3.4 <u>Information regarding the purchase and sale transactions that took place in the last three years, if any, and the changes in the legal status of the real estate (changes in the zoning plan, expropriation transactions, etc.)</u>

It has not been subject to purchase and sale in the last three years. There is no change in its zoning and legal status.

3.5 Information on the Zoning Status of the Real Estate and the Region in Which it is Located

According to the verbal information obtained from the Kocasinan Municipality, the subject real estate remains in the Tourism Facility Area, according to the 1/1.000 scale Implementary Zoning Plan of the said real estate, and has construction conditions of E:0,90 Hmaks: with a setback distance of 30 m from the road and 5 m from the side.

3.6 Explanations Regarding the Suspension Decision, Demolition Decision, Risky Building Detection, etc. Taken for the Real Estate

As a result of the document examinations and verbal inquiries made at the Kocasinan Municipality zoning service for the real estate in question, it was observed that there were no negative decisions, etc.

3.7 <u>Information on Contracts Concluded for the Real Estate (Preliminay Contract for Real Estate Sale, Construction Contract in Return for Flat or Revenue Sharing Contracts, etc.)</u>

The aforesaid right of construction is registered in favor of Akfen Gayrimenkul Yatırım Ortaklığı A.Ş. It has a 49-year right of construction from 20.08.2008 to 20.08.2057. In the official contract regarding the right of construction, it is seen that the independent and permanent right of construction has a duration of 49 years, that the right of easement can be transferred to third parties, that, at the end of the period, the building subject to the easement will pass to the owner of the real estate free of charge, that there will be no easement payment for the first year, and for the following years it is as the prices specified in the contract.

Below are the provisions regarding the right of construction in the relevant articles of the Civil Code.

Right of construction

Article 726- The ownership of buildings that are built to remain permanently under or on top of a land belonging to someone else, based on a right of construction, shall belong to the owner of the right of easement. Establishment of condominium or construction servitude on the independent sections of a building that are suitable for use on their own is subject to the Property Ownership Law. A separate right of construction cannot be established on independent sections.

Article 826- A real estate owner may establish an easement right in favor of a third party that gives the authority to construct a building above or below his land or to preserve an existing building. Unless otherwise agreed, this right is transferable and passes to heirs. If the right of construction is independent and permanent, it can be registered as an immovable in the land registry upon the request of the owner of the right of construction. The right of construction established for at least thirty years is of a permanent nature.

Article 827- The contractual records regarding the location, shape, quality, dimensions of the building, the purpose of designation and the use of the area without a building, which are included in the official deed regarding the content and scope of the right of construction, are binding for everyone.

Article 828- When the right of construction expires, the buildings remain with the land owner and become an integral part of the land. If the independent and permanent right of construction is registered as immovable in the land registry, this page is closed when the right of construction expires. The pledge rights, all other rights, restrictions and obligations of the land to the right of construction and obligations of the land to the right of construction and obligations of the land to the right of construction and obligations of the land to the right of construction and obligations of the land owner and become an integral part of the land. If the land registry, this page is closed when the right of construction is registered as immovable in the land registry, this page is closed when the right of construction is registered as immovable in the land registry, this page is closed when the right of construction is registered as immovable in the land registry, this page is closed when the right of construction is registered as immovable in the land registry, this page is closed when the right of construction is registered as immovable in the land registry, this page is closed when the right of construction is registered as immovable in the land registry, this page is closed when the right of construction is registered as immovable in the land registry. registered as immovable also expire with the closing of the page. The provisions regarding the price are reserved.

Article 829- Unless otherwise agreed, the owner of the immovable does not pay any price to the owner of the right of construction for the remaining buildings. If an appropriate amount is decided to be paid, its amount and method of calculation are determined. The price agreed to be paid constitutes the assurance of the unpaid receivables of the creditors whose right of construction has been pledged for them, and is not paid to the owner of the construction without their consent. If the agreed price is not paid or secured, the owner of the right of construction or the creditor to whom this right has been pledged may request the registration of a mortgage of the same degree and order, instead of the abandoned right of construction, with the assurance that he will receive the price. This mortgage is registered within three months, starting from the expiration of the right of construction.

Article 830- The amount of the price agreed to be paid to the owner of the right of construction for the buildings left to the real estate owner, the way it was calculated, and the agreements regarding the removal of this price debt and the restoration of the land to its original state are subject to the official form required for the establishment of the right of construction and an annotation can be made in the land registry.

3.8 Information on Building Licenses, Modification Licenses, and Building Occupation Permits for Real Estates and Real Estate Projects, and Information on Whether All Permissions Required to be Obtained in accordance with the Legislation have been Obtained and Whether the Documents Legally Required are Fully and Correctly Available

It has been observed that the permits required to be obtained in accordance with the legislation for the real estate subject to the report have been obtained and that the legally required documents are fully and correctly available.

Architectural Project: Approved on 11.02.2008

<u>Building License:</u> It was given for the construction area of 11,064 m2 on 06.03.2008 with number 1/28.

Occupancy Permit: It was given for the construction area of 11,064 m2 on 27.03.2009 with number 1/37.

Tourism Operation Certificate: 22.07.2008 - 11514

Novotel Kayseri (4 Star hotel): 91 Rooms+2 Physically Handicapped Rooms+3 Suits-192 Beds, 2nd Class restaurant for 100 people, multi-purpose hall for 95 people, multi-purpose hall for 55 people, cafeteria-snack bar for 45 people, meeting room for 18 people, study office, reading area, American bar, gymnasium, volleyball court, mini golf, sales unit, parking lot for 44 cars.

Ibis Hotel Kayseri (3 star hotel): 156 Rooms+2 Physically Handicapped Rooms-320 Beds, 2nd Class restaurant for 100 people, American bar, parking lot for 74 cars.

3.9 Information About the Building Inspection Institution (Trade Name, Address, etc.) Performing Inspections in accordance with the Law No. 4708 on Building Inspection dated 29/6/2001, in relation to the Projects Appraised, and the Inspections it Carried Out Regarding the Appraised Real Estate

The real estate subject to the appraisal is not subject to building inspection in accordance with Article 11 of the "Law No. 4708 on Building Inspection" dated 29.06.2001. The province of Kayseri has entered into the scope of the Building Inspection Law as of 01.01.0211.

3.10 If appraisal is performed on the basis of a specific project, detailed information about the project and an explanation that the plans and the value in question are entirely related to the current project and that the value to be found may be different if a different project is implemented. There is a building, the kind of which has been changed, used as a hotel on the parcel in question. The appraisal has been made regarding the current project and legal documents prepared and approved for this real estate. A different project appraisal has not been made.

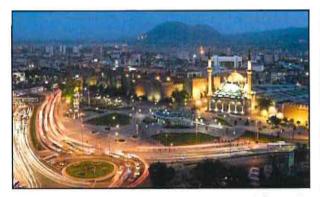

3.11 Information on the Energy Efficiency Certificate of the Real Estate, If Any

There is an energy identification certificate with the number S34E2D66E85E9 dated 08.02.2017 belonging to the real estate in question.

4. PHYSICAL PROPERTIES OF THE REAL ESTATE

4.1 Analysis of the Area Where the Real Estate is Located and the Data Used

Kayseri is a province of Turkey. It is the third largest city and industrial center of Central Anatolia after Ankara and Konya. It consists of 16 districts, namely Akkışla, Bünyan, Develi, Hacılar, İncesu, Kocasinan, Melikgazi, Pınarbaşı, Sarıoğlan, Sariz, Tomarza, Yahyalı, Talas, Özvatan, Felahiye and Yeşilhisar. It is a province on the skirts of Erciyes Mountain in the Middle Kızılırmak Section. It is surrounded by Yozgat in the north and northwest, Sivas in the north and northeast, Kahramanmaraş in the east, Adana in the south, Niğde in the southwest and Nevşehir in the west. Kayseri (formerly Mazaka, Kaisareia), one of the oldest cities in the world, is in the region called Cappadocia in classical times. Located south of Kızılırmak, this region extends from Salt Lake to the Euphrates River. Silk Road passes through here. The region has been hosted many civilizations.

