacle in Including the Investment Trust Portfolio in Terms of Zoning Information to the Real Estate within the Scope of the Capital Market Legislation

There are no changes in the structuring conditions and the current zoning status of the plot where the real estate subject to this appraisal is located. The buildings presently found on the plot have the required approved architectural project, construction permit and occupancy permit; therefore, there are no obstacles that prevent the real estate from being included in the Real Estate Investment Trust portfolio in terms of zoning information, within the scope of the Capital Market Board regulations.

5.3.6 Statement that the Detailed Information, along with the Value in Question Regarding the Project, are Completely in Connection with the Project and that, in the case of Executing a Different Project, the Resulting Value Might Vary

The appraisal study in question is not carried out within the scope of the "project evaluation".

5.4 Physical Characteristics of the Real Estate

5.4.1 Structural Construction Characteristics of the Real Estate

The real estate subject to this appraisal study "Reinforced Concrete Hotel and Its Lands" is located in the city of Kayseri, district of Kocasinan, Neighborhood of Pervane, Block no: 2420, Plot no: 9, with a surface area of 11.035,40 m².

There is an existing building on the plot, which has been constructed in two blocks, in a partially attached manner and reinforced concrete; these two blocks are currently operating as the NOVOTEL and IBIS Hotel. The block corresponding to the NOVOTEL consists of a basement floor + ground floor + 5 regular floors, whereas the block corresponding to the IBIS hotel consists of a basement floor + ground floor + 8 regular floors. In relation to the Kocasinan Boulevard, where the plot has a façade to, the NOVOTEL part is placed more to the front than the IBIS Hotel part.

The real estate subject to the appraisal is appraised in two parts as the NOVOTEL and the IBIS Hotel; the NOVOTEL is a 4 Stars Hotel, while the IBIS Hotel is a 3 Stars Hotel.

With regard to the real estate subject to the appraisal study, a construction permit has been obtained for an area of 11.064,00 m²; pursuant to the aforementioned permit, the enclosed surface area specified in the architectural project is of 10.998,53 m². Since the real estate has been constructed in accordance with the architectural project, the appraisal report has been based on the enclosed surface area.

The total construction area corresponds to $10.998,53 \text{ m}^2$. The NOVOTEL construction area has $5.370.,68 \text{ m}^2$, while the IBIS Hotel construction area has $5.627,85 \text{ m}^2$. There are 96 rooms at the Novotel, while there are 160 at the Ibis Hotel.

According to the approved architectural project and the onsite inspection performed, the following facilities are located on the basement floor of the block used as the NOVOTEL, such as the water pressure room and administrative offices, staff dining hall, W.C.'s, laundry, medium tension room, UPS room (Unlimited Power Supply), technical atelier and storage, kitchen preparation section and dry goods storage, fitness center and infirmary. These areas are common spaces for the two, the NOVOTEL and the IBIS Hotel. The ground floor of the NOVOTEL is comprised of the reception area, lobby, restaurant, bar, foyer area, conference rooms, W.C.'s, luggage room, security rooms, administrative offices; the 1st, 2d, 3rd, 4th and 5th regular floors are comprised of the rooms. Even though the rooms in the NOVOTEL may have different characteristics, in reality there are two types of rooms; the first of these are the standard rooms, which have a surface area of 24,00 m², and the second one is the suite room with a surface area of 50,19 m². Having 20 standard rooms on the first floor and 18 standard and 1 suite on the remaining 2nd, 3rd, 4th and 5th floors, making 19 rooms on each floor, the NOVOTEL has a total of 96 rooms.

The basement floor of the IBIS Hotel consists of cold stores, boiler rooms, machine rooms and water storage tanks; these constitute the common spaces shared between the NOVOTEL and IBIS Hotel. The ground floor of the IBIS Hotel is comprised of the reception area, lobby, restaurant, bar, W.C.'s and administrative offices; the 1st, 2nd, 3rd, 4th, 5th, 6th, 7th and the 8th floors are comprised of the rooms, 20 on each, making a total of 160 rooms. The Ibis Hotel has two types of rooms available for service, with surface areas of 16,57 m² and 16,08 m², as well as 4 disabled rooms and standard rooms with varying characteristics.