Kayseri has a history of 6000 years, from 4000 BC to 2000 AC. The Hittites, who came to Anatolia in 2000 BC, established the city of Kültepe (Kaniş), which is 22 km away from Kayseri. Kültepe is the largest city on the Kayseri plain and one of the largest mounds in Anatolia. Various tablets written in cuneiform from this period were found during the excavations in Karum (Pazarşehir), which is right next to Kültepe, and information on the commercial relations between Assyrian

merchants and Hittite locals was obtained from these tablets. Kültepe was inhabited continuously from 4000 BC until the end of the Roman period.

Kayseri is located in the Middle Kızılırmak section, where the southern part of Central Anatolia and the Taurus Mountains converge. It is located between 37 degrees 45 minutes and 38 degrees 18 minutes north latitude and 34 degrees 56 minutes and 36 degrees 58 minutes east longitudes. It is surrounded by Sivas in the east and northeast, Yozgat in the north, Nevşehir in the west, Niğde in the southwest, Adana and Kahramanmaraş in the south. The Haydarpaşa - Kars railway, built in 1929, passes through the administrative borders.

Kayseri is among the 2nd degree developed provinces. Industrial sites and large organized industrial zones can be considered as the infrastructure of the industrial sector. Nearly 3500 workplaces were built in Kayseri within the scope of CSR. There are 8 CSRs operating in the province. There are 3 organized industrial zones in Kayseri. Mimarsinan Organized Industrial Zone and Incesu Organized Industrial Zones outside the 1st Organized Industrial Zone started operating in 2005. Within the framework of industrial infrastructure, Kayseri Free Zone also has an important place. Kayseri Free Zone has the largest free zone area in Turkey.

About Kocasinan District: Kocasinan district does not have an independent historical structure. It is in the historical structure of Kayseri province, as it was born within the body of the city of Kayseri. For this reason, the historical structure of the district should be considered within the historical structure of the city center. The city of Kayseri is in the region called Cappadocia in classical times, and the Hittite City Principalities dominated between 2000-1750 BC. Later (1200-700 BC) Young Hittite Period comes. Median and Persian domination begins in 600-500 BC. Later, Alexander and Diadoxes dominate the region. After the death of Alexander, the Anatolian lands are shared among the Divadoxes. After Kayseri became the center of the Independent Kingdom of Cappadocia, this Kingdom became ruled by Rome. After the division of the Roman Empire into two in 395, the region within the borders of the Eastern Roman Empire has preserved its importance until today. With around 390 industrial establishments operating in the region, approximately 30 thousand people are employed. There is also Gazi University Kocasinan campus within the boundaries of the district. Kocasinan district is located in the central Kızılırmak section of the Central Anatolian region. It is located at 33 degrees 30 minutes longitude and 38 degrees 45 minutes North latitude. The area of the district municipality borders is 9025 hectares. There are many plains at the height of the mountains within the borders of Kocasinan. The district center was established on a plain with an altitude of 1055. There are 116 neighborhoods affiliated to the District Municipality. In terms of the social situation of Kocasinan District, there is not much difference between the social situation and life in the city center and the social situation and life in the regions close to the city center. In the Neighborhoods, which are outside the Local Zoning Plan, beet farming is mainly carried out in the areas where irrigated agriculture is carried out. Since artificial insemination studies in animal husbandry could not be carried out properly, cows called domestic breeds are still seen, and modern chicken farms have been established in neighborhoods outside the district center.

4.2 Analysis of Current Economic Conditions, Real Estate Market, Current Trends and Reference Data and Their Effects on the Value of Real Estate Some Economic Data and Statistics

Δ Population;

As of 31 December 2020, the population residing in Turkey increased by 459 thousand 365 people compared to the previous year and reached 83 million 614 thousand 362 people. While the male population was 41 million 915 thousand 985 persons, the female population was 41 million 698 thousand 377 persons. In other words, 50.1% of the total population is men and 49.9% is women. (TUIK)

Δ CBRT and FED Interest Rate Change;

According to the latest data announced by the Central Bank of the Republic of Turkey, the interest rate is 19.00%. This ratio, which changed between 2010 and 2018 on average between 5.0% - 7.5%, has risen above the level of 20.00% as of May 2018, dropped below 10.00% as of 2020, started to decline as of the 15th of November, and was 14% in the middle of December.

According to the latest data announced by the US Federal Reserve, the interest rate is 0.25%. While it increased to the level of 2.50% as of 2017 – 2019, the interest rate gradually decreased as of 2021 and continues to remain below 0.50%.

Considering the next 6-year period of government Eurobonds, the sales rate of return in Euro denominated at the end of 6 years is approximately 4.20%. In determining these rates, the return rates of the most liquid bonds were determined as the risk-free rate of return.

Δ Real Estate and Construction Sector in Turkey;

In the face of the exchange rate fluctuation we experienced in 2018 and the related developments, it seemed that the balancing was achieved to a great extent in 2019 with the arrangements made after the YEP decisions taken in economic terms. Annual GDP, as a chained volume index, increased by 0.9 percent in 2019 compared to the previous year. However, on a sectoral basis, while the total value added of finance and insurance activities increased by 7.4 percent, public administration, education, human health and social service activities increased by 4.6 percent, other service activities by 3.7 percent and agriculture sector by 3.3 percent, the construction sector decreased by 8.6 percent, professional, administrative and support service activities by 1.8 percent. This sharp decline in the construction sector seems to have resulted from the lack of demand, cost increase and cash flow problems experienced by contractors since 2018. While the construction sector had a 5.4 percent share in GDP in 2019 at current prices, the real estate sector had a 6.7 percent share in GDP in 2019 at current prices, the real estate sector had a 6.7 percent share in GDP.

Although the GDP results for the first quarter of 2020 have not been announced yet, a more positive result is predicted when the sales figures are analyzed in terms of understanding the general trend in the sector. The construction and real estate sector seems to have maintained the momentum it gained at the end of 2019 in the first quarter of 2020 as well. When the first quarter of 2019 and the same period of 2020 are analyzed, there was an increase of 3.4 percent in total house sales. The increase of 119 percent in second-hand sales in the said period indicates that the residences in the market are in demand. On the other hand, supply seems to have continued to adjust itself according to conditions. Between the first quarter of 2019 and the first quarter of 2020, the number of construction permits decreased by 23.4 percent. On the other hand, the development in mortgaged sales is an important point that needs to be carefully monitored in terms of both the sector and the economy. As of the same period, mortgaged house sales increased by 90 percent. The decline in interest rates during this period and its effect on loan costs seem to have had a very positive impact on mortgaged sales.

As in many other economies, the construction sector in Turkey is not only a leading indicator in terms of the general economy, but also a driving force of growth. The acceleration and deceleration in the construction sector takes place earlier than the general economy. However, apart from the recent deceleration, it is seen that the sector is one of the sectors that makes the most significant contribution to the general economic growth, both directly and indirectly, with its high growth rate.

When we look at the long-term trends of the Turkish construction sector, it can be said that it is one of the sectors most sensitive to fluctuations in the general economy. The growth trend in the construction sector is, in a way, the leading indicator of GDP.

The real estate stock, which has increased in recent years throughout our country, has entered a downward trend with the necessary market corrections, the change in the interest rate and the positive decline in inflation. The value increases experienced due to the increasing construction costs have also given the expected response to the market's catching a suitable trend in the economy and the need for stock reduction, and the values have decreased to the expected figures in the market. In addition, 2019 was a year in which real estate sales to foreigners, especially housing sales, exploded. With the historical decline in housing loan rates in the second quarter of 2020, sales figures, especially in newly built houses, reached a very rapid level. In 2021, the increase in interest rates negatively affected the sector, but the increase continued. Housing sales decreased by 18.3% in the January-September period compared to the same period of the previous year, and amounted to 949 thousand 138. (TUIK)

Δ Tourism Sector in Turkey;

The tourism sector experienced one of the most challenging processes in its history in 2020. In 2020, the number of international passengers decreased by 74 percent compared to the previous year. While it is stated that there is a global loss of around 1.3 trillion dollars in the sector in 2020, this number was 11 times more than the loss experienced in the 2009 global economic crisis. While the VAT rate was reduced due to the significant effects of the pandemic on the tourism sector, accommodation tax and payment of adequate pay, rent, final permit, final allocation, easement right, usage permit, utilization, additional utilization fee and revenue share payments were postponed. Again, in order to reduce the negative impact on employment and the market, many regulations were made in the social security and labor law legislation.

The Covid-19, which was declared a pandemic by the World Health Organization, has adversely affected many sectors, especially the tourism sector, as it greatly restricts mobility. The tourism sector, which is called the smokeless industry, is of great importance for the economy, especially in countries such as Turkey where it has a large share. Before Covid-19, Turkey continued to experience a positive trend in the tourism sector. The direct contribution of tourism to the gross national product in Turkey in 2019 amounted to 37.5 billion dollars and reached the highest figures in the last 9 years with 51.9 million visiting tourists and 34.5 billion dollars in revenue from tourism. According to the World Tourism Organization, in 2019, it was among the top 10 tourism destinations in the world in terms of the number of tourists visiting it. Turkey's total tourism income reached 34.5 billion dollars in 2019, a record 17% increase compared to the previous year, according to TUIK. The average spend per person was 666 dollars, and the average spend per night was 68 dollars. The number of tourists visiting Turkey increased by 14% in 2019 compared to the previous year and amounted to 51.9 million. With 7 million visitors in 2019, Russia became the country that sent the most tourists to Turkey. While Germany ranked second in the list with 5 million tourists, it was followed by Bulgaria with 2.7 million tourists, England with 2.6 million tourists and Iran with 2.1 million tourists.

Restrictions started with the detection of the first Covid-19 case in Turkey on March 11, 2020. In 2020, the beginning year of the pandemic, Turkey's total tourism income decreased by 65% to 12.1 billion dollars, and the number of tourists visiting Turkey decreased by 69% to 15.8 million as a resultof the flight and travel bans due to the pandemic. While 80% of the visitors were foreign visitors residing abroad, 20% were Turkish citizens residing abroad. In 2020, the most tourists to Turkey came from Russia with 2.1 million people, although there was a 69.7% decrease compared to the previous year. Russia was followed by Bulgaria with 1.2 million visitors, Germany with 1.1 million visitors, England with 821 thousand visitors and Iran with 386 thousand visitors. According to the data of the Ministry of Culture and Tourism, the provinces with the most domestic and foreign visitors in 2020 were Antalya, Istanbul and Muğla, respectively.

In the first quarter of 2020, 5.6 million people visited Turkey. Considering the first quarter of 2021, 2.6 million visitors were reached with a decrease of 54%. With the visit of 4 million people in the second quarter of 2021, approximately 6.6 million people visited Turkey in the first half of 2021. According to the Airport Statistics, in which the inbound and outbound domestic and international passenger traffic is announced by the Turkish Hoteliers Association (TUROB), when the pre-pandemic and pandemic periods are compared, it was observed that the decrease in the number of international passengers was higher than that of the domestic passengers, due to the effect of international travel bans. When the first half of 2021 is compared with the first half of the previous year, there was a 15% increase in the domestic line and a 3% increase in the total at the airports in Istanbul, while a 5% decrease was observed in the international line. At Antalya Airport and the airports in Muğla, there was a significant increase in the number of international visitors in the first half of 2021 compared to the first half of 2020. Although there was an increase in air traffic in 2021 compared to the previous year, the levels in 2019 could not be achieved.

According to TUIK data, the average expenditure per person, which was 943 dollars in the first quarter of 2021, was 739 dollars in the second quarter, while the average spending per night, which was 56 dollars in the first quarter of 2021, was 57 dollars in the second quarter. In recent years, Turkey has experienced difficulties in the tourism sector at different times due to various political problems. On the other hand, with the increasing effect of the pandemic, it became difficult to manage the repayment of financial debts. It seems difficult to meet the debt burden of the tourism sector, which has reached 16 billion dollars, from its own resources, and it is thought that financial support may be required.

According to the Accommodation Statistics data, which includes domestic and foreign tourist accommodation, published by the Ministry of Culture and Tourism, occupancy rates improved in the first six months of 2021 compared to the same period of the previous year, but fell behind the levels in the same period of 2019. Due to the pandemic, there was a decrease in the rate of foreign tourists, especially those staying. In June 2021, occupancy rates of 36.33% in Istanbul, 41.74% in Antalya and 36.34% in Muğla were recorded in accommodation facilities with Tourism Operation Certificate. ground floor and 5 normal floors. The buildings have a total gross usage area of 11,064 m2 according to their project.

A Block (Novotel): There is a shelter area in the basement, meeting rooms, a restaurant, a lobby on the ground floor, and room volumes on the normal floors. Entrance to the hotel is provided from the ground floor level and from the Kocasinan Boulevard frontage. The hotel has 4 meeting rooms. These halls have 113m2, 23m2, 23m2 and 45m2 usage areas. In the building, there is 1 service elevator that is used in the middle with the other block, and 2 passenger elevators that work to the room floors. Heating in the building is provided by the central ventilation system. The floors in the restaurant, lobby, kitchen, technical areas and office areas within the building are covered with ceramic, and the floors in the room fllors and floor halls are carpet covered. The walls inside the building are satin painted over gypsum plaster. The hotel has 96 rooms, including 91 standard rooms, 4 suites, and 1 handicapped rooms. Each room has a usage area of approximately 25-30 m2. Each room has a bathroom with an area of approximately 3 m2. Access to the rooms is provided with a card entry system. Entrance doors are wooden panel. The floors inside the room are covered with parquet, and the walls are satin painted over gypsum plaster. In the bathroom areas, floors and walls are covered with ceramic tiles, and there are sinks, toilet bowls and vitreous ware sets. The building is very well maintained and does not need any renovation.

B Block (İbis Otel): There are technical areas in the basement, restaurant, lobby and administrative areas in the ground floor, and rooms in the normal floors. Entrance to the hotel is provided from the ground floor level and from the Kocasinan Boulevard frontage. In the building, there is 1 service elevator that is used in the middle with the other block, and 2 passenger elevators that work to the room floors. Heating in the building is provided by the central ventilation system. The floors in the restaurant, lobby, kitchen, technical areas and office areas within the building are covered with ceramic, and the floors in the room fllors and floor halls are carpet covered. The walls inside the building are satin painted over gypsum plaster. The hotel has 160 rooms in total, 156 standard rooms and 4 handicapped rooms. Each room has a usage area of approximately 20 m2. Each room has a bathroom with an area of approximately 3 m2. Access to the rooms is provided with a card entry system. Entrance doors are wooden panel. The floors inside the room are covered with parquet, and the walls are satin painted over gypsum plaster. In the bathroom areas, floors and walls are covered with ceramic tiles, and there are sinks, toilet bowls and vitreous ware sets. The building is very well maintained and does not need any renovation.

4.5 If Any, Information on the Situations Contrary to the License Regarding the Existing Building or the Project Under Construction

In the examination carried out on site, it was seen that the buildings were compatible with their architectural project in terms of their general lines.

4.6 <u>Information on Whether Changes Made in Licensed Buildings Require Re-Licensing within the</u>
Scope of Article 21 of the Zoning Law No. 3194

There is no production in the existing building that would require a new license.

4.7 Information on the Purpose for which the Real Estate is Used as of the Appraisal Date, If the Real Estate Is a Land, Whether There is Any Building on it and If There is, for What Purpose These Buildings are Used

The said real estate is in active use as a hotel.