The types of rooms and their respective distribution on the floors have been provided in the tables below:

NOVOTEL	1 st Floor	2 nd Floor	3 rd Floor	4 th Floor	5 th Floor	Total
Standard Room	15	10	10	10	13	58

The interior construction characteristics of the Novotel and the Ibis Hotel are provided below:

	Structural and Interior Construction Characteristics of the
	Novotel and the Ibis Hotel
Total Area	According to the architectural project and current status: 10.998,53 m ²
	According to the Construction Permit and Occupancy Permit: 11.064,00 m ²
	(Novotel 5.370,68 m² and Ibis Hotel 5.627,85 m²)
Age	5 Years
Construction Type	Concrete
Roof System	Terrace Roof
Manner	Attached Manner
Number of Floors	Novotel: 7 story (Basement + Ground Floor + 5 Regular Floor)
	<u>ibis Otel:</u> 10 story (Basement + Ground Floor + 8 Regular Floor)
Exterior Façade	Front and back façades are partially glass, partially sinterflex and the remaining areas are a
	special acrylic paint.
Electricity	Grid Connection
Heating System	Central
Water	Grid Connection
Sewage	Grid Connection
Elevator	Available (2 Elevators)
Ventilation System	Available
Fire Escape	Available
Fire Extinguisher System	Available
Car Park	Available (Open)
Flooring	Wall to wall carpet, ceramic and granite
Walls	Satin paint, ceramic tile, laminate and wall paper
Joineries	Exterior joineries are made of aluminum, while the interior joineries are wood
Ceilings	Suspended Ceiling
Heating	Central
Illumination	Wall lamps, chandelier, stand lamps, spot lightening and fluorescent
Exterior Façade	Front and back façades are partially glass, partially sinterflex and the remaining areas are a special acrylic paint.

Both the Novotel and the Ibis Hotel are partially covered with glass and sinterflex on the front and back façades, while the remaining spaces are painted with acrylic paint. The side façades of the building have been painted with a special acrylic paint. The building entrances are accessed through large spacious doors, which have been covered with a canopy. There are no rooms at the entrance (ground) floor in neither of the hotels. Additionally, there is a common space between the buildings that serves as a service hall; in this area, there is a staircase that enables the passage to and from the buildings, as well as a service elevator.

5.4.2 Inspections Performed Within the Premises of the Real Estate

- Novotel and Ibis Hotel consist of a building block that has been constructed in an attached manner; these two operate as two separate hotels.
- Novotel consists of basement floor + ground floor + 5 regular floors and has a total of 7 floors,
 while Ibis hotel consists of basement floor + ground floor + 8 regular floors and has a total of 10 floors.

Floor Areas (m²)	Novotel	Ibis Hotel
Basement Floor	945,83	447,28
Ground Floor	875,7	686,73
1 st Regular Floor	707,71	561,73
2 nd Regular Floor	710,36	561,73
3 rd Regular Floor	710,36	561,73
4 th Regular Floor	710,36	561,73
5 th Regular Floor	710,36	561,73
6 th Regular Floor	-	561,73
7 th Regular Floor	-	561,73
8 th Regular Floor	-	561,73
	5.370,68	5.627,85

- The hotels are situated in a central area of the city, close to important arterial roads, public agencies and institutions. The hotels are easily accessible.
- The buildings have customer and service elevators, as well as fire alarm and extinguisher systems, ventilation, heating and air conditioning systems.
- The car park area in the hotel is a shared space, used in common by both of the hotels. Moreover, there is only an existing open car park available. Closed car park is not available.
- The circumference of the hotel is encompassed with a concrete wall and barbed wire of 1,00 and 1,50 m altitude.
- There is a substation, as well as a portable generator on the plot.
- The empty areas of the plot that are not within the building are covered in concrete; there
 are partially green spaces. There is no closed car park. The majority of the open spaces of the
 hotels are used for open car park. There is a car park with a capacity for 113 vehicles.
 Moreover, there is an ornamental pool.
- Other items of note, which have been detected in the area and, thusly, have been included in
 the appraisal report, are the substation building, concrete spaces, landscape works, and
 concrete wall encompassing the plot, sentry box and ornamental pool. The cost of external
 and miscellaneous works has been included as an additional cost to the calculations made
 according to the cost approach.