5. APPRAISAL METHODS USED

UDS Defined Value Basis - Market Value:

AMarket value is the estimated amount required to be used in the exchange of an asset or liability as of the appraisal date, as a result of appropriate marketing activities, in a non-collusive transaction between a willing seller and a willing buyer, in which the parties have acted with knowledge, prudence and without coercion. The definition of market value should be applied in accordance with the following conceptual framework:

- (a) The term "estimated amount" means the price expressed in money for the asset in a non-collusive market transaction. Market value is the most probable price that can be reasonably obtained in accordance with the definition of market value in the market as of the appraisal date. This price is the best price that can be reasonably obtained by the seller and the most advantageous price that can be obtained by the buyer in reasonable terms. This estimate does not include in particular any special considerations or concessions granted by any party associated with the sale, an estimated price that has been increased or decreased based on special terms or conditions, such as a non-standard financing, sell-and-lease agreement, or any element of value simply for a particular owner or buyer.
- (b) The expression "to be exchanged" refers to a situation where the value of an asset or liability is an estimated value rather than a predetermined amount or actual selling price. This price is the price in a transaction that satisfies all elements of the market value definition as of the appraisal date;
- (c) The expression "as of the appraisal date" requires that the value be determined as of a specific date and be specific to that time. The estimated value may not be accurate or appropriate at another time, as markets and market conditions may change. The appraisal amount reflects the market situation and conditions only as of the appraisal date, not at any other date;
- (d) The expression "between a willing buyer" refers to a buyer who has acted with intent to buy, but not compelled. This buyer is not eager or determined to buy at any price. This buyer buys in accordance with current market realities and current market expectations, rather than in a virtual or hypothetical market that cannot be proven or predicted. A buyer who is deemed to exist will not pay a price higher than the market requires. The current owner of the asset is among those who make up the market.
- (e) A "willing seller" means a seller who is not willing or compelled to sell at a particular price, or who does not insist on a price that is not considered reasonable by the current market. Regardless of the price, the willing seller is willing to sell the asset in open markets at the best price possible under market conditions as a result of appropriate marketing activities. The circumstances of the rectival AL

vkimenkul Değerleme Ve DANKMANLIK A.Ş. nniyet Mh. Sınır Sk.No. 17/1 Yenmahalle/ANK. Tel:0312 467 00 61/ Fax:0312 467 00 34 Taltepe V.D. 631 054 93 89 Tic. Sic. No: 256696 Tantigd.com.tr Sermaye/1.200.000,00.-TL Page 27 | '56 263 1054928900019

owner of the asset are not included in the foregoing because the willing seller is a hypothetical owner.

- (f) The term "non-collusive transaction" refers to a transaction between parties for which there is no specific and special relationship, not parties such as the parent company and its subsidiary, or the landlord and the lessee, where the price may not reflect or raise the market price level. Market value transactions are assumed to be made between unrelated parties, each acting independently.
- (g) The expression "as a result of appropriate marketing activities" means that the asset is put on the market and sold at the best price that can be obtained in accordance with the definition of market value if it is marketed in the most appropriate way. The method of sale is considered to be the most convenient method to obtain the best price in the market to which the seller has access. The time to market the asset is not a fixed period and may vary depending on the type of asset and market conditions. The only criterion here is that sufficient time must be allowed for the asset to attract the attention of a sufficient number of market participants. The time to market must occur before the appraisal date,
- (h) The phrase "the parties acting with knowledge and prudence" assumes that the willing seller and willing buyer are reasonably informed about the market situation, the structure, characteristics, actual and potential uses of the asset as of the appraisal date. It is assumed that each party uses this information prudently to obtain the most advantageous price for their respective positions in the transaction. Prudence is evaluated not by the advantage of an experience, the benefit of which is understood later, but by taking into account the market conditions as of the appraisal date. For example, a seller who sells its assets at a price below the previous market levels in an environment of falling prices is not considered imprudent. In such cases, prudent buyers or sellers will act on the best market information available at the time, as would be the case with other transactions in which assets are exchanged under changing price conditions in markets.
- (i) The expression "without coercion" means that each of the parties has taken action with the intention of doing this transaction without being forced or under pressure.
- ☐ The concept of market value is accepted as the price negotiated in an open and competitive market where participants are free. An asset's market can be an international or a local market. A market may consist of a large number of buyers and sellers, or a characteristically limited number of market participants. The market in which the asset is assumed to be offered for sale is a market in which, in theory, the asset exchanged is normally exchanged.
- ▶ The market value of an asset reflects its most efficient and best use. The most efficient and best use is the highest legally permissible and financially profitable use of an asset's potential. The most efficient and best use may be a continuation of the current use of an asset or some alternative use. This is determined by the intended use for the asset when calculating the price a market participant will offer for the asset.
- The nature and source of appraisal inputs should reflect the basis of value, which should ultimately be relevant to the appraisal purpose. For example, different approaches and methods can be used to determine market value, provided that market-derived data are used. The market approach, by definition, uses market-derived inputs. In order to determine market value using the income approach, it is necessary to use the inputs and assumptions adopted by the participants. In order to determine market value using the cost approach, it is necessary to determine the cost and appropriate wear rate of an asset with equivalent use through market-based cost and wear analyzes.

¬ For the asset being appraised, the most valid and most appropriate appraisal method or methods should be determined according to the available data and market-related conditions. Each approach or method used should provide an indication of market value if it is based on properly analyzed and market-derived data.

A Market value does not reflect attributes of an asset that are not available to other buyers in the market and that have value to a particular owner or buyer. Such advantages may be related to the physical, geographical, economic or legal characteristics of an asset. Since market value assumes that there is a willing buyer, not a specific willing buyer, at a given date, it necessitates ignoring all such elements of value.

Appraisal Methods

Care must be taken to ensure that appraisal approaches are appropriate and relevant to the content of the assets being appraised. The three approaches described and explained below are the basic approaches used in appraisal. All of these are based on the principles of price equilibrium, utility expectation, or substitution economics. The main appraisal approaches are given below:

(A) Market Approach (B) Income Approach (C) Cost Approach

Each of these basic appraisal approaches includes different and detailed application methods.

The purpose of choosing appraisal approaches and methods for an asset is to find the most appropriate method for certain situations. It is not possible for one method to be suitable for every situation. The following are taken into account as a minimum in the selection process:

(a) the terms and purpose of the appraisal task and the appropriate value basis(s) and assumed use(s) identified; (b) the strengths and weaknesses of possible appraisal approaches and methods; (c) the relevance of each method in terms of the nature of the asset and the approaches and methods used by the participants in the relevant market; (d) the availability of reliable information necessary for the application of the method(s).

5.1 Market Approach

Δ Explanatory Information on the Market Approach, Reasons for Using This Approach for the Appraisal of the Subject Real Estate

The market approach refers to the approach in which the indicative value is determined by comparing the asset with the same or comparable (similar) assets for which price information is available. It is deemed necessary to apply the market approach and to give important and/or significant weight to it in the following situations: (a) the subject asset has been recently sold at a fair value basis, (b) the subject asset or substantially similar assets are actively traded, and/or (c) there are frequent and/or recent observable transactions involving substantially similar assets.

If comparable market information is not identical or significantly related to the asset, the appraiser should conduct a comparative analysis of the qualitative and quantitative similarities and differences between the comparable assets and the subject asset. Adjustment based on this comparative analysis will often be necessary. These adjustments should be reasonable and appraisers should include in their reports the rationale for the adjustments and how they were quantified.

The market approach usually uses market multipliers derived from comparable assets, each with different multipliers. Selecting the appropriate multiplier from the specified range requires an evaluation that takes into account both qualitative and quantitative factors.

A Sketches Extracted from the Virtual Environment Maps of the Used Precedents, Showing the Proximity to the Real Estate Subject to the Appraisal

Δ Detailed Explanation on How the Precedents are Taken into Consideration, Adjustments to the Precedent Information, Detailed Explanations on the Reason for Making the Adjustments and **Other Assumptions**

There is no precedent land in the region with a similar zoning status as the real estate. In the research carried out in the region where the real estate is located, similar/different land precedents for sale with residential and commercial zoning status have been seen. Based on these precedents inn the region, the zoning status, location, road frontage, land structure, infrastructure, landscaping, etc. of the parcel were taken into consideration and the value of the real estate was appraised.

In line with this information, it has been concluded that the sales prices of the land per square meter can be between 2,750 TL and 3,250 TL.

Δ Result of Market Approach

In line with the information written above, all kinds of positive/negative factors such as the location, zoning status, land structure, road frontage, ease of transportation etc. of the real estate in question were taken into account, and the land unit value of the real estate was appraised as 2,899.76 TL/m2 in the light of the corrections in the precedents.

Land Value of Block 2420, Parcel 9: 11,035.40 m2 x 2,899.76 TL/m2 = ~32,000,000.00 TL

As a result of the market approach method, the total value of the land (excluding VAT) was appraised as 32.000.000.00 TL, taking into account the title deed area of the real estate.

5.2 Cost Approach

Δ Explanatory Information on the Cost Approach, Reason for Using This Approach for the Appraisal of the Subject Real Estate

The cost approach is the approach in which the indicative value is determined by applying the economic principle that a buyer will not pay more for a given asset than the cost of acquiring another asset of equal utility, whether acquired by purchase or construction, unless there are factors such as time, inconvenience and risk that cause unnecessary burden. In this approach, the indicative value is determined by calculating the current replacement cost or reproduction cost of an asset and deducting any depreciation that occurs in physical deterioration and other forms. It is deemed necessary to apply the cost approach and to give important and/or significant weight to it in the following situations: (a) participants can reconstitute an asset with substantially the same utility as the subject asset, without legal restrictions, and the asset can be reconstituted in such a short time that participants are not willing to pay a significant premium for prompt use of the subject asset;

(b) the asset does not directly generate income and the unique nature of the asset makes the income or market approach impossible and/or (c) the value basis used is primarily based on replacement cost, such as for example replacement value.

There are three main cost approach methods: (a) replacement cost method: the method by which indicative value is determined by calculating the cost of a similar asset providing equivalent benefits. (b) reproduction cost method: the method by which the indicative value is determined by calculating the cost required to reproduce the asset. (c) collection method: the method in which the value of the asset is calculated by adding the value of each of its components.

A Precedent Information Used in Determining the Value of the Land and the Source of This Information, Adjustments, Other Assumptions and Result

The current market conditions have been taken into account as a result of the corrections made with the precedents determined in the market approach and the explanations, taking into account all distinctive factors such as the area of the parcel in question, its location in the region where it is located, its distance to the main arterial roads, its frontage, geometric shape and topographic features.

Based on all these conditions and the corrections in the precedents found by the researches, the opinions of the real estate agents who dominate the region and the historical data, the unit value above has been appraised for the parcel in question.

A Information Used in Determining Building Costs and Other Costs, Source of This Information and Assumptions

While determining the building value of the said real estate, the 2021 Approximate Unit Costs of Buildings table and the "Table of Depreciation Rates" published by the Ministry of Environment and

Urbanization were not used. The unit value has been determined by Itaking into Raccount Athe MANLIKA. DANISMANLIK HIZ TIC, LTD. STL Turan Güneş Bulvan No: 44/7 Çankaya/ANK I hereby con that I have translated this

Emniyet Mh. Sinir Sk, No. 17/1 Yerimahalle/ANK Tel:0312 467 00 61/ Fax:03/2 467 00 34 Maltepe V.D. 631 054 93 89 Vc.Sic.No:256696 www.netgd.com2.tr 56rmay#:1.200.000,00

determinations made on site and the current construction costs. According to the on-site determinations, Novotel Hotel is a 4-star hotel and its unit value is higher.

Δ Result of Cost Approach

BUILDING VALUE						
QUALIFICATION	CONS.AREA (m2)	UNIT COST (TL/m2)	DEPRECIATION (%)	VALUE		
OTEL (bodrum katlar)	1423	2300	10	2.950.000,00?		
NOVOTEL	4453	5750	6	24.070.000,00?		
ÍBÍS OTEL	5188	6250	6	30.480.000,00 ?		
Çevre Düzeni, A	İşler vs.	500.000,00?				
		58.000.000,00 ?				

^{*} As a result, a total value of **58,000,000.00-TL** was appraised as the land and building value of the real estate according to the cost method.

The calculation table of the basis for the right of construction established on the said real estate is as follows.

Right of Construction – Lease Contract Period and	Rate Table
Establishment Date of Right of Construction	20.08.2008
Right of Contruction Period	49 Yıl
Right of Constructionon a Day Basis	17897
Expiry Date ofRight of Construction	20.08.2057
Appraisal Date	31.12.2021
Remaining Right of Construction Period on a Day Basis as of Appraisal Date	13016
Percentage of Remaining Period for Right of Construction	72,73
Determined Full Ownership Land Unit Value	2.899,76 ?
Land Area	11035,40
Total Land Value	32.000.000,00 ?
Ratio of Right of Construction Value	0,666666
Percentage of Remaining Period for Right of Construction	72,73
Land Unit Value Basis for Right of Construction	1.405,94 ?
Land Area	11035,40
Total Land Value Basis for Right of Construction	15.515.136,00 ?

While calculating the value of the real estate, the market approach value and the unit value of the land that is the basis for full ownership were found, and the land unit value that constitutes the basis for the right of construction was achieved by the method of calculating the right of construction, as shown in the table above. Thus, the <u>fair market value</u> of the real estate subject to the report <u>according to the cost method</u> based on the right of construction has been calculated as;

Land Value: ~15.515.000,00 TL and Building Value: 58,000,000.00 TL, a total of ~70,515,000.00 TL. The right of construction value of the real estate was appraised as 70,515,000.00-TL with this

Right of Construction Value: Calculation has been made over the Market Value of the Land x 2/3 (Right of Construction Multiplier) x (Remaining Years/49 Years).

Δ Building Values Basis for Insurance

The building value basis for insurance is stated assuming that it will be rebuilt over the building class specified in the building permit and occupancy certificate. The real estate has a construction class of 4A in the occupancy and license certificate. For this reason, the building value basis for insurance has been determined by considering the unit cost of the 4A building.

Indoor Area Unit Price (Unit Price (TL/m²)		Insurance Value
11064 m ²	x	1,920 TL/m ²	=	21,242,880.00-TL

5.3 Income Approach

A Explanatory Information on the Income Approach, Reason for Using This Approach for the Appraisal of the Subject Real Estate

The income approach allows the indicative value to be determined by converting future cash flows into a single current value. In the income approach, the value of the asset is determined based on the present value of the income, cash flows or cost savings generated by the asset. It is deemed necessary to apply the income approach and to give important and/or significant weight to it in the following situations:

(a) The ability of the asset to generate income is a very important factor affecting the value from the perspective of the participant, (b) Reasonable estimates of the amount and timing of future income associated with the subject asset exist, but with few relevant market precedents, if any.

→ Discounted Cash Flows (DCF) Method:

In the DCF method, estimated cash flows are discounted to the appraisal date, resulting in the present value of the asset. It is also described as yield capitalization (reduction) of income. In some cases involving long-lived or indefinite-lived assets, the DCF may include the continuing value that represents the asset's value at the end of its exact forecast period. In other cases, the value of the asset may be calculated using a stand-alone sustained value that does not have an exact forecast

Residual value, which is a current approach to the application of discounted cash flow analysis, is the value calculated for the real estate investor based on the assumption that the real estate is sold after the anticipated operating period. In the residual value calculation made with the help of the capitalization rate, TIP 1 (International Valuation Standards Council (IVSC)'s Technical Information Paper 1 (TIP 1) Discounted Cash Flow) in July 2013 is the use of the income of the year following the last period, as in the current valuation studies carried out internationally. It is thought that the investor who will purchase the real estate at the end of the projection period will decide on the purchase price according to the income of the next year. Taking the income of the year following the last period as a basis in the residual value calculation is a factor that affects the resulting value. In other words, residual value is the cash flows from the last year of the project's anticipated modeling period to infinity, discounted to the last year predicted.