- The visitor entries to the facilities are made from different entrances through the ground floor. Moreover, there is a service section reserved for staff, which enables the passage between the buildings on each floor.
- The glass clad area with an area of 30,00 m² at the back façade of the hotel subject to the appraisal does not pose a problem in the legal status of the building, although it is not included in the architectural project, on the grounds that it is of a portable quality and does not affect the support of the building.

6 FACTORS AFFECTING AND DETERMINING THE VALUE OF THE REAL ESTATE

6.1 Factors that Limit or Negatively Affect the Appraisal Process

There are no limiting or negatively affecting factors hindering the appraisal studies in question.

6.2 Swot Analysis

Strengths

- The Hotels have high visibility and marketing capabilities due to their location.
- The facilities are situated at the intersection of main arteries. Transportation and accessibility opportunities are ample. The airport is at a distance of 3,5 4 km.
- The city of Kayseri is developing at a steady pace in terms of urbanism.
- The city of Kayseri is an industrially and commercially developed and still developing city.
- The Lessee are the hotel facilities that are operated under 2 different brands (NOVOTEL and IBIS Hotel) by the international hotel operating company Accor Group; the lease agreement with a duration of 25 years has been recorded in the land registry book.

Weaknesses

• The car park area is a common area used by both hotels and there is no closed car park within the facilities. Only an open car park is available.

Opportunities

- There are no 3 or 4 Star Hotels with similar characteristics in the vicinity of the real estate subject to the appraisal that has been recently constructed and operated under a known brand.
- It has been noted that the new headquarters of the Chamber of Commerce of Kayseri will be constructed in the plot east of the real estate.

Threats

- The Rodison Blu Hotel, which is located at a distance of 1,5 km to the real estate subject to the appraisal, has started to operate in the last 1,5 2 months.
- Decrease in the transfer of grants to developing countries is expected after US Central Bank had ended monetary easing. This situation may have negative impacts in real estate market in general.

6.3 Exemplary Share Rate in the Projects that Will Be Performed According to the Revenue Sharing and Flat for Land Methods

Revenue Sharing and Flat for Land Methods have not been employed throughout this appraisal study.

6.4 Methods and Eligibility Motives Employed in the Appraisal of the Real Estate

Since the real estate subject to this appraisal study is a revenue generating Hotel, the Revenue Approach and Cost Approach Methods have been employed. In the Cost Approach Method, the "Land value" has been determined according to the Exemplary Approach.

6.4.1 Exemplary Approach

As a result of the surveys performed in the vicinity of the real estate, no other recently sold exemplary hotels with a similar location, nature and structuring conditions to that of the real estate subject to the appraisal have been found. However, it has been noted there have been sales of lands close to the real estate subject to the appraisal, with commercial zoning, in recent years (2008 and 2013).

6.4.1.1 Definitions and Sale Value of the Similar Sales Examples that Has Been Based Upon During the Appraisal and the Reasons Why They Have Been Employed

The exemplary lands with commercial and residential zoning that have been sold and are still for sale have been provided in the chart below:

EXAMPLE	Location	Characteristics	Area (m²)	Price (TL)	Unit Price per m² (TL)	Source				
1	Yeni Pervane Quarter. Back side of real estate	residential zoning land, E=1.5 lot with structuring condition	8135	10.000.000	1.229	Turgem Real Estate 0352 222 00 10

- As a result of the surveys performed, it has been noted that the land stock with "Tourism Facility Zoning" in the same area as the real estate subject to the appraisal is limited and that it has been difficult to find a comparable concrete example with similar structural characteristics that has been sold recently.
- As a consequence, from the research and interviews carried out in the area, the appraisal with regard to the plot has been conducted by taking into account the above provided examples; moreover, the total price of the property has been estimated to be 1.400 TL m².
- 1/3 of the unit price per m² of the land value has been determined as bare ownership and 2/3 as the lease right value for the duration of 49 years of lease.
- The total lease right for the duration of 49 years has been calculated by comparing the remaining lease duration, on the date that this report has been prepared, to the total duration time and determining the price per m² of the right of construction.