The basic steps of the DCF method are as follows:

(a) selecting the type of cash flow that best suits the nature of the subject asset and the appraisal task (for example, pre-tax or post-tax cash flows, total cash flows or equity cash flows, real of L nominal cash flows, etc.),

ÇEVİRİ TERCÜME vo EĞİTİM DANISMANLIK HIZ TIC, LTD. 5TI.

- (b) determining, if any, the most appropriate exact period for estimating cash flows,
- (c) preparing cash flow forecasts for the period in question,
- (d) determining whether the continuing value at the end of the exact forecast period (if any) is appropriate for the subject asset, and then determining the continuing value appropriate to the nature of the asset;
- (e) determining the appropriate discount rate,
- (f) applying the discount rate to the estimated cash flows, including the continuing value, if any.

→ Direct Capitalization Method:

It is the method in which the all-risk or overall capitalization rate is applied to a representative single period income. The value of the real estate is calculated by dividing the net income to be generated by the real estate for that period (year) by a capitalization rate formed according to the current real estate market conditions. This capitalization rate can be determined by the relationship between sales and income levels in comparable real estates. The concept of Net Income should be noted here. After the effective gross income, which includes the income to be obtained from all sources, the potential gross income of the property and the expected gaps / losses from it, net operating income should be obtained by eliminating the effective gross income from operating expenses and other expenses. Potential Gross Rental Income: It is the amount of income obtained in cases where all the rentable units of the real estate are rented and the rental prices are collected as unregistered.

Total annual potential income / Capitalization rate = Value

Δ Precedent Information Used in Estimating Cash Inflows and Outflows, Source of This Information and Other Assumptions

The information used below has been determined by taking into account the data of the last 3 years of Kayseri Novotel and Ibis Hotel.

İbis Hotel;

In 2020, occupancy rates decreased after March and it is known that the hotel was closed for 4 months during the year. The year-end occupancy rate was 37%. It was observed that the effects of the pandemic continued in 2021, and it was determined that there was an increase in occupancy rates after the pandemic restrictions. Considering the data of the first three quarters of 2021, the occupancy rate of the hotel has increased to around 64.8% on average. It is thought that this ratio will rise higher with the 4th Quarter data.

Novotel Hotel;

It is seen that occupancy rates have decreased after March in 2020. The year-end occupancy rate was 59%. It was observed that the effects of the pandemic continued in 2021, and it was determined that there was an increase in occupancy rates after the pandemic restrictions. Considering the data of the first three guarters of 2021, the occupancy rate of the hotel has increased to around 72% on average. It is thought that this ratio will rise higher with the 4th Quarter data.

A Detailed Explanation and Reasons for How the Discount Rate is Calculated

While determining the discount rate, the collection method within the scope of UDES was taken as a basis and the items listed below were taken into account.

Risks related to projections of used cash flows,

b. Type of asset appraised,

859 047 0140

Ratios implicitly involved in transactions in the market

Page 35 | 56

- d. The geographic location of the asset and/or the location of the market in which it will be traded.
- The life of the asset and the consistency of the inputs, e.
- Type of cash flow used,

Discount Rate = Risk-Free Rate of Return* + Risk Premium**

- * The risk-free rate of return has been determined as 4.20%, taking into account the Eurobased rate of return of fixed income securities in the next 6 years. In determining these rates, the return rates of the most liquid bonds were determined as the risk-free rate of return.
- ** The risk premium, on the other hand, has been determined by considering factors such as industry risk of around 1.5-2% over the determined risk-free rate of return, and the fact that the country's risks arising from the irregularity of the country's exchange rates are around 3.5-4%. In the income analysis, the discount rate was taken as 10.5%. Since the net income in the rental income will not change, the country risk was taken as around 2.5-3% and the discount rate was taken as 8.50%.

Δ Assumptions Used in Income Analysis

İbis Hotel

- The Ibis Hotel subject to the appraisal have 160 rooms. It is assumed that the hotel will be open 365 days a year.
- The average occupancy rate of the hotel was determined by taking into account the last 3 years' data from the hotel operator, the negativities experienced in the tourism sector during the pandemic process, and the increased hotel occupancy rates after the effect of the pandemic began to decrease in the last 5 months. In 2019, the occupancy rate of the hotel is 72%, and the average room price is approximately 20 €. In 2020, occupancy rates decreased after March and it is known that the hotel was closed for 4 months during the year. The year-end occupancy rate was 37%. The annual average room price is 19 €. It was observed that the effects of the pandemic continued in the first 6 months of 2021, and it has been determined that there has been an increase in the occupancy rates of the hotel since this date. As a result of the evaluations, the occupancy rate of the hotel in 2022 was accepted as 64%, and it was assumed that with an occupancy rate increase of 5% in the first 4 years and 3% in the 5th years, it would catch the 2019 data at the end of the 5th year, and would remain constant at 80% after this year.
- Hotel room prices are determined by assuming that it will operate on a bed-and-breakfast system. In the researches, the concept of the hotel and the room/night prices of the hotels in the region were taken into consideration. In addition, the average room prices of the hotel in the last 5 months, when the effect of the pandemic decreased, were taken into account. The hotel room price per night is determined as 20 Euro/room, taking into account, in the first 5 years, the radical changes in the exchange rates in our country, a 5% increase in room prices, and in the following years, approximately 3% increase in Euro zone inflation rates.
- Considering the performance of the facility, the other income ratio was determined. As a result of the research we conducted with the information and data obtained from the hotel operator, it has been predicted that the other income ratio will be approximately 30% of the total room income of the hotel.
- Gross operating profit is calculated by deducting department expenses and operating expenses from total income. It is accepted that the hotel GOP (Gross Operating Profit) Rates will increase by 35% in the first year, and in the following years, the fate of increase will be ediffusion to the smalle Ank

CEVIRI TERCÜME VO EĞITIM DANISMANLIK HIZ TIC, LTD, STI. er eme ve Danismanlik AUSO

increase rates determined in the room prices. It is predicted that at the end of the 6th year, it will remain constant at the rate of 45.13%. It has been seen that this predicted GOP ratio is reasonable for the continuation of the operation period.

Novotel

- Novotel subject to the appraisal have 96 rooms. It is assumed that the hotel will be open 365 days a year.
- The average occupancy rate of the hotel was determined by taking into account the last 3 years' data from the hotel operator, the negativities experienced in the tourism sector during the pandemic process, and the increased hotel occupancy rates after the effect of the pandemic began to decrease in the last 5 months. In 2019, the occupancy rate of the hotel is 65%, and the average room price is approximately 24 €. In 2020, although there was a decrease in the occupancy rate in open real estates due to the fact that hotels were generally closed throughout the province due to the pandemic after March, it was not experienced as much as closed hotels. The year-end occupancy rate was 59%. The annual average room price is 20 €. It was observed that the effects of the pandemic continued in the first 6 months of 2021, and it has been determined that there has been an increase in the occupancy rates of the hotel since this date. As a result of the evaluations, the occupancy rate of the hotel in 2022 was accepted as 73%, and it was assumed that the hotel's occupancy rate would increase by 2% in the first 5-year period, and at the end of the 5th year, the overall occupancy rate of the hotel would be achieved and remain constant.
- Hotel room prices are determined by assuming that it will operate on a bed-and-breakfast system. In the researches, the concept of the hotel and the room/night prices of the hotels in the region were taken into consideration. In addition, the average room prices of the hotel in the last 5 months, when the effect of the pandemic decreased, were taken into account. The hotel room price per night is determined as 22 Euro/room, taking into account, in the first 5 years, the radical changes in the exchange rates in our country, a 5% increase in room prices, and in the following years, approximately 3% increase in Euro zone inflation rates.
- Considering the performance of the facility, the other income ratio was determined. As a result
 of the research we conducted with the information and data obtained from the hotel operator, it
 has been predicted that the other income ratio will be approximately 35% of the total room
 income of the hotel.
- Gross operating profit is calculated by deducting department expenses and operating expenses from total income. It is accepted that the hotel GOP (Gross Operating Profit) Rates will increase by 24% in the first year, and in the following years, the rate of increase will be equivalent to the increase rates determined in the room prices. It is predicted that at the end of the 15th year, it will remain constant at the rate of 39.20%. It has been seen that this predicted GOP ratio is reasonable for the continuation of the operation period.