Unit Price per m ² Land Value of the Remaining Time for the	885 TL
Right of Construction* (TL)	
Size of the Land (m²)	11.035,4 m²
Total Land Value (TL)	9.767.605 TL
Total Land Value (Euro)	2.647.478€
Unit Land Value (TL)	1.600 TL
Right of Construction Value Rate	2/3
Remaining Time for Right of Construction (YEARS)	40,66
Unit Price per m ² Land Value of the Remaining Time for the	885 TL
Right of Construction * (TL)	
* When the remaining time value resulting from the right of co	nstruction of the land is calculated, for the
right of construction value of the land, it has been employed as	2/3 at the first step. Afterwards, the
remaining time from the right of construction is calculated in or	der to determine the current unit value of
the land for the right of construction.	
	=(Unit Land Value x The coefficient of the
Unit Land Value of the Remaining Time for the Right of	right of construction for 49 years x The
Construction	remaining time from the right of
	construction)
Unit Land Value of the Remaining Time for the Right of	(4.500 T) 2/2 40.55 (40)
Construction	=(1.600 TL x 2/3 x 40,66 /49)

Professional Opinion of the Appraiser:

Taking into account the factors relative to the real estate subject to the appraisal, such as its location, the area of the plot, zoning status with tourism facility, formation of its vicinity, existence of two hotel buildings on the plot that are operational and bring in revenue, possessing all the required legal permits and classifications, legal status and the prices of the surrounding real estate examples, the land unit sale value has been estimated to be **1.600 TL/m²**. On the other hand, the price of the land per m² of the remaining time for the right of construction has been calculated as 885 TL.

6.4.2 Cost Approach

The building cost values in this analysis, with the cost generation approach, the technical specifications of the buildings, the material and labor quality that has been employed during the construction of the buildings, the construction values of the buildings that have similar characteristics in the market, the industry experience relative to similar hotel costs and the construction costs in relation to the real estate subject to the appraisal submitted by Akfen Real Estate Investment Trust Inc. have been taken into consideration.

^(*) The total construction cost value has been calculated by scrutinizing the verified construction cost information taken from Akfen Real Estate Investment Trust Inc. together with our industry experience in relation to the similar hotel costs.

^(**) The date of completion of the construction of the real estate subject to the appraisal is 27.03.2009. The appraisal has been conducted by taking into consideration the age and physical status of the real estate.

^(***) An approximate cost has been established for costs such as field concrete, barbed wire encompassing the plot, arrangement of open car park, etc.

6.4.3 Cost Discount / Development Approach

Considering that the real estate subject to this appraisal study is a property that brings in revenue, the revenue approach method has not been employed. The NOVOTEL and the IBIS Hotel projections have been presented separately.

NOVOTEL PROJECTION:

- NOVOTEL consists of 96 rooms.
- It has been estimated that the occupancy rate of the hotel in the year of 2017 will be of 580% and that this rate will increase until the year of 2030, which will then reach 80%, thus continuing in this manner, in the following years.
- It has been assumed that the hotel will be operating 365 days a year.
- The hotel prices have been calculated based on the room-breakfast system. Taking into account the performance of the hotel in the previous year, along with the surveys performed in regard to the tourism industry in the area, it has been estimated that the average price for a room will be 38 EUR, in the year of 2017. Moreover, it has been anticipated that this price will increase based on the inflation in the Euro Zone (2,5%) annually
- Considering the performance of the facility, it has been assumed that the room revenues will
 constitute 68 % of the total revenue, whereas the total department revenues will be around
 33 %.
- The gross operating profit has been calculated by subtracting the department and operating expenses from the total revenues. It has been determined that the Gross Operating Profit (GOP) in the hotel will be of 25% in the year of 2017 and that it will remain this way in the following years. Moreover, it has been anticipated that this price will increase based on the inflation in the Euro Zone (2,5%) annually, and it will leads to % 41 at the and of the property right.