General Data

- Real estate tax and insurance costs transmitted by Akfen GYO A.Ş. are added to the projection at the same amount each year, assuming that there will be no annual increase.
- The annual right of construction price will continue to increase by 105,000 USD between 2019-2023, 140,000 USD in 2024, and 1,400 USD every year from 2025 until the expiration of the right of construction, according to the right of construction agreement. At the end of the right of construction, the facility will be transferred to the Kayseri Chamber of Industry. Since Euro data is used in the projection, the right of construction price has been taken into account by calculating the Euro value from the current exchange rate.

 In the studies, it has been observed that the inflation rate of the Euro zone has changed by approximately 2.5-3% in the last 5 years, and due to the radical exchange of the Euro zone has changed by approximately 2.5-3% in the last 5 years, and due to the radical exchange of the Euro zone has changed by

- experienced in our country, the general increase rate was taken as 5% in the first 5 years and it was predicted that it would catch up with the Euro zone in 5 years.
- Tax and VAT are not included in the studies within the scope of International Appraisal Standards.
- A more realistic net present value was obtained by taking the mid-year factor (0.5) into account in net present value calculations.
- The discount rate is taken as 10.5% in the income projection as stated in the relevant article of the report.
- It is assumed that all payments are made in advance.

Δ Assumptions Used in Rent Analysis

İbis Hotel

- The Ibis Hotel subject to the appraisal have 160 rooms. It is assumed that the hotel will be open 365 days a year.
- The details of the lease contract submitted by Akfen GYO AŞ, were examined. The real estate is owned by Akfen GYO AS, and is operated by the Accor Group, an international hotel management company. According to the contract, the rent to be paid by the Accor Group is determined as the higher amount of 25% of the total gross income or 95% of the adjusted gross operating income (AGOP). According to the terms of the contract, the AGOP rate for the last year has been determined as 95%.
- Adjusted gross operating income (AGOP) is determined by deducting the operator share and replacement reserve ratio to be paid to ACCOR at the rate of 8% of the gross income from the gross operating profit (GOP).
- The average occupancy rate of the hotel was determined by taking into account the last 3 years' data from the hotel operator, the negativities experienced in the tourism sector during the pandemic process, and the increased hotel occupancy rates after the effect of the pandemic began to decrease in the last 5 months. In 2019, the occupancy rate of the hotel is 72%, and the average room price is approximately 20 €. In 2020, occupancy rates decreased after March and it is known that the hotel was closed for 4 months during the year. The year-end occupancy rate was 37%. The annual average room price is 19 €. It was observed that the effects of the pandemic continued in the first 6 months of 2021, and it has been determined that there has been an increase in the occupancy rates of the hotel since this date. As a result of the evaluations, the occupancy rate of the hotel in 2022 was accepted as 64%, and it was assumed that with an occupancy rate increase of 5% in the first 4 years and 3% in the 5th years, it would catch the 2019 data at the end of the 5th year, and would remain constant at 80% after this year.
- Hotel room prices are determined by assuming that it will operate on a bed-and-breakfast system. In the researches, the concept of the hotel and the room/night prices of the hotels in the region were taken into consideration. In addition, the average room prices of the hotel in the last 5 months, when the effect of the pandemic decreased, were taken into account. The hotel room price per night is determined as 20 Euro/room, taking into account, in the first 5 years, the radical changes in the exchange rates in our country, a 5% increase in room prices, and in the following years, approximately 3% increase in Euro zone inflation rates.
- Considering the performance of the facility, the other income ratio was determined. As a result of the research we conducted with the information and data obtained from the hotel operator, it has been predicted that the other income ratio will be approximately 30% of the total room income of the hotel.
- Gross operating profit is calculated by deducting department expenses and operating expenses from total income. It is accepted that the hotel GOP (Gross Operating Profit) Rates will increase

by 35% in the first year, and in the following years, the rate of increase will be equivalent to the increase rates determined in the room prices. It is predicted that at the end of the 6th year, it will remain constant at the rate of 45.13%. It has been seen that this predicted GOP ratio is reasonable for the continuation of the operation period.

Novotel

- Novotel subject to the appraisal have 96 rooms. It is assumed that the hotel will be open 365 days a year.
- The details of the lease contract submitted by Akfen GYO AŞ, were examined. The real estate is owned by Akfen GYO AS, and is operated by the Accor Group, an international hotel management company. According to the contract, the rent to be paid by the Accor Group is determined as the higher amount of 22% of the total gross income or 95% of the adjusted gross operating income (AGOP). According to the terms of the contract, the AGOP rate for the last year has been determined as 95%.
- Adjusted gross operating income (AGOP) is determined by deducting the operator share and replacement reserve ratio to be paid to ACCOR at the rate of 8% of the gross income from the gross operating profit (GOP).
- The average occupancy rate of the hotel was determined by taking into account the last 3 years' data from the hotel operator, the negativities experienced in the tourism sector during the pandemic process, and the increased hotel occupancy rates after the effect of the pandemic began to decrease in the last 5 months. In 2019, the occupancy rate of the hotel is 65%, and the average room price is approximately 24 €. In 2020, although there was a decrease in the occupancy rate in open real estates due to the fact that hotels were generally closed throughout the province due to the pandemic after March, it was not experienced as much as closed hotels. The year-end occupancy rate was 59%. The annual average room price is 20 €. It was observed that the effects of the pandemic continued in the first 6 months of 2021, and it has been determined that there has been an increase in the occupancy rates of the hotel since this date. As a result of the evaluations, the occupancy rate of the hotel in 2022 was accepted as 73%, and it was assumed that the hotel's occupancy rate would increase by 2% in the first 5-year period, and at the end of the 5th year, the overall occupancy rate of the hotel would be achieved and remain constant.
- Hotel room prices are determined by assuming that it will operate on a bed-and-breakfast system. In the researches, the concept of the hotel and the room/night prices of the hotels in the region were taken into consideration. Δ Result of Income Approach

Since the real estate subject to the report is an income generating property that is currently actively used, a discounted cash flow has been applied and a value has been achieved as a result.

Such achieved value is the sum of the present values of the discounted cash flows.

** The exchange rate used in the table has been determined by taking into account the CBRT data valid as of 15:30 on 30.12.2021.

Considering the DCF data, the appraised value of the real estate is 8,030,000 €, approximately 108,700,000.00,00 TL, as a result of bringing the total revenues obtained during the right of construction period to the present.

5.4 Other Determinations and Analyzes

∆ Determined Rental Values

Considering the income data of the real estate subject to the appraisal, the rental value of the real estate has been determined according to the contracts concluded between Akfen GYO AŞ. and Accor Group. According to the contract, the rent to be paid by the Accor Group for Ibis Hotel is determined as the higher amount of 25% of the total gross income or 95% of the adjusted gross operating income (AGOP). According to the terms of the contract, the AGOP rate for the last year has been determined as 95%. The rent payable for Novotel is determined as 22% of the total gross income or 95% of the adjusted gross operating income (AGOP), whichever is higher. According to the terms of the contract, the AGOP rate for the last year has been determined as 95%.

Adjusted gross operating income (AGOP) is determined by deducting the operator share and replacement reserve ratio to be paid to ACCOR at the rate of 8% of the gross income from the gross operating profit (GOP).