IBIS HOTEL PROJECTION:

- The hotel subject to the appraisal consists of 160 rooms.
- It has been estimated that the occupancy rate of the hotel in the year of 2017 will be of 61% and that this rate will increase until the year of 2023, which will then reach 70%, thus continuing in this manner, in the following years and it will finally leads to 77%, and will survive operating 77%.
- It has been assumed that the hotel will be operating 365 days a year.
- The hotel prices have been calculated based on the room-breakfast system. Taking into account the performance of the hotel in the previous year, along with the surveys performed in regard to the tourism industry in the area, it has been estimated that the average price for a room will be 32 EUR, in the year of 2017. It has been estimated that the average price for a room will be 32 EUR, in the year of 2018., it has been estimated that the average price for a room will be 33 EUR, in the year of 2019, it has been estimated that the average price for a room will be 36 EUR, in the year of 2020, it has been estimated that the average price for a room will be 40 EUR, in the year of 2021, it has been estimated that the average price for a room will be 126 EUR, in the year of 2057.
- Moreover, it has been anticipated that this price will increase based on the inflation in the Euro Zone (2,5%) annually
- Considering the performance of the facility, it has been assumed that the room revenues will constitute 84% of the total revenue, whereas the total department revenues will be around 16%.
- The gross operating profit has been calculated by subtracting the department and operating expenses from the total revenues. It has been determined that the Gross Operating Profit (GOP) in the hotel will be of 35 % in the year of 2017. It has been determined that the Gross Operating Profit (GOP) in the hotel will be of 35 % in the year of 2018, It has been determined that the Gross Operating Profit (GOP) in the hotel will be of 36 % in the year of 2019, It has been determined that the Gross Operating Profit (GOP) in the hotel will be of 37 % in the year of 2020. It will reach to 49 % in the year of 2057.

General Assumptions (for the NOVOTEL and the IBIS Hotel)

- It has been agreed upon that the aforementioned real estate tax will be of 22.385 Euro for the year of 2016 and that it will increase at a rate of 3% annually.
- According to the information obtained from Akfen Real Estate Investment Trust Inc., it has been
 acknowledged that the insurance value for the year of 2017 will be of 10.770 Euro and that it will
 remain so, on account of the estimation made that there will not be any increases in the
 insurance premium by Akfen Real Estate Investment Trust Inc. in the following years.
- Furniture Fixture Renovation Reserve has been obtained by reason of the agreements executed with ACCOR; as a result, it has been determined that the rate will consist of 3,5% of the annual gross revenue.
- The annually paid Construction Right value has been agreed upon by the construction right agreement signed between Akfen Real Estate Investment Trust Inc. and the Chamber of Industry of Kayseri.
- Pursuant to the lease agreement between Akfen Real Estate Investment Trust Inc. and the Chamber of Industry of Kayseri, it has been agreed upon that the annual "Right of Construction" value will be of 50.000 USD (40.000 Euro) annually for the year of 2014 (the first 5 years will not be paid); additionally, throughout the years of 2019 and 2023, it will be of 105.000 USD (84.000 Euro); in the year of 2024, it will be of 140.000 USD (112.000 Euro) and from the year of 2025 onwards, it will increase 1.400 USD (1.120 Euro) and, thusly, continue in this manner.
- When the 49 years lease is terminated, the facilities will be transferred back to the Chamber of Industry of Kayseri.
- In the appraisal study, the 10 year Eurobond interest rate of 7,21 % has been employed as the "Risk Free Revenue Rate". (In this appraisal study, the most ready 10 year EURO base Eurobond revenue rate has been employed as the risk free revenue rate.)
- The discount rate has been determined as 11,54% in the Projection.
- In the course of the studies, the exchange rate for 1 EUR has been acknowledged at 3,6894 TL, in accordance with the 13.12.2016 dated buying rate exchange of the Central Bank of Turkey.
- It has been assumed that all payments are made in cash.
- Throughout the course of the studies, the Euro Zone inflation rate of 2,5% has been employed as the inflation rate.
- A more realistic net present value has been calculated considering the mid-year factor (0,5) in net present value calculations.
- Within the scope of the International Valuation Standards (IVSC), taxes and VAT have not been included in the studies.

6.4.3 Value of the Real Estate with Regard to the Lease Revenue

According to the Lease conditions documents submitted to our company by Akfen GYO A.Ş.;

- For the hotel subject to this appraisal study, for which Akfen Real Estate Investment Trust Inc. has a "Construction Right", it has been established that, for the annual lease amount, the international hotel operating company Accor Group will pay 22% (twenty two) of its gross profit to the Novotel Hotel, 25% (twenty five) of its gross profit to the Ibis Hotel or the amount higher than 70% of its adjusted gross profit (AGOP) for the year of 2015. Pursuant to the agreement terms, from the year of 2016 onwards, the share ratio of the adjusted gross profit (AGOP) has been established at 72,5%.
- The Adjusted Gross Operating Profit (AGOP) has been calculated by subtracting a ratio of 4% operator share, which will be paid to ACCOR, from the gross operating profit (GOP) and a ratio of 4% Furniture Fixture and Renovation Reserve from the gross revenue.

Adjusted Gross Operating Profit = Gross Operating Profit - Accor Fee + Furniture and Fixture Renovation Reserve.

- The "Construction Right" of the hotel subject to this appraisal study belongs to Akfen Real Estate Investment Trust Inc. and the hotel is being operated by the international hotel operating company Accor Group. It has been assumed that the hotel will be operated according to the current concept, throughout the duration of the "Construction Right".
- It has been assumed that the hotel will be operating 365 days a year.
- Pursuant to the lease agreement between Akfen Real Estate Investment Trust Inc.. and the Chamber of Industry of Kayseri, it has been agreed upon that the annual "Right of Construction" value will be of 40.000 Euro annually for the year of 2014 (the first 5 years will not be paid); additionally, throughout the years of 2019 and 2023, it will be of 84.000 Euro; in the year of 2024, it will be of 112.000 Euro and, from the year of 2025 onwards, it will increase 1.120 Euro (1.400 USD) and, thusly, continue in this manner.
- The renovation expenses, which will be met by the investor for the lease of the hotel, have been based on the ratio of 5% of the renovation expenses calculated in the lease alternative.
- It has been acknowledged that a joint real estate tax will be paid for both of the hotels. Pursuant to the information obtained from Akfen Real Estate Investment Trust Inc., real estate tax is be of 22.763 for the year of 2016 and that it will increase at a rate of 3% annually.
- According to the information obtained from Akfen Real Estate Investment Trust Inc., it has been acknowledged that the insurance value for the year of 2016 will be of 13.395,81 Euro and that it

48

will remain so, on account of the estimation made that there will not be any increases in the insurance premium by Akfen Real Estate Investment Trust Inc. in the following years.

- The lease revenue generated in relation to the hotel leased out to the Accor Group has been guaranteed with a lease agreement for the duration of 25 years. It has been assumed that the risk premiums in obtaining the lease revenue will be low for Akfen Real Estate Investment Trust Inc. and, therefore, it has been calculated accordingly. The discount rate has been estimated at 8% by adding a 4,80% "Risk Premium" to the 3,20% to the Risk Free Revenue.
- In the course of the studies, the exchange rate for 1 EUR has been acknowledged at 3,0898 TL, in accordance with the 02.11.2015 dated buying rate exchange of the Central Bank of Turkey.
- Throughout the course of the studies, the Euro Zone inflation rate of 2,5% has been employed as the inflation rate.
- A more realistic net present value has been calculated considering the mid-year factor (0,5) in net present value calculations.
- Within the scope of the International Valuation Standards (IVSC), taxes and VAT have not been included in the studies.

6.4.4 Lease Value Analysis and the Data Employed

The lease value of the construction right subject to the appraisal has been calculated taking into consideration the revenue discount method and the average cash flow value. The annual lease value of the real estate has been calculated by reducing the 1st year cash flow average to the appraisal day. According to this calculation, the annual lease value of the hotel is **510.167.- EURO (1.882.000- TL).** The discount rate has been determined to be of 10,45.%

Date	31.12.2016	31.12.2017
Annual Lease Revenue	0	538.790
Net Current Value of the Annual Lease Value (EURO)	510.167	
Net Current Value of the Annual Lease Value (TL)	1.882.000	

6.4.5 Empty Land and Project Values of the Terrain Where the Project is Being Developed The appraisal study in question does not enter the scope of "project evaluation".