According to the discounted cash flow projection made over the rental income, the rental value of the real estate has been determined as a result of bringing the sum of the revenues obtained during the right of construction period to the present. According to this calculation, the annual rental income of the hotel has been determined as 330.000 €, approximately 4.850.000 TL.

Δ Precedent Share Ratios in Projects to be Constructed Through Revenue Sharing or Flat For Land Method

It is foreseen that the flat for land ratios may vary by 50%-55% throughout the province where the real estate subject to the appraisal is located and especially in the region where it is located, and the revenue sharing ratios may be realized at the rates of 35%-40%. These ratios vary according to factors such as the size of the area of the real estate, the scope and total return of the project, and the nature and location of the project to be built.

Δ Wasteland and Project Values of Land on Which Projects are Developed

The real estate subject to the appraisal has been changed in type and is currently used as a hotel. There is no project development work on it.

Δ Most Efficient and Best Use Value Analysis

Considering the characteristics of the region and environment where the real estate in question is located, we believe that the current usage situation is the most effective and efficient.

Appraisal Analysis of Common or Divided Parts

The entire real estate in question has been appraised. No common or divided part appraisal has been NET KURUMSAL

6. EVALUATION OF THE RESULTS OF THE ANALYZES

6.1 <u>Harmonization of Different Appraisal Methods and Analysis Results and Explanation of the</u> Methods Followed for This Purpose and Its Reasons

The appraisal study for the real estate subject to the report was analyzed separately as stated in the relevant parts of the report. The land value was determined by the market analysis method (precedent comparison) and the building value was determined by the cost approach method. Value formations were supported with the Cost and Income method. For the income method, direct capitalization and discounted cash flow projections were used. Since the property in question is a Hotel and is actually operating and is in a direct income generating property class, the final value has been determined by averaging the results obtained from direct capitalization and discounted cash flow projections on the income method basis.

6.2 Factors Affecting the Value of Real Estate - SWOT Analysis

Δ Positive Features

- The region being on the main arterial road and having good transportation facilities
- Being close to Kayseri airport
- Good workmanship and material quality of the building, and being well-maintained

△ Negative Features

Availability of alternative accommodation establishments

Δ Opportunities

- The contribution of the city's development in terms of industrial activities to the customer portfolio
- Availability of winter tourism in the city

∆ Threats

- The possibility that the negative picture in economic developments will continue with exchange rate fluctuations
- The possibility of the tourism sector to be closed due to unexpected events such as the Covid pandemic.
- 6.3 Reasons for not Including Some of the Minimum Issues and Information in the Report

All minimum issues and information required for the appraisal study are included in the report.

6.4 Opinion on Whether the Legal Requirements are Fulfilled and Whether the Permits and Documents Required To Be Obtained Pursuant to Legislation are Full and Complete

As a result of the researches and examinations carried out in the relevant institutions, it has been seen that all legal documents and information required for the real estate are available and that the legal requirements are fulfilled. As of the appraisal date, it has been learned that there are no unfavorable situations such as legal restrictions, decisions, etc.

6.5 Opinion on Encumbrances and Mortgages on the Real Estate, if Any

Explanations regarding the encumbrance examination of the subject real estate are given under the heading 3.3.

6.6 Information on Whether the Real Estate Subject to the Appraisal is Subject to a Limitation on the Transferability of the Real Estate Except in Cases of Mortgage or Any Encumbrances that will Directly and Significantly Affect the Value of the Real Estate

As stated in this article, there is no limitation or restriction regarding the transfer of the real estate.

6.7 If the Subject of the Appraisal is Land, Information on Whether Any Savings have been Made for the Development of a Project Although Five Years have Passed from Its Purchase

The real estate subject to the appraisal is a Hotel, and there is no work to develop a project as a result of the building on it.

6.8 If the Subject of the Appraisal is the Right of Construction or Timeshare, Information on Whether There are Any Limitations on the Transfer of the Right of Construction and Timeshare, Except for the Provisions of Special Laws, in the Contracts that Raise These Rights

The parcel subject to the appraisal belongs to the Kayseri Chamber of Industry and there is a hotel facility on which the right of construction has been established for 49 years. In the official contract regarding the right of construction, it is seen that the independent and permanent right of construction has a duration of 49 years, that the right of easement can be transferred to third parties, that, at the end of the period, the building subject to the easement will pass to the owner of the real estate free of charge, that there will be no easement payment for the first year, and for the following years it is as the prices specified in the contract. According to this contract, there is no obstacle to the transfer the right of construction.

6.9 Opinion on Whether the Nature of the Real Estate in the Title Deed, its Actual Use and the Quality of its Inclusion in the Portfolio are Compatible with Each Other, and Opinion on Whether There is Any Objection in its Inclusion in the Portfolio

The properties of the real estate subject to the appraisal in the title deed and the actual use are compatible with each other. Pursuant to subparagraph (c) of paragraph 1 of Article 22 in Section 7 of the "Communiqué No. III-48.1 on Principles Regarding Real Estate Investment Companies" for Real Estate Investment Partners (Amended:RG-2/1/2019-30643) In addition to the lands and lands they own, they can develop real estate projects or invest in projects by establishing a right of construction on lands belonging to other people with which revenue sharing or land sales contracts in return for flat have been concluded. In projects to be carried out jointly with one or more parties within the framework of the provisions of the contract to be concluded, if there is no objective of acquiring property in favor of the partnership, the contractual rights of the partnership must be secured by a guarantee deemed appropriate by the Board. In case the counterparty to the contract is the Housing Development Administration, İller Bankası A.Ş., municipalities and their subsidiaries, affiliates and/or companies that have the privilege to nominate candidates for the board of directors, the guarantee requirement in this paragraph shall not apply.", it has been concluded that there is no obstacle for the real estate to be included in the portfolio of GYO with its qualifications in the title deed.

In addition, according to the 7th section of the same communiqué, Article 30, paragraph 1 and 2, it was seen that the mortgage in the land registry was a pledge record used to finance the real estate's value and the mortgage owner was Akfen GYO A.Ş., and it was concluded that this situation did not prevent it from being included in the portfolio of the GYO.

7. CONCLUSION

7.1 Conclusion Sentence of The Responsible Appraiser

This report, which contains the minimum elements within the scope of the CMB legislation for the determination of the fair market value of the real estate in Kayseri Province, Kocasinan District, Pervane Neighborhood, Block 2420, Parcel 9 has been prepared by us, upon the request of Akfen Gayrimenkul Yatırım Ortaklığı A.Ş.

The Fair Market Value of the real estate subject to the appraisal on the date of appraisal has been determined considering all factors such as the opinion formed in line with the examination and research carried out in the real estate area and throughout the region, the development trend of the district and the region, the zoning status and construction conditions of the real estate and its usage function, the area of the land, its geometric shape, topography, the honor and importance of the MANLIK A.S.

neighborhood, the organization style of its surroundings, its distance to the city center and the central locations in its region, its frontage to the main road, boulevard or street, transportation and environmental characteristics, current economic conditions, and by taking into account all positive and negative factors, such as whether it can find a buyer according to the neighborhood it is in, and if it finds, the degree of ratio.

7.2 Final Assessment

While appraising the real estate, all the positive and negative factors specified in the relevant articles in the report were taken into account. As a result of the examinations, the data obtained and the results of the methods used were concluded in a meaningful way.

The result obtained as a result of the market method has been determined as the final value, on the grounds that it shows the market value more accurately, taking into account the title deed and actual nature of the real estate in terms of the region and location where it is located, in line with the purpose and scope of use. Thus;

As of the appraisal date, the current market value of the real estate, which was determined according to the Income Method, is as follows;

In numbers: 117,900,000.00-TL and in text One hundred seventeen million nine hundred thousand Turkish Lira.

Monthly Lease Amount of Real Estate has been determined as: 404,000 TL/month.

Final Value			
Report Date	31.12.2021