6.4.6 Most Effective and Most Productive Use Analysis

It has been appraised that the current use of the real estate in question (as a hotel), in accordance with the zoning status and structuring conditions, consists of the most effectively appropriate and productive use for the property.

6.4.7 Appraisal Analysis of Common or Divided Parts

There are two hotels operating separately on the plot, under the names NOVOTEL and IBIS Hotel. In accordance with the Cost Approach and the revenue projections in the Revenue Approach, both of the structure values have been calculated separately for each of the hotels. However, on the grounds that the ownership of the real estate belongs to the Chamber of Industry of Kayseri, that Akfen Real Estate Investment Trust Inc. has a construction right on the totality of the real estate for the duration of 49 years and that the transfer or assignment of this right, wholly or partially, is out of the question; the right of construction value of the entire real estate has been appraised accordingly.

6.5 Alignment of Different Appraisal Methods and Analysis Results, together with the Explanation of the Method and the Reasons Used for this Purpose

On the grounds that the real estate subject to this appraisal study consists of a property operating as a revenue bringing hotel, the Revenue Approach and Cost Approach Methods have been employed. In the Cost Approach Method, the "Land Value" has been determined according to the Example Comparison Method.

The total value in the cost method, including the land, has been calculated **12.254.802 Euro** (45.213.000 TL).

As a result of the discount of the potential revenue of the structure on the plot that will be generated during the remainder of the 49 years of the lease agreement, in accordance with the revenue discount approach, the net current value of the HOTEL has been calculated to 13.090.000.- Euro(48.294.000.- TL). The amount determined to be paid to the Akfen Real Estate Investment Trust Inc. by the Accor Group, with the use of the lease revenue discount method, is 9.730.000.- Euro (35.898.000.- TL)The final value of the hotel has been calculated to be 11.410.000.- Euro (42.096.000.- TL), based on the approximate arithmetic average of the value calculated by both of the methods.

The lease value of the real estate, since the date of 31.12.2016, has been calculated by taking into consideration the average cash flow of the first year, in accordance with the revenue discount approach and the lease revenue. The annual lease value of the real estate has been calculated by reducing the annual average net cash flow to the day when the appraisal study is performed. Pursuant to this calculation, the annual lease value has been determined to be **510.162,- Euro (1.882.000,-TL)**.

During the course of the appraisal study, the revenue discount approach and cost approach have both been applied, in terms of revenue capitalization and lease revenues.

The real estate subject to the appraisal constitutes a revenue generating property and, therefore, the values calculated with the use of the revenue approach and lease value analysis result in more accurate values, concerning this sort of properties. In addition, the value calculated through the use of the cost method has been ruled out in the final appraisal value.

In the cost discount method, from the total revenue that the real estate will generate, the gross operating revenue and net operating revenues have been calculated, respectively.

In the discount model pursuant to the lease revenue, the lease revenues have been evaluated and the calculations have been made in accordance with the value obtained. Different discount rates

have been employed in both models. Since there is a guaranteed lease revenue in the lease revenue analysis, the risk premium is lower.

While the value of the real estate according to the revenue discount approach was being determined, in the 1st model the revenue obtained by operating the real estate without a brand name has been calculated and in the 2nd model the revenue obtained by operating by leasing it out to a brand (Accor) has been calculated. Both models are methods that are exercised in the market and, thusly, the final appraisal has been determined by calculating the average of their outcome.

The insurance policy belonging to the real estate subject to the appraisal study has been supplied by Akfen Real Estate Investment Trust Inc. and has been enclosed herewith. Accordingly, it has been noted that the insurance value of the real estate is 5.987.500 Euro.

6.6 Explanation of the Motives Pursuant to the Minimum Information for Not Including Certain Aspects in the Report

There is no information that has not been included in the minimum information.

6.7 Information Concerning the Last Three Appraisal of the Real Estate Carried Out by the Company
